GUXLEY STREET, PRESCOTT, ARIZ

Unfailing Specific for Liver Disease.

SYMPTOMS: Bitter or bad taste in
white or covered with a brown tinge; pain in
the back, sides, or joints—often mistaken
for Rheumatism; sour stomach; loss of
appetite; sometimes nausea and water-
brash, or indigestion; flatulency and acid
eructations; bowels alternately consti-
pated and lax; headache; loss of memory, with
a painful sensation of having failed to do
something which ought to have been done;
debility; low spirits; a thick, yellow ap-
pearance of the skin and eyes; a dry
cough; fever; restlessness; the urine is
faint and high colored, and, if allowed to
stand, deposits a sediment.

SIMMONS' LIVER REGULATOR

(PURELY VEGETABLE)
Is generally used in the South to arrest
the Torpid Liver to a healthy action.
It acts with extraordinary efficacy on the

LIVER, KIDNEYS, AND BOWELS.

AN EFFECTUAL REMEDY FOR
Malaria, Bowel Complaints,
Dyspepsia, Sick Headache,
Biliousness, Indigestion,
Kidney Affections, Jaundice,
Menstrual Depression, Colic,
Edema, etc.

Endorsed by the use of 7 MILLIONS of BOTTLES, as
THE BEST FAMILY MEDICINE
for Children, for Adults, and for the Aged.

ONLY GENUINE
has our Z Stamp in red on front of Wrapper.

J. H. ZOLLIN & Co., Philadelphia, Pa.,
SOLE PROPRIETORS. Price, \$1.00.

STOCK NOTES.

The Denver cattle Convention will
meet on February 8th.

The beef blockade in west Texas
has been broken at last.

Inoculation for pleuro-pneumonia
is found to be a mistake.

A flock of 1800 Tom Green county
wethers have just been sold for \$250.

The ranges of northern Arizona
were never in better condition than
at present.

The joy seems to be universal among
stock men at the opening of the St.
Louis stock yards.

Pinkeye has assumed an epidemic
and bad form among the horses at
Buffalo, N. Y.

The drive of Texas cattle to the
northern states and territories for '86,
is estimated at 225,000.

Arizona should be well represented
at the meeting of the International
Range Association at Denver.

The Argentine Republic is said to
furnish 1,500,000 cattle annually, as
frozen meat, for European markets.

Cattle and sheep that are in good
condition, will fall through the winter
with a very small percentage of loss.

The Raton Comet will hereafter be
known as the Raton Ranger and will
be devoted largely to stock interests.

Contagious pleuro-pneumonia has
cost England in loss of cattle \$100,-
000,000, and Australia \$400,000,000.

Cattle in northern Arizona are in
prime condition and the prospects for
good prices in the spring are flatter-
ing.

There will be probably the largest
gathering of stock men at Denver
ever known in the history of the range
country.

About 6,000 Norman-Percherons
have been imported into the United
States of which over 1,000 were im-
ported in 1886.

Sheep men will have lots of good
wool to sell this year. San Francisco
will have the handling of a large per-
centage from this section.

James E. Dryden, of Troy, Kansas,
a well known stockman, was last week
struck by an engine on the Chicago,
Kansas and Nebraska R. R., and killed.

From 14,000 to 15,000 head of hor-
ses pass through the hands of I. H.
Dahlman, of New York, each year.
He is the largest buyer of horses in
this country.

Trains on the Northern Pacific are
killing so many cattle that the range
men are considering the advisability
of putting on track riders.—Bad
Lands Co. Boy.

The Drovers' Journal, of Chicago,
says that Armour, the beef monopoli-
st, slaughters on an average 2,000
head of cattle a day, or over 700,000
a year, which is about two thirds of
the product of the plains.

Senator Stanford, of California, has
more money invested in horseflesh
than any other man in the world, says
an exchange. His last year's sales
amounted to over \$300,000. His car-
riage horses are worth \$5,000 each.

A colt once strayed never fully re-
covers from the effects. It is quite
necessary then that colts be kept
steadily growing during the winter,
even if it does require special care and
attention to do it.

The Texas Land and Cattle com-
pany is a big concern. Their Laureles
ranch in Nueces county contains 276,-
690 acres and the Horse-Shoe in
Hemphill county, 332,928 acres. In
1885 this company owned 106,322
head of horses, mules and cattle.

Mr. Glenn Reynolds, superintend-
ent of the Reynolds Land and Cattle
company in Arizona, left Holbrook
last week for the Tonto Basin to look
after the company's interest in that
locality. He will be gone about a
month.

The dressed meat syndicate at Chi-
cago talks about a glut of thin range
cattle during the season just closed.
Thin to whom? Why only to the sell-
er and fat after purchased. The story
belongs to the thin species itself.
Range stockmen see through its thin
covering.

An epidemic of hog cholera in our
country would be a terrible calamity,
and a cruel war in Europe would break
our hearts quite, but excuse these
steers—neither would hurt the price
of beef any, and cowmen are mighty
hard up just now.—Stockmen Jour-
nal.

A rise of ten cents per hundred
pounds on a million cattle amounts to
\$1,000,000 per year. Should it be
twenty cents the increase in value
would foot up \$2,000,000. The ad-
vocates of stock yards at St. Louis ex-
pect some such result to the cattle in-
terests of the country.—Stock Grow-
er.

The total receipts of cattle at the
Union stock yards, Chicago, during
1886 was 1,963,900 head, of which
1,259,225 were utilized for city use
and Chicago packing, and 704,975
were shipped abroad. The total valua-
tion of all kinds of stock handled
in the Union stock yards during 1886
was \$166,741,754.

The Comanche Land and Cattle
company of St. Louis, has brought
suit against Dr. J. D. Hopkins, terri-
torial veterinarian of Wyoming, for
\$2,500 damage resulting from an al-
leged unnecessary detention of cattle
subject to inspection at this point.
The suit, it appears, is brought against
Dr. Hopkins personally and has no
bearing upon the validity of Wyo-
ming's quarantine laws. The trial is
set to occur at Kansas City this week.
—North Western Journal.

The work on the new city stock
yards is progressing satisfactorily, and
the establishment will blow in about
the first of February. Goulding &
Co., the lessees, have just received ap-
plication from Jesse Harris, the Cleve-
land bay importer of Fort Collins, for
twenty box stalls in the big horse ca-
ravan that is being constructed in
connection with the yards. This
means that Mr. Harris proposes to
make his sale headquarters in Denver.
—Denver Field and Farm.

A sensation was caused at Painted
Woods, Dakota, sixteen miles north
of Bismarck, the other evening by the
appearance of a herd of buffaloes stamp-
ing before the storm. This is the
first herd of buffaloes seen in that
country for over two years, and they
must have been driven over 100 miles
by the storm. They were going in a
south-westerly direction and crossed
the Missouri river about five miles
north of Bismarck. It is estimated
that the herd numbered over 300, and
many of the animals were exhausted.
—Nebraska State Journal.

Mr. J. C. Hill, of New Kiowa,
Kansas, says that the great desire of
cattlemen in his section of country,
and all through Texas, New Mexico
and Colorado was to see large stock
yards established in St. Louis. No
one but a cattlemen could realize the
disadvantage of having the stock yards
east of the river. The cattle were ut-
terly worn out when they reached St.
Louis and were then subjected to a de-
lay of from three to six hours, when
in a condition least able to endure it;
and the delay was not the only thing,
as at the terminus of the Western road
cars were switched to and fro for
hours at a time, shaking and bruising
the weary cattle terribly, and immedi-
ately after this came the trip through
the tunnel, trilling enough under or-
dinary conditions, but in many cases
fatal to cattle that had endured the
long trip from the Western ranges.
Fully half the losses incurred by ship-
pers, Mr. Hill said, was met with be-
tween the western city limits and the
East St. Louis yards. Then the charge
of \$5 per car levied by the
bridge company was also a loss. But
this condition of affairs, he said,
would soon come to an end. Those
largely interested in cattle had taken
the matter up, and when Mr. Hill
could go into particulars, he said that
there was now no doubt whatever that
stock yards would be established west
of the river, and would be in full op-
eration by the middle of next June, in
time to receive the next season's ship-
ment of beef. Work will be com-
menced at least by spring. These
stock yards, he said, will enable St.
Louis to control the entire South-
western and much of the Western cat-
tle trade, besides probably giving rise
before long to large canning houses.
Mr. Hill said that the prospects of the
cattle trade in his part of the country
were far better than they had been
for several years, as the grass was ex-
cellent and the cattle stronger and
better able to stand the winter than
they had been for several seasons.—
Range Journal.

Our Daily Bread.

Heavy and sour bread or biscuit
have a vast influence through the di-
gestive organs upon the measure of
health we enjoy. How important to
our present happiness and future use-

fulness the blessing of good health
and a sound constitution are, we can
only realize when we have lost them,
and when it is too late to repair the
damage. And yet, notwithstanding
these facts, thousands of persons daily
jeopardize not only their health, but
their lives, and the healths and lives
of others, by using articles in the
preparation of their food the purity
and healthfulness of which they know
nothing. Perhaps a few cents may
have been saved, or it may have been
more convenient to obtain the articles
used, and the housekeeper takes the
responsibility and possibly will never
know the mischief that has been
wrought. Paterfamilias may have
spells of headache, Johnny may have
lost his appetite, Susie may look pale;
if so, the true cause is rarely suspec-
ted. The weathers, the lack of out-
door air, or some other cause, is given,
and the unwholesome, poisonous
system of adulterated food goes on.
Next to the flour, which should be
made of good, round wheat and not
be ground too fine, the yeast or bak-
ing powder, which furnishes the ris-
ing properties, is of the greatest im-
portance, and of the two we prefer
baking powder, and always use the
Royal, as we thereby retain the origi-
nal properties of the wheat, no fer-
mentation taking place. The action
of the Royal Baking Powder upon the
dough is simply to swell it and form
little cells through every part. These
cells are filled with carbonic acid gas,
which passes off during the process of
baking.

The Royal is made from pure grape
acid, and it is the action of this acid
upon highly carbonized bicarbonate
of soda that generates the gas alluded
to; and these ingredients are so pure
and so perfectly fitted, tested and
adapted to each other, that the action
is safe and permanent, and is contin-
ued during the whole time of baking,
and no residue of poisonous ingredi-
ents remains to undermine the health,
no heavy biscuits, no sour bread, but
if directions are followed, every arti-
cle prepared with the Royal Baking
Powder will be found sweet and whole-
some.

Mr. Geo. Eddy, son of Col. J. W.
Eddy, has a letter in the Aurora Be-
acon of Aurora, Illinois, in which Flag-
staff is spoken of as follows: "It ex-
ists on its natural advantages, having
the finest country on the whole A. &
P. tributary to it; and not even a dis-
astrous fire as the business portion
passed through last year can pinch out
its merchants, but they build better
than ever. P. J. Brannen alone has
paid \$100,000 in freight to the A. &
P., and yet the depot here is nothing
but three box cars, while I saw on the
Mojave desert in southern California,
at a station called Fenner, as large a
depot as the one at Englewood. I
write all this to show the disadvan-
tages Flagstaff has gone through in its
growth and still stands at the head of
the list, and with a larger business and
a better country surrounding than any
other town between Albuquerque and
San Bernardino; while with reason-
able help by the railroad it might have
been a place of 5,000 or so and the
emporium of northern Arizona. Well,
now the A. & P. people have awak-
ened themselves and intend to make
up for lost time, and will now build
the finest passenger depot between
Kansas City and Los Angeles, a good
freight house, a repair shop, a round
house, large stock yards, help to build
waterworks, and give the place a
boom.

What True Merit Will Do.

The unprecedented sale of Boschee's
German Syrup within a few years, has
astonished the world. It is without
doubt the safest and best remedy ever
discovered for the speedy and effect-
ual cure of Coughs, Colds, and the
severest Lung troubles. It acts on an
entirely different principle from the
usual prescriptions given by Physi-
cians, as it does not dry up a Cough
and leave the disease still in the sys-
tem, but on the contrary removes the
cause of the trouble, heals the parts
affected and leaves them in a purely
healthy condition. A bottle kept in
the house for use when the diseases
make their appearance, will save doc-
tor's bills and a long spell of serious
illness. A trial will convince you of
these facts. It is positively sold by all
druggists and general dealers in the
land. Price, 75 cents, large bot-
tles. cow
