Now that thefts, bank robberies and murders are getting so common that they are hardly worth a scare head in a big metropolitan daily, a campaign may soon be looked for to secure the repeal of all criminal laws on the ground that the laws make the criminals.

This dear United States was ruled by the Wall Street bloc for many years and comparatively little noise was made about it—in fact the gang got by without so much as being called a bloc. Now that the farmer states of the middle states are attempting the "bloc system" in an effort to push thru legislation favorable to the farmers, a tremendous noise is being raised. While we don't particularly like this system of legislation, we frankly admit that if we must be ruled by one bloc or the other, we prefer the agricultural bloc because it will benefit a greater part of the American people.

Christmas is over. The kiddies are still having a delightful time with the toys that were built strong enough to stand the wear. Mother is tired and worn out but is smiling reflectively over the happy scenes of that gladdest day of the year. Dad, poor fellow, is trying to hold onto the Christmas spirit and not to swear, but he has nearly chawed the end of his pencil off and has gotten what appears to be a permanent wrinkle at the upper extremity of his nose, trying to figure out how in tarnation he is going to meet all the bills before Christmas comes around again.

The school children are thoroly enjoying their two weeks vacation. This is longer than has been granted them for some time, and they are all strong for it.
