

Woman. Females, owing to the peculiar and important relations which they sustain, their peculiar organization, and the office they perform, are subject to many ailments. Freedom from these contributes in no small degree to their happiness and welfare...

PERMANENT SICKNESS AND PREMATURE DECLINE.

For it is pleasant to consult a physician for the relief of these various delicate affections, and only upon the most urgent necessity will a true woman be sacrificed her greatest charm as to die. The sex will then thank us for placing in their hands simple specifics, which will be found efficacious in relieving and curing almost every one of those troublesome complaints peculiar to the sex.

HELMHOLD'S EXTRACT OF BUCHU.

Hundreds suffer on in silence, and hundreds of others apply vainly to druggists and doctors, who either merely tantalize them with the hope of a cure or apply remedies which make them worse. I would not wish to assert anything that would do injustice to the afflicted, but I am obliged to say that although it may be professed from excessive exhibition of the powers of life, by laborious employment, unwholesome air and food, profuse menstruation, the use of tea and coffee, and frequent childbirth, it is far oftener caused by direct irritation, applied to the mucous membrane of the vagina itself.

LIFE, HEALTH AND HAPPINESS OF WOMAN

In all classes of society, and which, consequently, affect more or less directly the welfare of the entire human family. The means that exist for procuring education and marriage, cause the years that nature destined for corporeal development to be wasted and perverted in the restraints of dress, the early confinement of the school, and especially in the unhealthy enclosure of the ball room. Thus, with the body half clothed and the mind unduly excited by pleasure, preventing in midnight revels the hours destined by nature for sleep and rest, the work of destruction is half accomplished.

In consequence of this early strain upon her system, an necessary effort is required by the delicate victim to retain her situation in school at a later day, thus aggravating the evil. When an excitement is over, another in prospective keeps the mind morbidly sensitive to impression, while the most constant restraint of fashionable dress, absolutely forbidding the exercise indispensable to the attainment and retention of organic health and strength, the exposure to night air, the sudden change of temperature, the complete prostration produced by excessive dancing, early of necessity, prevent their legitimate effect. At last an early marriage elaps the climate of adversity, and the unfortunate one, hitherto so actively regardless of the plain diseases and remonstrances of her delicate nature, becomes an awed and timid subject of medical treatment. This is but a truthful picture of the experience of thousands of our young women.

Long before the ability to exercise the functions of the generative organs they require an education of their peculiar nervous system, composed of what is called the uterus, which is, in common with the female breast and lips, essentially under the control of mental emotions and associations at an early period of life; and, as we shall subsequently see, those emotions, when excessive, lead, long before puberty, to habits which sap the very life of their victims as nature has self-completed their development.

THE CRESCENT'S DISPATCHES.

WASHINGTON.

Mexican Vice Consul at San Antonio.

JUDGE SWAYNE'S ALLOTMENT

IMPORTANT PROTOCOL FROM THE PRESIDENT.

Sherman Reports the Indian Backbone Broken.

THE RED MEN STARVING AND BEGGING FOR PEACE.

A PROPOSED NEW TAX BILL.

THE VIRGINIA QUESTION.

KELOGG'S PACIFIC RAILROAD AND TELEGRAPH BILL.

WASHINGTON, Jan. 15.—The president has recognized Manuel M. Morales vice consul of Mexico at San Antonio, Texas.

Judge Swayne has been assigned to the district recently presided over by Judge Wayne. By the new allotment Judge Swayne is allotted to the fifth and sixth circuits.

The president sent to the Senate, yesterday, a protocol fully recognizing the naturalization laws of the United States, and abolishing the legal principle heretofore maintained in Great Britain of the indefeasibility of native allegiance and a treaty for the adjustment of all claims, including the Alabama claims, by a commission to sit at Washington, with a stipulation to prefer, when necessary, individual claims to the heads of a friendly nation.

General Sherman telegraphs from St. Louis, a letter from Sherman, representing the destruction of the Comanche village, on Christmas Day, 1868, and the fact that the Indians were starving and begging for peace and permission for their people to come in, asking no terms beyond a paper protecting them from the troops while coming. They report their people starved—all the dogs eaten and no buffalo.

Sheridan denies that Black Kettle was friendly or that the light occurred on his resignation.

General Thomas and Gillem visited the president to-day. It is stated that Rollins has proposed a new tax bill exempting newspapers.

The Virginia committee have been receiving official visitors to-day. Great importance is attached to these interviews, though no details are published. The committee visit Judge Chase as a body to-night. The committee are, with the concurrence of leading members of both Houses of Congress, engaged in the preparation of the bill designed to carry out the arrangement agreed upon. They will remain here until the work in which they are engaged shall assume an entirely satisfactory shape.

Kellogg's Southwestern Pacific Railroad and telegraph bill incorporates a company under the name of the Southern Pacific Railroad Company, with a capital stock of one hundred million dollars, to construct and maintain a railroad and telegraph line from Fulton, Arkansas, crossing the Trinity river between the 32d and 34th parallels to El Paso, on the Rio Grande, through Marshall county, Texas, and from some point in California to San Diego. In aid of the enterprise the bill proposes to grant twenty sections of land per mile on each side of the line, and six per cent. thirty-year bonds of the amount to the amount of \$20,000 per mile in New Mexico and Arizona, and \$10,000 per mile for the rest of the line, to be secured by a second mortgage.

Long before the ability to exercise the functions of the generative organs they require an education of their peculiar nervous system, composed of what is called the uterus, which is, in common with the female breast and lips, essentially under the control of mental emotions and associations at an early period of life; and, as we shall subsequently see, those emotions, when excessive, lead, long before puberty, to habits which sap the very life of their victims as nature has self-completed their development.
