OBSERVATIONS.

Municipal suffrage for women received a setback at the recent elections in Massachusetts, where women voted on the question as men. The friends of the movement point to an increase in their vote, although the majority is heavily against them, as a source of fresh encouragement. On the other hand, the Man Suffrage Association are particularly pleased with the majority of 77,000, estimating that in the vote for woman suffrage of 107,000 at least 15,000 votes were cast by women. It is recalled that the defeat of the prohibitory constitutional amendment, at a special election in 1889, by about 40,000 had the effect of preventing any further agitation on that line.

According to the New York Sun a number of leading Republicans have determined that no matter what member of the party is elected President, he shall not have absolute control of his administration as Presidents have had in the past, but shall be surrounded by a Cabinet composed of men eminent in the party, competent for their places, having absolute control of their departments and being responsible for them. Such an innovation as this would prove that there is a quality of expansion in the United States constitution besides what it has displayed under judicial construction.

One result of the cholera scare from Honolulu was to set the health authorities at San Francisco to scrutinize the sanitary conditions of the latter city. That this was needed is shown by the report of the plumbing inspector on hospitals, etc. He found that some of these were not fit for the reception of sick animals let alone human beings.

In an editorial on the Marlborough-Vanderbilt wedding, the London Daily News says: "This pomp of rank and wealth comes at the right time to unite the two nations in the ties of common worship after the estrangement of the yacht races." Yacht races, by Jove!

Suits on sugar bounty claims have been filed in the Circuit Court at New Orleans, under an agreement with the Washington authorities, who will aid in a speedy trial and appeal to the Supreme Court. There is a prospect of the early settlement of the bounty question, which has a reflex interest for the sugar exporters of these islands, as the tenure of the sugar duties may depend on whether the bounty stands or falls.

Five more Vegetarians beheaded as leaders of a massacre of missionaries in China is an item of the latest mail news. Arrests on the same account continue to be made at Kueheng. After a while foreigners may be allowed to live in China without molestation or constant fear of their lives.

By a popular vote the Torrens land bill has been carried by large majorities in Chicago and the country districts of Illinois. This is the system of land transfer now under discussion for Hawaii.

Robert Louis Stevenson's pleadings with his English friend to meet him in Hawaii, mentioned in the notice of "Vailima Letters" in this issue, constitute a rare advertisement for tourist travel this way.

Honolulu has been declared a clean port by the San Francisco authorities, the steamer Australia having been the last vessel to be subjected to quarantine. The large passenger list of that vessel on her latest trip hither shows the result. There is welcome for more shiploads of good people.

Through mishearing of information J. Doherty was represented in yesterday's issue as being found guilty of opium in possession. The verdict was "not guilty," and regret for the error is hereby expressed.

E. C. Macfarlane and H. P. Baldwin, answering San Francisco reporters, both ridiculed the story about the ex-Queen's buying of estates in Italy. It is a pity there were not always people on hand to squelch false reports about Hawaii.

Here is an incident that ought to go as far in the way of cement between the two great English-speaking nations as the Marlborough-Vanderbilt wedding: Lord Ryleigh and Professor William Ramsey called at the United States Embassy in London on the 7th inst. and James Roosevelt, the secretary of the Embassy, presented them with a check for \$10,000 which the Smithsonian Institute had awarded as the first Hodgkin prize for their paper on argon, the new element discovered by them.

Leading Democrats of Alabama are considering whether they had not better drop the free silver issue and turn their attention to reuniting the party for the coming contest. It is feared that further agitation of the currency question inside the party might bring on a pronounced split and the loss of the State to the Democracy. Similar reflections may influence the party in other States, so that the silver part of the cargo will be jettisoned to save the ship. Whether Cleveland runs for a third term or not, it must be his policy or nothing on which the Democrats can have a ghost of a chance.

Hawaii seems always to be placed in the position of the one sheep that went astray by not-taking moralists from abroad. They express their interest in

Hawaii's condition as if this was the last spot on the earth awaiting its share in the universal regeneration that has been looked forward to for ages. The rest of the world, it is to be presumed, constitute the ninety and nine that need no attention. Comparative statistics, along with an accounting of the probably unequalled diversity of nationalities according to population here, would, however, show that few parts of the world are less "the abode of horrid cruelty" than is said to be the characteristic of the "dark places of the earth." Even the heathen inhabitants of Hawaii, of different races, can lay claim to being the possessors, remarkably, of the traits of hospitality and benevolence.

An inspection of the streets in rainy weather would show a good many places where an erratic grade permits water to lie in deep pools until it evaporates. This is one of the sanitary faults of the city which should be remedied with the least possible delay.

Alex. Young's Reception.

The committee of employes of the Honolulu Iron Works which has the matter of the reception of Alexander Young in hand have decided that the affair shall take place on Saturday. There will be a reception, speech making and collation in town in the afternoon, for which James Steiner is to be the caterer, and afterwards the employes and their families will adjourn to the Saratoga resort at Waikiki; where the evening will be spent in music, dancing and singing. Messrs. Reid and Currier are making extra preparations for the proper entertainment of the guests on Saturday evening.

Timely Topics

The able address by Mrs. Sturtevant-Peet, president of the California Woman's Christian Temperance Union, on the occasion of the annual convention of that body in San Francisco, contained a passage which takes strong ground on the benefits of the bicycle. In speaking of physical culture and the relation of the clothes to the subject, she said:

"All know the value of a strong unhindered body. For this reason the banishment of the corset and restricting bands is a foregone conclusion. * * * Dress reform has pressed its claims for forty years, with little progress till the bicycle, that graceful, silent steed of motion, dashes through and bursts open the door of prejudice. This mystic wheel that we meet on every road and street is the mute but telling advocate of dress reform. * * * It has its virtues as well as its charms. It invites, yea, demands, simplicity in dress. It encourages physical exercise and utterly refuses to carry a drunken rider. Unlike the horse, it balks when touched by the hand of inebriety. It inconveniences and discourages the use of cigars and cigarettes to the number of 65,000,000 a year. In short, the wheel is a reformer, and, though, it came not through the virtue of moral conception, we should welcome its presence as we do the advent of every new invention and corporate edict bearing the balm of sobriety, with the promise of stronger and better men and women."

This is a straightforward expression from an able woman who led the California forces of one of the greatest National organizations ever instituted for the uplifting of the race. The dignity and earnestness which characterize her opinion cast into the shades the hallow objections which some physicians have made to the bicycle. Mrs. Peet gives us to understand that in the sole aspect of requiring women to dress sensibly this simple instrument of locomotion has accomplished more at a dash than the preachers on sensible dress for women have been able to bring about in nearly half a century. With so eminent an indorsement as this, even the most timid woman who is not held in what amounts to physical restraint by father, husband or brother from obeying an instinctive impulse to dress rationally and enjoy life and health on a bicycle, may at least console herself with the inflection that her impulse was right and lament that she was born a few years too soon.

In addition to the above Mrs. Peet might have mentioned the saving in labor attained by the patent sprocket attached to the Tribune wheel, which amounts to over 15 per cent, no small desideratum when ladies are concerned.

The Tribune is the wheel par excellence for ladies' use, it has the newest patents and improvements and can be run with 15 per cent less work than any other wheel in existence.
