Redini began his discussion with the United States with a totally unnecessary threat, and now ends it with an undignified point. If he had all parties would have vied with each other in demanding that the affair be lifted to the bottom, and Italy treated with the utmost courtesy and fairness...

I am not making any charges, but from what I know of politicians I should imagine that our present Minister to China, Charles Denby, had not a little to do with calling the attention of the authorities at Peking to the reasons why ex-Senator Henry W. Blair should be a person *non grato* to them...

INTRUDERS IN THE CHICKASAW NATION. Some time ago the Commissioner of Indian Affairs issued instructions ordering the removal of intruders in the Chickasaw Nation. It was reported by the Commissioner of Indian Affairs that there were 6,000 of these intruders, who were in every sense of the word, and the Commissioner has already called upon the War Department to detain a troop of cavalry to assist in removing them from the nation...

Experiments are being made by the Navy Department with a new system of protection for gunners in exposed places on men-of-war during action. From a Pennsylvania factory has been secured a peculiar description of wire webbing, made of interlocking steel spirals, which is remarkably flexible and strong. It bears some resemblance to old-fashioned chain armor, and it is proposed to use curtains of this material to protect gunners behind shields from fragments of exploding shells. The resisting quality of the netting is believed to be equal to a solid plate of steel an inch thick.

The Ordnance Bureau of the Navy Department has just completed, at the proving grounds at Indian Head, a point 25 miles down the Potomac River from Washington, the final trial of the 10-inch and 12-inch guns of the double-turreted monitor Miantonomoh. With 239 pounds of Dupont brown powder and 15 tons pressure the projectile attained a muzzle velocity of 2,110 feet per second, probably the best result on record for this class of gun, using brown powder. The fourth and last of the Miantonomoh's 10-inch guns is about finished, and will be tested at once.

HEALTH HINTS For Old and Young. BY FELIX L. OSWALD, M. D. CHAPTER CX. EPIDEMICS—(Continued).

A writer on "The Military Art of the Ancients" remarks that many of their great Captains conducted their campaigns on the principle that a confident hope of victory is the best means of securing it. They watched the flight of birds and the phenomena of the sky to construe a promise of conquest, and the Roman General Scipio went so far as to make the deliberate forgery of lucky omens constant practice.

On the same plan many clever physicians fight their battles against the enemies of human life. They conceal their own misgivings, and every day they endeavor to revive the courage of their patients; though some of those patients are apt to accomplish the same purpose by methods of their own. Sisters of Charity, with their firm belief in the protection of Heaven, are successful through the double-turreted monitor Miantonomoh. With 239 pounds of Dupont brown powder and 15 tons pressure the projectile attained a muzzle velocity of 2,110 feet per second, probably the best result on record for this class of gun, using brown powder.
