

New Orleans Daily Crescent. OFFICIAL JOURNAL OF THE STATE OF LOUISIANA. J. O. NIXON, Editor and Proprietor.

During my temporary absence from the city the editorial department of the Crescent will be under the charge of W. M. SIMONS, Esq.

We will issue the Crescent on Monday morning, in triple sheet, thereby enabling us to display the favors of our advertising friends to great advantage.

The weekly Crescent, issued this morning, contains all the news of the week by telegraph and mail, editorials, local matters of interest, financial and commercial summary, state of the markets, and a collection of interesting miscellaneous articles.

To Rev. Dr. Hedges, rector of St. Luke's church, will officiate to-morrow at 10 o'clock a. m. in the Senate Chamber of the Mechanics Institute.

RAILWAY CONNECTION WITH TEXAS.—We publish to-day a communication upon this subject, to which the attention of every one interested in the prosperity of New Orleans will naturally be directed.

ORDINARY THEATRE.—Through the courtesy of the manager of this establishment, we have obtained an insight into his plans and arrangements for the gratification of the New Orleans public.

We were in time, however, to see the ravens of "Un Prêtre qui se Orie," and must thank Mr. Alphonse G. Mille. Savigny for a half hour of sincere gratification.

A LETTER TO M. LATE.—It has come to be a proverb among those who have the entrée to all the places of amusement, that just as you happen to drop in at the performers, you are sure to drop out.

However, as the "Wonderful Woman" and "Robert Macaire," are promised to-night at the St. Charles, "Romeo and Juliet" at the Varieties, and a repetition of the "French Spy" at the Academy, we shall not be discouraged from seeking revenge.

RADICAL PERVERSIONS. The report of the military commission is bad enough in deducing illogical conclusions from imaginary premises, and the substitution of preconceived fancies for established facts.

The whole responsibility of the massacre is placed upon the civil authorities of New Orleans, and through them upon the President, who assumed the course. The radical convention is exonerated from the charge of inciting the negroes to violence, and it is proved that the negroes who paraded were generally unarmed, and could have had no hostile intention.

The alarm bell gave the well known signal which, during the rebellion, summoned the rebel soldiers to the defense of the city against a federal attack. Sweeping through the streets, in answer to the tolling bell, came Hayes' brigade and bodies of men bearing the insignia of rebel troops.

It would be impossible to condense into the same space a greater number of willful falsehoods than are to be found in the above extract. From the beginning to the end, it is a misrepresentation, not alone of notorious facts, but even of the grossly unfair, and prejudiced report of the commission.

It is not established, "that the besieged party were totally unarmed," on the contrary, all the trustworthy evidence shows, not only that they were armed, but that they anticipated and desired a collision with the authorities and with the people.

It is false that this city was left to the mercy of the rioters. The disturbances were limited to two or three squares, in a city five miles long and a mile broad; nor is there any testimony to show the presence of the federal troops, there would have been an insurrection in a matter of minutes and Union men, or any massacre at all, is purely gratuitous.

It is false that "organizations of rebel soldiers joined in the attack" on the convention. There are no such organizations in this city. The report does not affirm that they exist; it only supposes that they do.

FOREIGN TOPICS. The French journals are not all agreed in their estimate of the recent important circular of the French government.

One of the remarkable circumstances on board of any vessel in ancient times, when traversing the Atlantic ocean, as we have been narrating our own voyage in the year 1816, was then to ascertain the longitude by means of the moon's eclipse.

These clear starlight skies would very often invite the passengers, fond of these studies, to make researches among the constellations figured upon the astronomical charts, generally attached to nautical books.

Another remark upon ancient navigation was likewise presented to us in the fragment of the log of the vessel, which, by the daily observation of the sun at meridian, which never is falling in these southern latitudes, enables the mariner to put down upon the nautical chart the exact place of the ship's position at 12 o'clock at noon.

On the other hand, the United States discover that the circular "is a long snail" which ends in establishing the necessity of providing France with markets.

Everything then is for the best; France has nothing to fear from us; on whatever side she turns her eyes, she meets only with sympathy and cordiality from the government.

Either we have lost all perception of logic, or the conclusion of such an essay should be summed up in two words: "disarmament" and "Evolution." Nobody, however, has the right to impose on herself ruinous armaments if she does not intend any territorial aggrandizement.

Our thanks are tendered to Mr. Edwin Faldwin, clerk of the steamer Sarah, for Mobile evening papers of Thursday.

Gov. WELLS and the LEGISLATURE.—The following appears in the telegraphic dispatches published in the Jackson papers of yesterday: New Orleans.—The morning papers will publish to-morrow the correspondence between Governor Wells and the board of levee commissioners regarding a proposition to call the legislature together to consider the best method for repairing the levees.

FIFTY YEARS IN THE NEW WORLD. NUMBER NINEVEN. One of the remarkable circumstances on board of any vessel in ancient times, when traversing the Atlantic ocean, as we have been narrating our own voyage in the year 1816, was then to ascertain the longitude by means of the moon's eclipse.

These clear starlight skies would very often invite the passengers, fond of these studies, to make researches among the constellations figured upon the astronomical charts, generally attached to nautical books.

Another remark upon ancient navigation was likewise presented to us in the fragment of the log of the vessel, which, by the daily observation of the sun at meridian, which never is falling in these southern latitudes, enables the mariner to put down upon the nautical chart the exact place of the ship's position at 12 o'clock at noon.

The Dayton (Ohio) Journal reports a vast army of rats proceeding south, devouring corn, potatoes, tomatoes, fruit, etc. One of their stopping places, only 80 by 24 feet, accidentally discovered, was so crammed with them that fifteen hundred and five were killed before the slaughter stopped.

A few days since, says the Memphis Avalanche of the 11th inst., Nashville cast an overwhelming vote against radicalism. The capital of the State spoke in tones of thunder against the franchise law, negro suffrage and negro equality.

Gen. Frank Blair was to have addressed the people of Cape Girardeau on the morning of the 8th inst., but the steamer on which he was traveling grounded, and he did not reach the place till 8 a. m. All his friends had then dispersed; but being called on he appeared on the gallery to respond, when a mob of radicals set upon him with the vilest of obscene abuse.

At Penn's Mill, near Georgetown, La., October 13, at 6 o'clock, M. L. LITTLE BROWN, daughter of Thomas and Margaret Brown, aged 2 years.
