The following was received: OFFICE CITY ATTORNEY.
Room No. 13, City Hall,
New Orleans, March 9, 1889.
To the Honorable the Board of Aldermen and Commo

New Orleans, March 2, 1862. )

To the Henorable beg to inform you that the Supreme Court, resterday, decided the case of Aristide Baré vs. the city, in favor of the city. This suit involved a claim to very valuable lands in front of Water street in the First District. Since my last communication the city has attained favorable judgments in the following cases:

Arrowanith vs. the city—Sixth District Court. D. E. Mandell vs. the city—Sixth District Court. The Fifth District Court of the Fifth District Court. In the Fifth District Court a verdict has been rendered against the city of \$29,000, in case of Belot vs. the city. An appeal is to be taken in this case, and I ais confident of the reversal of at least a part of the judgment. No other judgment. (except in a few minor claims) has been rendered against the city. Henor claims has been rendered against the city.

The following was received:

Respectfully.

The Henorable Bare of Aldermen:

New Orleans, March 9, 1869. 
Then. H. Shields, Eag., Chairman Committee on Water Works, Board of Aldermen:

Sir—As there will be no meeting of the board of commissioners of these works until after the next session of the Common Council, I take the liberty of inclosing to you a statement of the finances of the works from the time the commissioners took charge, until the 1st instant. A more full report in detail will be prepared, and I have no doubt the board will promptly avail themselves of any opportunity you may offer to get it before the council.

full report in detail will be prepared, and I have no doubt the board will promptly avail themselves of any opportunity you may offer to get it before the council.

The works had to be operated, you know, for the first five months entirely without revenue, rents having been collected in advance by the old company. All indebtedness incurred, except a few hundred deliars not presented, has been paid, and there now stands to the credit of the board on the last inst. 3846 18. Besides, we have fuel remaining on hand to run the works four or five months from the last inst.

The records of the water purveyor for the months of August, 1868, and February, 1869, show a most gratifying result. Such progress has been made in checking the enormous waste heretofore existing, and such improvements in the pumping department, that there is a monthly saving of from 600 to 700 barrels of coal—or at the rate of \$5000 a year on this one item. The amount expended under the heads, "street service extension" and "water rent returned," etc., do not come properly within the current expenses. That extension, however, was a necessity, and the means were advanced by the parties interested. Several large establishments—the Jackson Railroad, Hammond's distiliery, Bonabel's bl-salphite manufactory, and Bennet & Lurges' foundry—had all paid for their water, but the supply was insufficient, and could not be furnished. The laying of the connection pipe, for which this expenditure was made, has removed the whole difficulty, and the cost will be returned by these four subscribers in about two years.

A failure to furnish the supply after accepting payment would have subjected these works to heavy damages.

I sm sir, very respectfully,

Your obedient servant,

Braxton Brage, Superintendent.
