THE TWO PARTIES.

The adversaries of the National Democratic party seem resolved to make fight at every turn. One or two defeats do not suffice for them. They must master their forces for every campaign and contest every field. There is something in this consistency and persistency by which the Democratic party ought to profit. It may be a hard thing to stand up under continued adversity, but it is proverbially a more difficult thing to bear uninterrupted prosperity. Many a battle has been lost from overconfidence. Many a victory has been won by simple perseverance and audacity. The opposition in this city doubtless hope, at some time or another, to find themselves again in the van of success. If they really anticipated a fair contest and a full vote, they would scarcely venture on so unequal a struggle. It has been demonstrated that the National Democratic party is in an immense majority in this city. Reasonably, we might anticipate that such would be the case. To suppose the contrary would be to accuse the people of the city of an extraordinary degree of ignorance, or of wilful blindness to their own rights and interests.

In fact, the National Democratic party, in its truly catholic character—in the position which it occupies as the defender of the rights of the States, and peculiarity of those rights and interests which are now so ferociously assailed by a bitter, vindictive, and unscrupulous party—has, so far as this State and city are concerned, much of the appearance of a partisan organization. It is truly the great popular party. In the North it is the party in the ordinary and restricted sense of that term. In Louisiana it is the people.

Hence it follows that the opposition has really no right to aspire to the dignity of a political party, but is a fragment and a faction, entirely antagonistic to public sentiment in Louisiana. We are perfectly conscious that there are gentlemen connected with the new party of the State, who are not influenced by any such motives as those which we have indicated. The circumstances of their history preclude any such idea. But we sincerely hope that these gentlemen will reflect seriously before persisting in the attitude they now occupy in antagonism to the party representing the public of their city and State; in opposition to the party supporting the administration of President Johnson; in conflict with the only party willing and able to confront the radical majority in Congress. We trust that no transient influences, no temporary alignments, no specious promises will succeed, finally, in causing them to do injustice to the facts of their own history, and to the kindness with which they are regarded by the people of New Orleans.

We said, in a former article, that this party had a political sympathy with the people of New Orleans or of the State. Mr. Bell, his candidate for sheriff, declares that all his sympathies are with the people of this, his native city. Mr. Bell may suppose that such is the case, but politically speaking, no man's sympathies can be with the people of Louisiana, who oppose the National Democratic party. Mr. Bell, as an individual, has a right to run for the office of sheriff, but politically, he must bear all the consequences which flow from the opposition of antagonism which his party assumes towards the National Democratic party—the party which peculiarly and thoroughly represents the rights and interests of Louisiana—the party which, North and South, supports the wise and magnanimous administration of President Johnson—the party allied with the only national organization which is striving to reform the Union, to preserve the rights of the States, to maintain the integrity of our political and social institutions, and to protect us against the tyrannical, odious and vindictive designs of the dominant Congressional majority. Such being the relations of political organizations towards each other, no man can oppose the National Democratic party, and justly claim that his political sympathies are with the people of New Orleans.

Let us be deceived no longer. Mr. Bell, as a citizen in a local election general principles are not involved. On the contrary, general principles are directly involved wherever the Democratic party is forced to make a fight in order to maintain its supremacy and its capacity for effective service in the great cause which is now at issue. It is not enough to elect this man or that man to office; it is to elect the National Democratic party, which shall preserve the integrity of the Democratic organization, and show that the people of New Orleans are fully sensible of the important character of the questions now before the country; while, should we permit an antagonistic organization to compass our defeat, we should exhibit a most culpable indifference to the efforts which are being made by our friends, and which are being made by our friends, and which are being made by our friends.
