

DR. BUCK TO PEN FRIZELL IS ANGRY

Greensburg Physician Begins City Officials at Larned May Follow French Policy.

Collapse Follows His Entrance to Prison Yard. Row Follows Resignation of Chief of Police.

Leavenworth, Kan., Nov. 15.—For the alleged murder of his young wife with poison, Dr. G. H. Buck, at one time considered to be one of the most promising of the younger physicians of Greensburg, Kan., is to serve a life sentence behind the prison walls.

On May 17, 1911, Dr. Buck was adjudged guilty in the district court of Leavenworth. The trial, which lasted for two weeks was very dramatic, more so for the reason that the closing scene of the trial was enacted upon the stage of the Greensburg opera house with the parquet and galleries filled with spectators.

Parallel With Hyde. In a measure the Buck case was nearly a parallel with the famous Hyde case in Kansas City. Mrs. Buck died quite suddenly in the fall of 1909. She had not been ill before that time and much mystery was attached to the sudden death.

The circumstances caused much gossip in the little Kansas town and the coroner was finally prevailed upon to hold a post mortem. Dr. W. K. Trimble, of Kansas City, Kan., and Dr. H. J. Jones, of Hutchinson, who conducted the autopsy, pronounced that death resulted from unnatural causes.

Buck Arrested. Dr. Buck was arrested on a complaint sworn out by the dead woman's mother. The viscera was taken to Lawrence and examined by Prof. F. W. Bushong, who found sulphocyanide. As a result the physician was held for trial by the coroner's jury.

At the time of his conviction Dr. Buck's lawyers made an attempt to get another trial but were denied.

Wagoner, said in a published interview here today: "I am for W. H. Thompson for United States senator. If he was big enough to win at the primary and big enough to defeat the Gollath of the opposition in the election, he is big enough to be senator and I have nothing in common with the knocking that is going on. I am not a candidate myself, although I understand there is talk to that effect."

Child Saved From Death. Chanute, Kan., Nov. 15.—Modern inventions saved from death by diphtheria the 4-year-old daughter of Mr. and Mrs. James Statler, ten miles east of Chanute. A surgeon and a nurse were summoned from this city with apparatus for placing a silver tube in the child's throat. Meanwhile the attending physician fought for the life of his patient. It looked as if fate had turned her thumb down, because the automobile in which the relief party started became disabled. The driver summoned another from the city by rural telephone, it entered the race and reached the Statler home just as the physician was preparing to perform an emergency operation with such equipment as he chanced to have with him.

Madison Lake, Minn.

"Gentlemen—In December, 1908, and March, 1909, I was taken with hemorrhages of the lungs which confined me several weeks, each time to my bed. These left me very weak and I coughed at nights and could not sleep. My appetite also failed me. My doctor advised me to go West. So, in September, 1909, I planned to go, but I had four more hemorrhages, which put me in bed for three weeks.

"In November I started for Denver, Colo. After my arrival I met Michael Brody, who, upon learning of my condition, urged me to take Eckman's Alternative. In about two months I began to feel better. I kept on taking the medicine and improved fast. In March, 1910, I returned home. I think I am entirely well, have a good appetite and sleep well. When I left Denver my weight was 120 pounds. I now weigh 165, my normal weight. I thank God and your Alternative for my health. I can help any other person suffering from Tuberculosis, I will gladly do so."
