MICRONESIA.

Arrival of Missionary Packet Morning Star.

There was a large attendance at the Boretania street Armory on Saturday evening for the tug-of-war tournament. Much excitement centered in the initial pull, which was between the boys of Erin and the redoubtable Hawaiians.

The teams were pretty evenly matched on that score. The teams as they entered were greeted with cheers. The Irish wore a confident look and settled down among the cleats without much ceremony.

The Hawaiians took their places and at 8:14 the referee's pistol cracked. The Irishmen were caught on the jump and the hemp traveled forth toward Hawaiian dominion.

The ribbon hung at the 3 1/2 feet notch a second when it moved again and within 6 inches of the six-foot limit it stopped again, but tug as the Irish would they could not hold it there long, and the red knot crossed the limit. Time, 21 minutes. The cheering was deafening. Captain Kela and his team gave three cheers for Ireland.

America and Germany entered for the next pull. The teams were substantially the same as at previous matches. The Germans took the end vacated by the Irish, and the Americans the Hawaiian end. At 8:26 the start was made and at the half-hour the ribbon hung 4 1/2 feet in favor of the Teutons. A minute later the pistol cracked a victory for Germany. Time, 5 minutes.

Japan and Portugal entered a few minutes later for the next exhibition of hugging the rope. Portugal got down to work at the start, and before the little fellows knew it the rope slipped through their hands. Time, 1 minute 44 seconds.

The Hawaiians and Portuguese are even for first place so far.

The missionary steam packet Morning Star, in command of Captain Garland, steamed into port this morning and anchored in the stream, 47 days from Kusae in the Marshall Islands. The Morning Star left here on June 18 for Butaritari, arriving there on July 5. Left two days later for Kusae, arriving on July 12; sailed July 16 for Mokiel, Ponape and Ruk islands; arrived at Mokiel on the 18th and left a day later; arrived at Ponape on the 20th, made the island of Natiek on the 23rd and Ruk on the 25th. Left on the 26th for Ponape, arriving August 4. Left on the 9th for Mokiel, arriving August 12. Left the same day for Kusae, making it on the 19th. August 24 sailed for Jaluit, arriving on September 2. Cruised around the islands, touching at Plesant and Ocean islands. Not a single trace of the trees planted there some time ago were seen. The Hawaiian Government had disappeared and there was evidence that no rain had visited it for thirteen months.

The steamer, engaged all this time in conveying missionaries from island to island, arrived at Kusae again on October 8th, and left on the 26th. Made a tour of the Gilbert Islands and returned to Kusae on Dec. 21. The Morning Star touched at Kusae four times in all. On Dec. 30 touched again at the islands mentioned, then made for the Caroline Islands, touching at Ruk on the return on Jan. 16, and leaving four days later sailed for Kusae, arriving on Feb. 3rd, and landed all the missionaries in safety. Left Kusae on Feb. 9 for Honolulu and had contrary and baffling head winds throughout the voyage. Encountered the prevailing northerly guster yesterday at noon in 23° 30' N. 156° W.

The Morning Star sailed and steamed over 18,000 miles, and the heaviest day's run was 210 miles.

During the entire cruise throughout the islands the steamer did not touch a reef, and with the exception of the machinery breaking down six or seven times, nothing unusual happened to the vessel. The breakdown in the machinery caused some delay, but nevertheless the steamer arrived in port nearly three months ahead of time, as she was given twelve months to complete the cruise. The Morning Star touched at no less than 33 islands—15 in the Marshalls, 11 in the Gilberts and 7 in the Carolines—touching at some twice and at Kusae four times. The weather throughout the islands was the most tempestuous and squally encountered for some time.

When the missionary packet left, the Ponapeans were still at war with the Spanish and several murders had been committed. In one instance three Spaniards deserted from the Spanish settlement and went over to the Ponapeans. They were taken in by a native and allowed to live with his family for two months. One night the Spaniards foully murdered the whole native family with which they were living and escaped back to the Spanish settlement.

The natives harbored revenge and irritated the Spaniards every chance they got. One day after the atrocious massacre three Spaniards went over to the Ponapean side to do some washing. While they were at the riverside the natives swooped down on them and cut them to pieces. The three innocent men suffered for the deserters' crime.

The Spanish man-of-war San Juan was lying at Ponape, and was the only warship there.

The Germans opposed the cruising of the missionary packet Morning Star through the Marshall Islands. The natives in the Marshall Islands were very hostile to the Germans.

Prior to the steamer's arrival at Jaluit the German warship Olga had just left. The native chiefs have sworn deadly enmity to the Germans.

At Ruk the natives were fighting among themselves and several encounters resulting in bloodshed had taken place.

Among the passengers who came by the Morning Star are the Misses Fletcher, Little and Kinney, teachers of the Ponapean Mission. Captain Mellander, late owner of the schooner Charles Wilson, is also a passenger. He comes to secure the purchase of a new boat, his old one having been sold to a German trading company at Jaluit.

Mrs. Garland, wife of the captain, stayed at Kusae, and did not accompany her husband.

The schooner Hiram Bingham arrived at Butaritari in October last, but had not since been heard of.

Mr. and Mrs. Hugh Morrison and Mrs. and Miss Center of Makaweli, Kauai, are going on the grand tour of America and Europe. They were given a farewell ball at Makaweli by the bachelors of the plantation.

SCRIVEN'S

Patent Elastic Seam Drawers!

We want to call the attention of our patrons to a novelty which, from the favor it has been received with, we believe has come to stay and become an indispensable article of gent's furnishing.

A glance at the cut above will show at once the superiority of goods made in this manner over those heretofore in vogue.

SCRIVEN'S PATENT ELASTIC SEAM DRAWERS are provided with an improvement consisting of an ELASTIC INSERTION at the inner and outer seams, which gives elasticity in movement and comfort in fit.

The drawers are cut in figure outlines and afford the wearer all the advantages of knit goods, while retaining the superior comfort of woven fabric.

The PATENT ELASTIC SEAM, which CONTAINS NO RUBBER, retains its springiness and wears longer than the other portion of the garment. It makes the drawers conform to the position of the wearer and avoids any strain, no matter what attitude the body assumes.

It will also be found that these PATENT ELASTIC SEAM DRAWERS are equally well adapted to all athletic positions and allow the greatest freedom and ease of motion. In the position assumed in the cut, not the least tension is produced on the main portion of the goods, while the elastic seams allow the transformation of the figure as seen in the position, which would be impossible in others without producing great strain on the goods and friction upon the person.

We have now a complete stock of these goods in all sizes, and can recommend those made of the material known as "JEAN" to be the coolest and best adapted for those persons who do not care to wear woolen fabrics.

They say that there is "nothing new under the sun," but the fellow who said that was all wrong. He forgot "Gent's Furnishings," they're always making something new in that line.

The latest yet, we have just received samples of, from the manufacturers. It consists of Gauze, Balbriggan, or Silk Under Garments with WOOL skillfully woven into the breast and back to protect the most vital parts of the body from cold or chill. To the many people who cannot wear all wool goods on account of the irritation sometimes felt, these goods will be a great boon, as, while they will have the advantage of wearing cotton fabric, the lungs and back will have a nice warm covering of wool. From the many sentiments of approval we have heard regarding these goods we believe them to be a good thing for our climate, and have placed our orders for a full stock, which will be on sale in about two months.

To any person desiring to see the samples which we have we will be pleased to show them.
