GARDEN TRUCK AND FLOWERS

Soldier Boys Getting Into Form For Athletic Games

The landscape gardening at Fort De Russy, which has been under way since the arrival of Company G of the Engineers, has made many improvements at the post. The fences around the reservation are now entwined with vines of morning glories and other climbing plants while grass plots are artistically arranged around many of the buildings. Flower gardens have been planted at various places throughout the post and all of the houses occupied by the non-commissioned officers have been greatly beautified by shrubs and flowers. The tents of many of the members of the post are now surrounded by green plots which is a great pleasure aid to lay the fine sea sand and keep the camp in a very clean condition. Both the Post Hospital and the Engineers now have their own vegetable gardens. That of the hospital is more advanced and the sick men enjoy many dainty dishes from this garden which otherwise they would not be able to obtain. The garden of the Engineers is a very large one and in a short time will supply many treats for their tables.

Athletics.
Games on the smaller of the two hand-ball courts are still in progress and the players are fast getting back to their old form, although a few of them still show the effect of the lay-off during the Thanksgiving holidays. Sergeant Spencer and Sergeant Baezel won a well-played game from Privates Vuleback and Farrell by a score of twenty-one to eighteen. This was the first game of the evening. Privates King and Terrence played a fine game against Privates Williams and Stewart and showed that they will be among the top notchers during the Christmas championship games.

The basketball players were out yesterday and if the hard work which they are now undergoing is kept up a good team will be turned out. The following men showed up the best during the tryout and will be kept hard at the play until they fully master the style of play which is intended to be used here: Privates McDougall, McElroy, Corrigan and Farrell. Corporal Harbour and Emerson are training the men and expect to have two teams at work shortly.

Billiards and Pool.
The games for the championship of the camp, were continued last evening and a large number of spectators were present to enjoy the play. The pool games were first on the program and were well contested. McElroy won from Terrence in the first game and Holt won from Snyder in the second. Williamson and Backer played the last game and while the former won by a score of one hundred to eighty-seven it was a good game from start to finish. The finals of this pool tournament will bring out some fine games and from the play so far it seems as if the winner will deserve all the credit that can be given to him. Corporal Preecke lost his game, at billiards, to Corporal Dulse, but as this is the first game the two men have played in this series both will have a chance to show themselves again. The billiard games are a handicap affair which will make the play most interesting.

Camp Details.
By special orders from Headquarters, Privates Houser and Nicoden will proceed to the camp of Lieut. O'Connor tomorrow. They will make the trip by wagon and will carry supplies for the detachment of Engineers near Pearl City. Sergeant Billsborough and Private Marcus left Fort De Russy today from the detachment at Kahana and will be engaged upon the survey of that portion of the island. Corporal Emerson was this day detailed as a draftsman at Fort De Russy on the large map of this island, data for which is being sent to this camp from the survey detachments throughout the entire island of Oahu. The men engaged upon this survey are the same that mapped the island of Cuba during its occupation by the Army of Cuban Pacification and are turning in the same class of work here that won them the respect of the engineers of that land.

The suit of Wesley Fogel, executor of the estate of Mrs. Bell Guinness of Laporte, Ind., whose house burned in 1908, killing three children, has been compromised, the first insurance companies agreeing to pay \$1000 on the policies held on the property.

BITULITHIC IS BEST PAVEMENT

Gilman Investigated And Presents Results For Our Streets

Bitulithic pavement is the solution of the street problem of Honolulu that is presented by J. A. Gilman, who recently returned from a tour of the States. Mr. Gilman made a thorough investigation of the various materials offered for street construction and finally hit upon the Bitulithic road material. In every city that he visited he found that this method of street construction has been a complete success. One of the exhibits with which he returns is a section of bitulithic pavement cut from the roadway of Hancock street in Boston, after having stood the traffic of a busy street for nine years. This shows that there is wonderful wearing capacity in this road, that it is not a dust producer, gives a good hold for horses, and prevents automobiles from skidding.

Mr. Gilman believes he has found just what the city of Honolulu wants because it has been tried and found to be all that was represented in so many of the leading cities of the mainland. This form of street construction has been presented to Supervisor Quinn of the Road Committee and he is very favorably impressed. Road Supervisor Wilson states that he knows of this road material and it is a success. The first cost is larger than the macadam road but the wear does not produce dust and the road will last for ten years or more and remain in first class condition.

YOUNG HAWAIIANS OF MAUI ORGANIZE

Business Association Is Formed By Men Of Wailuku

(Special to the Bulletin)
Wailuku, Maui, Nov. 30.—On Saturday evening last, the "Hawaiian Progressive Association of Maui, Limited," was organized as an incorporated company with a capital of \$5000 at \$5 per share, with privilege of increase of capital to \$10,000. The following officers were elected, namely: Senator W. T. Robinson, president; John W. Kabua, vice president; Senator W. J. Coelho, secretary; Rev. L. B. Kaunohelua, treasurer; C. Wilcox, auditor; Wm. Kukona, P. Goodness, J. Kalino, J. Brown, Jr., J. Paikaka, E. Nicholas, directors. The above constitute the Board of Directors.

The objects of the company are to engage in the fishing business, dealing in land produce, taro, etc., buying and selling real estate, and carrying on a general mercantile business. General offices in Wailuku, Maui. The first meeting of the Board of Directors is called for Wednesday afternoon, at which the general plan of work will be outlined. General enthusiasm prevails. Petition for charter of incorporation is being prepared.

DREIER TRUST MUST PAY TAX ON \$599,200.

(Continued from Page 1.)
covery of the amount. The points involved in the case as outlined by Deputy Attorney General Sutton are that on November 5, 1907, August Dreier made and delivered to Cecil Brown, as trustee, 2996 shares of the capital stock of August Dreier, Limited, upon certain trusts. In the trust deed August Dreier reserved to himself, during his lifetime, the income from the shares of stock; and provided that the shares of stock during his lifetime should remain in his name on the books of the corporation; and he also retained the right to vote and exercise all rights of a stockholder. He also reserved the right to revoke the trust deed by will, deed or any instrument in writing; and the provisions of the trust deed were only to take effect upon the death of August Dreier.

During the lifetime of August Dreier the stock remained in his name on the books of the corporation, and all the income and dividends were paid to him. He did not exercise the power to revoke the trust deed.

On May 19, 1908, August Dreier died and upon the same day the trust deed was recorded in the office of the Registrar of Conveyances. August Dreier left other property which he disposed of by will, and this other property has been distributed and the inheritance tax on the value of the property transferred has been paid in full, after allowing the exemptions provided by the inheritance tax law. For this reason, the inheritance tax upon the transfer of the property under the trust deed, if taxable, as contended by the Treasurer, is to be calculated upon the market

Our Special

Once more we call your attention to our Suit Special at \$20.00. The Suits are up-to-date in every particular and the material of which they are made is seldom seen in a Suit for less than \$25.00. We get our Suits direct from the maker; that is the reason we are able to give you the best value for your money. If you want a CLASSY Suit give us a trial. Guarantee satisfaction or your money back is the way we do business.

Boy's Suits

We also have Suits for the Son as well as for the Father. Each Suit of popular price and the material will stand long wear. You are sure to find something in our assortment to please you.

value of such shares of stock at the date of August Dreier's death, without allowing further exemptions. The value of the shares of stock of August Dreier, Limited, at the death of August Dreier, is \$59,200.00. The tax at 2 per cent upon the transfer of such stock amounts to \$11,840.00. The tax was paid under protest and this action brought to recover the amount paid. It was the contention of the Territory that the transfer of the stock to the beneficiaries under the trust deed was intended to take effect after the death of August Dreier and that, consequently, the stock was subject to the provisions of the inheritance tax law. In concurring in this view Judge Robinson says: "That it was the intention of the grantor at the time of the execution and delivery of the trust deed and in its execution and delivery, that the trusts thereby created should become operative and the benefits to be derived by the execution of such trusts should take effect in possession and enjoyment only after his death, is, in my opinion, abundantly manifested not only by the reservation of the right and power to revoke the said instrument by will, deed, or any instrument in writing, but also by the condition that the shares in question should remain and stand in his name on the books of the corporation, during his lifetime, with the right to vote said stock and to exercise all the rights of a stockholder at any and all meetings, and in all business affairs of said corporation. Under the express terms of the instrument the beneficiaries therein named were to possess no benefit or advantage thereunder until after the death of the grantor, and their right of enjoyment of any part or portion of the property described was postponed until the happening of that event."

MILITARY POINT

If Honolulu had nothing else but her military future to boast of, it would be sufficient. It is difficult for any one to estimate Honolulu's military possibilities with her favorable geographical position and the enormous amount of work contemplated by the U. S. Government. When you consider the extensive improvements under way, the large appropriations that have been made by Congress and the number of barracks and forts being established, you can readily see that Honolulu is going to be the greatest military point the world has ever known. SCHOFIELD BARRACKS, FORT SHAFTER, FORT RUGER, FORT DE RUSSY, FORT ARMSTRONG, THE NATIONAL GUARDS, MARINES, ARTILLERYMEN, AND BATTALIONS OF ENGINEERS may some day number TWENTY-FIVE THOUSAND MEN, increasing the present monthly pay-roll of \$50,000 to \$500,000 or more.

GREATER PEARL HARBOR MEANS A GREATER HONOLULU

WASHINGTON, Nov. 11, 1909.—President Taft's first work on his return from his tour abroad was to give his attention to matters relating to the development of American interests in the Pacific.

One of the vexed questions of the administration and department has been the relative amount of work that should be done in shaping the plans for the fortifications of Hawaii and the Philippines.

President Taft today gave his approval to the recommendation of the joint army and navy board making Pearl Harbor the greatest naval center of America in the Pacific. Temporary equipment only will be provided for the Olongana naval Station in Subig Bay, and the improvement of Cavite and Manila harbor will be abandoned, the theory of the board being that the Army will be relied upon to protect the Philippines.

This decision is very important in its bearings on the development of the naval and military policies of the country in the Pacific. All the great work of the navy will go on at Pearl Harbor.

Admiral Sebree's fleet during its recent visit distributed over \$300,000 in Honolulu within one week. This will give you some idea of what may be expected when the Pearl Harbor Naval Base is completed and Honolulu becomes the naval center for the entire Pacific. The pay-rolls of the fleet that will be stationed at Pearl Harbor, together with the regular monthly pay-rolls of the several forts and barracks in the city will make Honolulu's military income run into many millions of dollars annually. With such a promising military future you will find us correct in our claim that property purchased in the KAIMUKI NEW OCEAN VIEW DISTRICT today is sure to increase to many times its present value. Our prices \$500. for corner lots and \$400 for inside lots, size 75 ft. by 150 ft., with liberal installment terms, gives you a splendid opportunity to make a safe and profitable investment, and secure a beautiful ocean view homestead.
