If some one of the enterprising ranchmen living along the base of the San Francisco mountains would build a trail to the top of any one of the three peaks, and keep animals to carry tourists up and down, they might add considerably to their income during the year. The time is coming when a trip to the top of the San Francisco mountains will be considered as interesting as the trip to the cave and cliff dwellings now is.

D. L. Shipley, agent at the Navajo Indian Reservation, was in town this week investigating the recent trouble between the Indians and William Rodan, on the Little Colorado. Mr. Shipley made a trip to the river and interviewed the Indians and the parties on the Rodan ranch. He also interviewed a good many of our citizens, and is only desirous of obtaining the facts in the matter. He represents the Interior Department, and his report will be made to the Commissioner of Indian Affairs. General McCook was expected to be here during this investigation, but was detained by circumstances over which he had no control. It is not known whether the General will come here or not. It is also presumed that the report made by Lieutenant Stottler will probably satisfy the War Department of the cause of the trouble, and their action will be based on his report. Agent Shipley returned to the agency Thursday.

Last Tuesday Harry Fulton received from Foster Bros., Monterey, Mich., a thoroughbred Shropshire ram. This breed of sheep is well known in England for their wool-producing qualities, and are considered as the best for mutton by our English cousins. In this country, however, a cross between the Shropshire and Merino breeds is considered by sheepraisers the one which makes the best and most profitable breed, and it is for this purpose that Mr. Fulton made his recent purchase. This ram is bred from Excelsior, and has a pedigree as long as the flag staff after which our town is named.

On account of the coal strike at Gallup and the great depression in business, the A. & P. road has declined to haul the special coaches of the Editorial Association of Southern California to Flagstaff as requested by them. Their request was for a special to be side-tracked at Flagstaff during their stay there, which under existing circumstances would be almost impossible. To attach their coaches to a regular train would make it too heavy to haul, and so the company had reluctantly to decline. We presume now, the next meeting will necessarily be held on the coast somewhere.—Needles Eye.

EARTHQUAKE AT YUMA.

Thursday morning the inhabitants of Yuma were aroused by three distinct earthquake shocks, the severest felt since the town was settled, says the Sentinel. The first at 6:05 o'clock came in three undulating waves from the northwest to the southeast, the earth's crust raising and rolling so as

to be perceptibly felt by those standing or sitting. The shock caused the windows and blinds to rattle, crockery and glassware to jingle, doors to swing on their hinges, walls to creak and crack, and things generally to move about promiscuously. Men, women and children arose without calling and ran into the streets, yards and gardens, without going through the operation of preparing or finishing their toilets. Never in Yuma did so many people get up and out so promptly. Clocks were stopped, and for a moment it seemed as if there was to be a general change in things terrestrial. At 6:08 the second shock came, sharp and decisive, but not with the force of the first. Three minutes later, at 6:11 o'clock, the last shock was felt. The vibrations continued between the shocks so that glasses, crockery and tinware and window shutters kept up their rattle and clatter. The safe door at the S. P. Hotel, which had just been opened, was closed. No particular damage was done, though the cracks in the walls of adobe and brick buildings caused by it are to be plainly seen. The grating roar as it came from the mountains to the eastward was plainly heard.

IRRIGATION CONVENTION.

The most important movement for the reclamation of arid lands that has ever been made in the west is now on foot in the convening of an irrigation convention at Salt Lake for September 15, 16 and 17. The object of the convention is to take steps to induce the government to cede all arid lands to the states and territories within which they are situated, to be reclaimed and used for public schools and other public purposes.
