SALT MARSH HAY FOR FORAGE CROP

Sec'y of Agriculture Reviews Work of Honolulu Station

The annual report of the Secretary of Agriculture has the following under the head of Experiment Stations: The Hawaii station continues its work in the diversification of agriculture in those islands. The experiments in shipping tropical fruits have been continued, and it has been demonstrated that pineapples, avocados, and similar fruits may be successfully shipped to any point within thirty days' direct communication with Honolulu. The rice investigations have been continued and extended, and the value of sulphate of ammonia and other high-grade fertilizers when applied to rice has been shown. The results of these experiments have already become well known, and dealers in fertilizers report a marked increase in the sales of high-grade fertilizers to rice growers. The studies in Hawaiian honey made by the entomologist have resulted in the adoption of suggestions whereby a largely increased revenue is obtained by bee keepers. A study has been begun of the insects affecting live stock and suggestions made for the control of some of the more troublesome ones. Among the more promising of the newly developed agricultural industries of Hawaii is pineapple growing and the study of the soil and fertilizer requirements of this crop has been begun on a comprehensive scale. All the departments of the station will give attention to the problems connected with the cultivation and marketing of this fruit. The introduction of Chinese and Japanese matting rushes has been successfully made and the practicability of growing these seems to be established. An experiment in harvesting salt-marsh rice for hay has indicated that large quantities of such hay can be produced in Hawaii to take the place of the hay which is imported, to the amount of \$250,000 worth annually, most of it coming from California. The experiments in tapping rubber trees have been continued, and, as showing the possibilities of rubber production, two Ceara rubber trees which had been tapped in July, 1907, when tapped again in January, 1908, yielded 6 1/2 ounces of dry rubber in nine days. When it is considered that more than 600,000 rubber trees, 90 per cent of which are Ceara rubber, have been planted in Hawaii within the past three years, the importance of experiments in tapping and with coagulants for rubber latex may be appreciated.

Home Gifts

Home Gifts — the kind that beautify the home and make it a more comfortable place to live in—are the ideal gifts for Christmas. Right in this connection, see our

SILVA'S TOGGERY HAS BEAUTIFUL STOCK

In selecting Christmas gifts for men and boys one cannot find a better stock of acceptable goods than at Silva's Toggery. This store has outdone itself this season in holiday goods and every day finds the counters lined with busy buyers selecting beautiful neckwear, hosiery, silk suspenders, handkerchiefs and the hundred-and-one other things that are appreciated by the male sex. Most of the customers of this superb haberdashery at this season are the ladies and they cannot fail to please their husbands, brothers, sons or sweethearts by presenting anything bought at Silva's.

CALIFORNIA UNAFRAID

Washington, Nov. 21.—Somebody has been giving out the unwarranted impression, judging by the almost frantic queries received here today, that there is danger of a reduction on oranges, walnuts, dried fruits and other fruits, especially those of a semi-tropical character. In response to this fear it is declared by one who should be in a position to know a great deal of the intentions of Congress that there is a disposition to take care of the farmer, and that all products of the soil will be protected, practically without exception. It may be difficult, if not impossible, to get the raise of half a cent on lemons and a cent on raisins asked for by California, but it is pretty safe to say there will be no reduction.

Florida wants protection on pineapples and on vegetables in a natural state, and, while the administration feels that it owes nothing to a state which gave a big plurality for the Democratic ticket, yet the pleas of California alone will doubtless insure that Florida will be given what it asks for, at least, substantial recognition.

There will be some real revision, that is said to be certain; but the revision downward will be on what the farmer buys and not on what he produces.

T. H. Williams is planning to enter his colt, Matchless, for the A. B. Spreckels cup at the Coronado pony races the coming spring and has engaged Frank Skinner to ride for him.
