

BY AUTHORITY.

OFFICE BOARD OF HEALTH, Honolulu, Jan. 20, 1888.

At a meeting of the Board of Health held this day the following resolutions were adopted:

Whereas the City of San Francisco has been officially declared by the proper authorities to be infected with an epidemic of smallpox, and the latest reports from said city are to the effect that the smallpox is there increasing:

Now, therefore in pursuance with regulation 15 of the Quarantine Regulations adopted by the Board of Health, October 17th, 1883, be it resolved:

1st. That until further notice, all vessels arriving from San Francisco, less than 18 days out, not having the smallpox on board, together with their passengers and crews, shall be placed in quarantine, in the outer roadstead, or in the stream in the harbor, as may be ordered by the Port Physician, for a term of 18 days from the date of leaving San Francisco.

2nd. No passengers for ports other than Honolulu shall be allowed to land.

3rd. All passengers for Honolulu shall remain in quarantine for a term of 18 days from the date of leaving San Francisco.

The place of quarantine shall be at the quarantine station, or such other place as may be designated by the Board of Health.

The vessel may, upon the written consent of the Port Physician be allowed to come to an enclosed wharf for discharge of cargo.

No person shall be admitted to the wharf except upon the written permit of the Board of Health.

Special attention is called to Sections 15 and 16 of the Quarantine Regulations, adopted October 17, 1883. Here under appended:

15. On the arrival of a vessel at any port of this kingdom, coming from a port known to be infected with cholera, yellow fever, smallpox, scarlet fever, or any other contagious or infectious disease, although no case of such disease may have broken out on board during the voyage, no person shall be allowed to land from her unless a period of eighteen days shall have elapsed from the time of her leaving said infected port.

16. On the arrival of a vessel at any port of this kingdom which has, or has had on board during the voyage, any person sick of cholera, yellow fever, smallpox, scarlet fever, or any other contagious or infectious disease, the sick persons (if passengers for that port), shall be sent to the nearest quarantine hospital for such a period as may be deemed necessary, and the vessel, with all on board, shall undergo quarantine, if necessary, for a period of eighteen days, as the Board of Health may direct, after hearing the report of the Port Physician on the said vessel.

But with regard to all sick persons other than passengers for that port, the Board of Health will not consider itself bound to receive them or to take care of them in quarantine unless the interests of humanity may require exception to be made.

WHERE IS THE GARBAGE CART?

While the Board of Health is busy perfecting the sanitation of the city, one point needs careful attention, the collecting regularly of the garbage, now often left for days together to spoil and taint the air. Where is the cart, and the bell man to warn careful or careless housekeepers, that they must be ready when the city dump-cart goes its rounds?

QUARANTINE.

The resolve of the Board of Health to quarantine vessels from San Francisco, where smallpox is declared by its own health authorities to be epidemic, is regarded with approval by some and with disapproval by others. Persons simply looking at the matter in its bearing upon trade and commerce will naturally be dissatisfied. But the health of the people is above all other considerations, and it is the duty of the Board to subordinate every interest to the preservation of the nation from the smallpox malady.

It is better that trade and commerce should suffer awhile than allow the importation of so frightful and destructive a disease. Past experience has taught us something of its dreadfulness. Surely we have not so far forgotten its ravages of six or seven years ago, as to need a repetition of the lesson in order to induce us to use our utmost endeavors to prevent its re-introduction. We should all be willing, indeed, anxious, to adopt the most stringent measures to prevent a recurrence of the past in this regard. Nobody wishes to see smallpox here again. Therefore nobody should object to every possible precaution being used to keep it away.

It is to be hoped that the Board of Health will be equal to the emergency, and fearlessly perform its duty.

WHY NOT SETTLE THE VETO QUESTION?

How about the so-called veto question? We were hopeful of seeing it definitely settled either one way or the other ere this; but it still remains where it was. We understand the Governor of Maui, Mr. R. H. Baker, has declined to give up the books of his office and vacate his position, in obedience to an order issued under the abolition of governors Act, one of the measures of the Legislature which was returned to the House unsigned by the King, and was declared law without either the royal signature or reconsideration of the Legislature.

Why is not Mr. Baker compelled to comply with the order and vacate his office? Either the office of governor is abolished or it still remains. Either the Legislative enactment aiming at abolition is law, or it is not law. If it complies with the requirements of the Constitution, it is law; if it does not conform to the Constitution, it is not law. The point must be decided by the Supreme Court. Here in the case of the Governor of Maui is an oppor-

tunity of bringing the matter properly before the Court, and having the question settled. Why is it not done? It is very unsatisfactory to have placed on our statute books enactments concerning which there are grave doubts of their validity. It is far better to decide the controverted point and end the uncertainty.
