FOR PRESIDENT: HORATIO SEYMOUR, OF NEW YORK. FOR VICE PRESIDENT: FRANK P. BLAIR, OF MISSOURI.

For the benefit of the readers of the Crescent we continue this morning the publication of the laws passed by the Legislature...

THE FATE OF CARPET-BAGGERY.

The New York Times and the World are engaged in a controversy in regard to the rational interpretation of that part of the Democratic platform which relates to the carpet-bag governments.

"It seems to us," said the writer, "in the exercise of the calmest and most candid judgment we can bring to the subject, that such a claim, so enforced, involves as fatal an overthrow of the authority of the Constitution as to complete a destruction of the government and Union, as that which was sought to be effected by the States and people in armed insurrection against them both."

Mr. Raymond thus distinctly announced the doctrine that the policy of the Radical party was unconstitutional and revolutionary, and the necessary implication is that a policy which is revolutionary and unconstitutional, must be void in law.

The Republican says that the prospective adjournment of the Dryades street Legislature to the 7th of November ought to relieve the Democrats of their fears that the Legislature will choose the electors.

It is a pity that Parson Conway is not here to do up the Tuesday night disturbances in his own peculiar and inimitable style for the Radical press.

The Republican says that somebody in New York wants to bet that New York City will not give Seymour 35,000 majority.

WHO BRING IT ON!

If a man loads a gun, sets its trigger to the hair point, draws back its hammer to full cock, and then puts it in the hands of an idiot or a maniac, who is responsible for its subsequent discharge and any fatality that may result? If a combination of men place under a much frequented thoroughfare a torpedo so arranged that the concussion of a random footstep may cause it to explode, who is responsible for the disaster to life and property that may ensue?

Everybody sees where the responsibility lies in each case. If murder is done, the guilt appertains, in the first place, and in a paramount degree, to him who prepared and bestowed the gun, or to them who constructed and laid the torpedo.

Suppose, nevertheless, that a person charged with the mischief inflicted by some fatal contrivance such as indicated, should claim impunity on the ground that he did not pull the trigger of the gun, or did not, with his own hands, fire the train of the torpedo.

Yet the impudence and the absurdity would not be greater in that case than they are in the case of the criminals who have contrived the mischiefs which are now befalling, or threatening to befall every State, every city, every county or parish comprised in the black circle of the reconstruction horror and infamy.

The peace is broken and thickening dangers impend in Georgia, in South Carolina, in Alabama, in Louisiana, in Arkansas. The caldron of trouble boils and husses. Every ingredient that can increase the bitterness, loathsomeness and venom of its witch broth is daily contributed to it.

And who are the contrivers of this atrocious condition of things? What do they say when the peace is broken, when rioting is rife, when States verge upon anarchy and society is forced to a final and desperate struggle for existence? They disclaim all responsibility for the inevitable results of their iniquitous contrivance. They are the men who lay the guilt of every consequent evil upon those who become the victims of their wickedness, or upon those who fight manfully against their incendiary and murderous devices.
