

New Orleans Daily Crescent. OFFICIAL JOURNAL. THE STATE OF LOUISIANA. J. O. HIXON, Editor and Proprietor. OFFICE, NO. 84 CAMP STREET.

RADICAL QUANTITIES

If it were not trilled with the most serious interests of the country, both in the North and in the South, the continual pratings of the radicals about a "guarantee" and "security" could only excite a derisive smile on the part of the thinking portion of the community. But supported as these radicals are by the fanaticism, the selfishness and the greed for power of the dominant party of New England, the mischief of which they are capable is incalculable. It is difficult for a reflecting mind to conceive of so long a continuance of an infatuation which insists on driving the ship of state through stormy seas, amid unknown shoals and breakers, without compass or rudder, and in utter disregard of the well-considered charts of learned statesmen and the established landmarks of the Constitution, with a reckless abandon without parallel in history.

THE BOLS DE VINCENNES

The government of the United States had sent General Bernard, in the year 1830, or thereabouts, to the city of New Orleans, for the purpose of examining the ground and selecting a site where the great canal from the river Mississippi to the lake (Pontchartrain or Borgne) might be established, for the convenience of transportation or other requirements in the military service of the United States. Upon this errand or commission, the general just named, then brigadier at the head of the military department, arrived in New Orleans at the time above stated. Now, if as happened, that the modern invention of railroads, then just started upon a somewhat more extended scale in England or Great Britain, where this mode of locomotion had been long in successful operation in the coal mines of Cornwall, had found in the Prussian engineer Zimpel a most zealous defender and propagator, who had also just arrived with this notion, it is not surprising that General Bernard had selected the latter as the old Merigay canal, from its starting point on the Old Levee in the Third District, at the present depot of the Pontchartrain railroad, towards the lake, through the cypress forests, as the nearest connecting route from the river to the back waters of the sea and Gulf of Mexico, it occurred once a number of enterprising gentlemen and capitalists, that this would be the most convenient route for establishing a railroad line, more especially through the mode of communication and transportation than that of a navigable canal. Upon these premises and considerations a company was formed, and an act of incorporation passed by the State legislature of Louisiana, granting to this association, if we recall a perpetual or very long charter for the exclusive use of a railroad connection from the city to the lake Pontchartrain. To induce the State legislature to accord to this association the necessary charter, a copy of a railroad communication, it was given, as one of the inducements, that the improvement would act as a most powerful agent in conferring upon the down town section innumerable advantages for local improvement and advancement, and for these other weighty causes, the heavy money was thus obtained by the Pontchartrain railroad company.

THE ELECTIONS OF NEW ORLEANS

NUMBER SEVENTY-THREE.

Washington, June 6, 1886. THE CHIEF OF THE POLICE IN THE SILENCE. We have all heard of this rule which works both ways, but some of our legislators do not appear to appreciate it. Mr. Pollard, of Vermont, favored the radical plan of reconstruction in a set speech, because it was "a prudent, firm and bold measure." When this gentleman was informed that the second section of the proposed article would reduce the representation of his own State to nearly one half its present amount, he protested most strenuously against such an effect.

Special Correspondence (By New Orleans Crescent)

FROM WASHINGTON.

Washington, June 6, 1886. We have all heard of this rule which works both ways, but some of our legislators do not appear to appreciate it. Mr. Pollard, of Vermont, favored the radical plan of reconstruction in a set speech, because it was "a prudent, firm and bold measure." When this gentleman was informed that the second section of the proposed article would reduce the representation of his own State to nearly one half its present amount, he protested most strenuously against such an effect.

Weekly Report of Deaths

CITY OF NEW ORLEANS, FROM THE 1st TO THE 10th DAY OF

Table with columns for Diseases, Age, Sex, and Cause of Death. Lists various ailments like Cholera, Typhoid, and Smallpox, along with the number of deaths for each category.

Bought Since the Fall in Prices

CLOTHING AT LOW RATES. READY MADE AND MADE TO ORDER. THE MATERIAL OF THE BEST MANUFACTURE. FRENCH, ENGLISH AND AMERICAN. CLOTHING AND FURNISHING GOODS, SUITED TO EVERYBODY'S PURSE. Made to Order with Promptitude. DREYFUS, BROTHERS & CO. No. 3, 4 and 6 Camp Street, Corner Canal.

IMPORTANT DECISION.—The court of the 12th judicial district, Hon. T. S. Crawford presiding, closed a session of five days on Saturday last at Monroe. The whole session was taken up with the very important case of Joseph H. Bennett & Co. vs. C. Hardy, sheriff, and others, representing John T. Leblond and his associates, who claim title to the Yickburg, Shreveport, Texas and Pacific Railroad under the deed of the 23rd February, 1856. The evidence closed on the 8th. Hon. Chas. M. Conrad made an able argument for the plaintiffs, and was answered by the Hon. John W. S. L. Slack, W. J. Q. Baker, Frank Smith and J. T. Leblond, for the defendants. Judgment was rendered for the defendants. Plaintiffs took appeal. This was interesting case and more will probably be heard of it hereafter.

WE HAVE received a beautiful volume to Allen, from the pen of Col. Hardy. It is not a popular poem, but it is a noble, generous and manly eulogy on our departed and most heroic friend, Col. Hardy. Allen and loved him. Some passages of his poem are pathetic, touching and exquisitely beautiful. We will give it soon.

PAUSE CONVENTION OF MEMBERS.—The representatives of the press of Mississippi met in convention at Jackson, June 5. L. M. Partridge was chosen president, A. J. Francis and M. S. Ward vice presidents, J. L. Power secretary, and P. K. Meyers treasurer. A joint committee on constitution and by-laws was appointed, and a resolution was adopted providing for an address and a literary discussion, on the next day's proceedings. Col. John S. Hamilton was chosen orator, and Col. Giles M. Hillier was chosen historical essayist.

OAKLAND COLLEGE, MISS.—The annual commencement of this institution will take place on Thursday, the 12th inst., when the degree of Bachelor of Arts will be conferred on the surviving members of the class of 1885, who were interrupted by their voluntary devotion of themselves to the service of their country, at the outbreak of the late war. On the day preceding Commencement, the usual sermon before the Board of Trustees will be delivered by Rev. J. H. Rice, D. D., editor of the Presbyterian Index, Memphis. Other addresses, besides, suitable to the occasion, may be expected. Also, on the day before Commencement, will be the regular annual meeting of the Alumni Association.

TYPOGRAPHICAL UNION.—At the third day proceedings of the National Typographical Union at Chicago, on the 11th inst., the Committee on Resolutions reported from sixty subordinate Unions, representing as many Northern and Southern cities. The number of resolutions is 1422—the number of members in good standing 2965—the amount of receipts \$14,729. The largest Union represented, in their statement is that of Philadelphia, numbering 64. The New York Union has 228 members. The third in size is Chicago, 273 members. The fourth is San Francisco, 270 members. In each of eleven cities there are more than one hundred members on the rolls of the Union, and in all the sixty cities represented the average is fifty-six to each Union.

THE SOLAR SYSTEM AMENDED. The impulse which astronomical science has received during the last half century, is something truly wonderful. Even the delirious, vainly as its powers have been increased, it found insufficient to reveal the existence of heavenly bodies which are demonstrated by the vigorous application of mathematical analysis. The telescope has enabled us, it is true, to extend our vision, by the addition of the planet Uranus and the numerous asteroids lying between Mars and Jupiter; but it required the grand efforts of a higher genius, the grasp of mighty intellectual conceptions, aided by the powerful alliance of mathematical science, to reveal the planet Le Verrier, hidden in the depths of space, and waiting to be calculated into light.

THE TILLOUGH SENTINEL, of Saturday, says the Levee Lafayette is falling at the rate of about one inch in twenty-four hours. The Sentinel reports a considerable damage to crops by the storm of last Tuesday, but the Sentinel remarks: "In the parish of Assumption it seems that more damage was sustained from the fury of the hall storm than in any other parish that the furious wind had pelting rain visited. In the parish just named several sugar houses, saw mills, corn sheds, barns and more were blown down. We have also reported that several houses had been done on Mr. T. Ellis's plantation, in the parish of Terrebonne, by the late storm."

Ellis's plantation, in the parish of Terrebonne, by the late storm."

THE TILLOUGH SENTINEL, of Saturday, says the Levee Lafayette is falling at the rate of about one inch in twenty-four hours. The Sentinel reports a considerable damage to crops by the storm of last Tuesday, but the Sentinel remarks: "In the parish of Assumption it seems that more damage was sustained from the fury of the hall storm than in any other parish that the furious wind had pelting rain visited. In the parish just named several sugar houses, saw mills, corn sheds, barns and more were blown down. We have also reported that several houses had been done on Mr. T. Ellis's plantation, in the parish of Terrebonne, by the late storm."
