# EVENING BULLETIN

3:30 EDITION

New results are created by new advertising---The Bulletin has the readers

A trip to the Volcano at the present time furnishes a rare treat that will remain catalogued under the head of "Life Memories."  
 For twenty-five yearly daily subscriptions to the Evening Bulletin the trip may be taken at BULLETIN expense.

VOL. X. NO. 4040

HONOLULU, TERRITORY OF HAWAII, MONDAY, JUNE 29, 1908

PRICE 5 CENTS

"There is one point regarding which I am clear---that you must positively get European labor in the Islands either directly or through the United States"--Secy. Garfield.

## FLEET SHIPS HAVE STARTED

## Land Laws Need Change And Garfield Will Help

Secretary Reviews His Trip and Hawaii's Needs

Secretary of the Interior Garfield stopped a few moments this morning to give an interview to the Bulletin, in which he reviewed the pleasures of his trip and stated some of his conclusions. He said:

"It is difficult for me to summarize the results of my tour here. I have the material at hand, and will have it with me when I return to Washington that will be the basis for all my future work for the Islands. Matters that have interested me the most and with which I have been occupied the most during my stay here are land and the use put to it, the diversity of agricultural products, and the possible extension of the use of land for purposes other than the raising of sugar.

"Regarding transportation, there is an undeniable need of an increase in the harbor facilities, for, if the increase in the agricultural products of these islands is in proportion with her growth in other lines, it will not be very long before there will be positively required more harbor room in order that the crops here may be shipped to the world's markets. The development of harbors here by the Federal Government, working together with the Territorial Government, is a matter that is of immediate concern, and will be given due attention.

"The irrigation problems here are of great interest. They show--those that have been solved--what has been done and what can be done with water, and they show the possibility of a vast increase in the arable acreage of land, and the opportunity for a greater variety of crops.

"In this irrigation and reclamation proposition, Mr. Newell may come here. In fact, I will take the matter up with him immediately upon my return to the States, but as it has not yet been settled as to whether I will be allowed the use of the funds appropriated for this purpose on the mainland, I can speak with no absolute assurance yet. As I have said before, the law governing the use of this money limits it to the States, excluding the Territories. I believe this is wrong, and I am working along lines now that will probably give me the right to expend it on the Territories as well as the States.

"I emphasized the statement be-

fore, and I wish to do so again, that it is my wish that the island Territories be placed on the same basis throughout as are the Territories, and to some extent the States, on the mainland.

"I want matters so arranged that every Federal power may be brought to co-operate with Territorial government.

"Land laws in Hawaii cannot be compared with those of the United States. Conditions are different here, and to every condition must a law be adapted, which, if applied elsewhere, would probably prove entirely unsuitable. For this reason, and on account of the fact that I have hardly had time to look far enough into the situation, I dislike to make any positive statement.

"However, I am perfectly clear on the point that there are some modifications required in the land laws here--but to slap the land laws of the United States upon the Territory of Hawaii would not only be manifestly unfair, but it would also be a very unwise move.

"They are not applicable to either the land or the land laws here. There will be time for this matter to be taken up before the next session of Congress, and the Governor and staff, as well as those outside, will have an opportunity to prepare statistics to send to Washington which will bear upon the local situation.

"I was immensely pleased with the Kalahoe homestead lands which I visited on the Island of Kauai.

"They have good water there, and they are making a great success of their undertaking. It is useless to attempt homesteading on land that is unsuitable for cultivation. The basis for success in homesteading experimenting is Good Land and Good Water.

"I have been immensely pleased with the way educational matters have been carried on here. There is the basis for an elementary education, and an excellent opportunity for a higher education. Difficult problems face the educators in these Islands, and it seems to me that they have been solved in a very satisfactory manner indeed.

"The labor question is one to which I have given a great deal of attention, regardless of the fact that it is not in my department. Data

that I have obtained will be turned over to the Secretary of the Department of Commerce and Labor for his edification, and I know that he will give it the utmost consideration.

"There is one point regarding which I am clear--that you must positively get in European labor in the Islands, either directly or through the United States.

"I cannot express in words my appreciation of the treatment that has been accorded me while I have been in the Islands. Always have I found the open door, ready and cordial hospitality, and the desire to assist me that has made my trip here such a success, and I feel that the best manner in which I can show my deep appreciation is by results which will come afterwards.

"Hawaii is a beauty spot, and I hope that it will not be long before I shall be able to come here again. I shall be in the Western States looking up the matters of importance to my department for several months before my return to Washington."

## Chinese Are Liberal

The Fleet Committee meeting this noon was short and sweet, the program not being completed as previously expected.

The Ways and Means Committee reported that the Chinese section of the town had contributed \$812 towards the Fleet fund. Thanks was extended through the press.

Decorations of the committee headquarters will cost \$150 and it was appropriated.

Mr. Smith read a letter from W. R. Farrington, who stated that as the Fleet Committee did not seem disposed to support the idea of a dinner to the press correspondents, he, on behalf of the Commercial Club, requested an evening to be set on the program when the Commercial Club might entertain the newspaper visitors. The committee named Wednesday, the 22nd as the evening for the Commercial Club event.

With the singing of the Hon. L. P. R. Isenberg as the principal feature, a successful concert was given on Thursday evening, June 25, in Charles R. Bishop Hall, by the Oahu College chorus. R. Rudland Bode was in charge of the affair.

Senator James M. Dowsett is the Hawaii representative on the committee to notify Mr. Sherman of his nomination as Vice President.

## Tenyo Maru Breaks Records To 'Frisco

At 7:30 o'clock this morning, the T. K. K. S. Tenyo Maru, on her maiden voyage, sporting to beat records to the Coast, arrived at San Francisco, 4 days 21 hours from this port, breaking all previous time which has been made over the same course. She actually travelled about 2100 miles. It was hoped when she sailed that she would cover the distance in 4 days and 8 hours.

This is at a rate of 17.9 knots per hour for the run up.

However, she smashed all records, the best for the run to the Coast being done by the China, with a little over 5 days. The Siberia once came down to this port, however, in less than 5 days, her time shaving that of the Tenyo for the trip up, but being in the opposite direction, with favorable winds.

The exact time of the China from Honolulu to San Francisco was 5 days and 2 hours; of the Siberia from San Francisco to Honolulu, 4 days and 19 hours.

## ST. LOUIS TO TRY FOR SPEED RECORD

The cruiser St. Louis went outside the harbor this morning preparatory to leaving for San Francisco this afternoon at 5 o'clock with Secretary Garfield aboard. She went out under her own steam.

A petty officer said yesterday that she will attempt in going to the

## SOUNDINGS BEGUN AT PEARL HARBOR

Work Starts Today--To Be Completed Next Month

In addition to the other work which has been rushed forward in such good shape at Pearl Harbor since Mr. Parks took charge of the work there, soundings were begun this morning. The crew which is on the work is partly green, and it is doubtful just how soon it can be completed, but this, with all the other work, will be put through as expeditiously as possible, and it is expected that it will be complete before the time when the Schroeder Board will sit here, during the stay of the big Fleet.

Cement is being shipped to Pearl City today. Borings are in progress, and it is now said that softer rock has been struck than was at first encountered.

The Fleet is coming. Let us clean up the City.

Coast to break even the records which the Tenyo Maru has established, only today, as she will make an attempt to steam 19 knots per hour through the whole of the trip. In case she does so, navy records will be badly smashed.

## BUNGLE MADE IN TOWING ST. LOUIS

A nice bungle was made in towing the St. Louis out of the harbor this morning. As the tug, the Iroquois, was laid up in the mud near the Channel wharf, and the St. Louis was thrown on her own resources.

When near the channel, the Iroquois ran into the mud bank. In attempting to get off, she got the tow line mixed up in her propeller, and was soon woefully tangled in the line. A steam launch had to be gotten out from the cruiser, and used to tow around the tug.

About noon today, divers were at work on the Iroquois, which was peacefully sitting in the mud, where she had gone aground.

This is hardly the first time when charges of bad towing have been made against the Iroquois, but this is the first time when she has been so thoroughly laid up after the trouble.

The Weekly Edition of the Evening Bulletin gives a complete summary of the news of the day.

## GARFIELD PLAYS STRENUOUS TENNIS

Won Game At Pacific Courts This Morning

Secretary Garfield, member of the "tennis cabinet," which has for some of its members no less distinguished men than President Roosevelt and the French Ambassador, played a little tennis this morning on the Pacific tennis courts, being on the winning side right through. He shows the effects of playing with the strenuous Executive, as he plays a strenuous game. He is decidedly good at it, too.

His first game was with Mrs. S. G. Wilder. The Secretary won by a score of 6-4.

A set of doubles was played, the Secretary and Mrs. Wilder standing against Mrs. Richard Ivers and A. L. C. Atkinson. The former won in two straight sets. There were no spectators.

## FLEET ADVANCE TO HONOLULU BEGINS

SAN FRANCISCO, Calif., June 29.--The supply ships Ajax and Glacier of the Atlantic Fleet sailed today for Honolulu.

## TENYO'S RECORD FOUR KILLED

SAN FRANCISCO, June 29.--The Japanese liner Tenyo Maru arrived here today four days and twenty-one hours from Honolulu.

## ENGINEER COMING

A junior engineer to be under U. S. Engineer Capt. Otwell is to arrive here by the Sherman on the 12th of July. He is A. C. Wheeler, and will aid in keeping going the large amount of work which Otwell now has in hand, in fortifications, harbor work and lighthouse matters.

The water wagon Arathous will accompany the fleet to Honolulu. She is sailing shortly from San Francisco, with water for the fleet in her hold, and will be down here about the same time as the ships.

She was formerly a molasses carrier in the British service. Ordered from the Mare Island Navy Yard on the 23rd, she moved down to San Francisco harbor to make ready for the voyage.

A meeting of the Board of Agriculture and Forestry will be held at 3 o'clock on Wednesday afternoon, July 1. All members are especially requested to be present.

## ALEXANDER CRAW DIES ON COAST

Did Valuable Service For Government As Entomologist

W. M. Giffard, chairman of the Division of Entomology of the Board of Agriculture and Forestry, received this morning by cable the sad news of the death of Alexander Craw, late Superintendent of Entomology, at Raymond, California. The news came from T. Craw, brother of the deceased.

Mr. Craw had been Superintendent of the Entomological Division since

SAN FRANCISCO, Calif., June 29. Four people were killed and three injured in a mysterious explosion that occurred in a saloon grocery here today.

LIMITED IS WRECKED WINSLOW, Arizona, June 29.--The California Limited on the Santa Fe road was wrecked here today. Three were killed and twenty injured.

SHERMAN BETTER CLEVELAND, Ohio, June 29.--John S. Sherman, candidate for Vice President, is improving.

RUSSIAN WARSHIP ARRIVED RESHT, Persia, June 29.--There is fighting between the Cossacks and the people. Several have been wounded. A Russian warship has arrived at Enzeli.

MEXICAN BANDITS FLEE CITY OF MEXICO, June 29.--The bandits have fled to the mountains.

WELLINGTON, Kan., June 29.--A cloudburst occurred here today. Seven were drowned.

## DEMOCRATS GETTING MONSTER PETITION

Expect Bulk Of Voters To Ask For Change Of Land Law

The Democratic Central Committee is sending petitions directed to Secretary Garfield and asking for changes of the land laws all over the Islands. This forenoon twenty-five precincts had been heard from and names to the number of 1345 had been signed. These were sent to the Secretary on board the St. Louis, and the rest of the petitions will be mailed to him as soon as they are received. Those back of the proposition expect that a majority of the voters of the Territory.
