MONDAY APRIL 29, 1912

There are conditions for each individual under which he can do the most and the best work. It is his business to ascertain those conditions and to comply with them.—Luther Gulick.

Whether there is any connection between the introduction of a bill in the United States Senate to enforce Prohibition in Hawaii, and the recent meeting in this city of the Anti-Saloon League, the Bulletin is not in a position to state. There is not the slightest question, however, that the people of this Territory are very decided in the conclusion that Prohibition by Federal enactment, or any other enactment, is not wanted.

FOR PUBLIC WORKS SUPERINTENDENT.

With Albert Horner, H. K. Bishop and L. M. Whitehouse available as candidates for the position of Superintendent of Public Works, it is certain that the Governor cannot complain of a lack of first class material to fill this important office. Others may be in line and available but of all those mentioned, these three appeal to the Bulletin as satisfying the demand for experience and proved efficiency.

Mr. Horner is of the type that is often mentioned as most desirable for public office and almost always on the unavailable list. He has made good as an executive, is a keen business man, has had practical experience in the management of big propositions and would certainly get down to the brass tacks of detail and results.

Mr. Bishop is an engineer of national reputation, who so far as he had gone in his work here in Hawaii has made good. He has made a good impression and though best known as an expert in road construction, which he has made his specialty, there is every indication that he would carry a new atmosphere into the Public Works department which would do the department and the whole Territory good.

The only possible objection to Mr. Whitehouse is that he is just the man needed for the important work the City and County has on its hands, and why take him away just as he has got well started. Mr. Whitehouse has the qualifications of technical training, executive capacity and a thorough acquaintance with local conditions. Whether Mr. Whitehouse would be pleased with the request that he stay where he is, we are not informed, but there is not the slightest doubt that high standards of efficiency are as vital to the municipal government as to the Territorial. As time goes on the office of City Engineer will be, if it is not now, a more important office than the Territorial Public Works Superintendent.

The right man for Superintendent of Public Works is one who will not be so terribly jealous of his position and the Territorial prerogatives, real and imaginary, as to refrain from turning over to the municipal government so far as he is able to do so, the duties and responsibilities that naturally fall to the local administration. He should know his business in the first place, and endeavor in every way possible to cooperate with the counties. Any one of the men mentioned is in this class.

Oh, what is so rare as May 5th?—to officially overlook a small thing like Baseball.

The Colonel does not seem to have time to denounce the Mississippi flood as a nature fake.

There can't be much to that Magdalena Bay story, or else Hobson has not heard of it yet.

From now till the primaries, there'll be a hot time, in every town of Massachusetts every night.

Why is ex-Senator Beveridge chucking his hat into the stump-speaking ring? Is he the dark horse that is to be trotted out by the Roosevelt forces to unite the party?

After all the talk that Roosevelt has made in past years concerning "poor losers," it is of special interest to know how he will stack up when he is all by his lonesome.

The biggest mistake Madero has made since he took the seat vacated by Diaz, was the attempted suppression of the Herald, a newspaper published in the City of Mexico.

The Carroll county Allens are being relentlessly pressed. Uncle Sam has

to officially overlook a small thing like a wholesale murder, but the manufacture of unstamped whiskey, never.

Big hurrah nowadays when the Colonel captures an even break at some convention. Will somebody kindly look up the Colonel's delegate-getting record in Wisconsin's preferential primary, held April 9.

From across the pond comes the echo of considerable agitation and discussion on the Monroe doctrine. America is the lone judge as to what the Monroe doctrine means, and there is no recall attached.

"Mentioned candidates" for Delegate are getting so common that people here think no more of shaking hands with one of them than they would if he were merely a hired man in one of the garages.

Delegate Kuhilo is the only man for the Republican party to back for Delegate to Congress this year. He has made good and is making good right along in his work for Hawaii in Congress. What more do you want from a Delegate?

Republicans of the City and County of Honolulu could well afford to let it

he know that they will not support in the election a candidate whose candidacy has not been announced previous to the primaries to elect delegates to the nominating conventions.

Judging from reports a tremendous amount of good could be accomplished in the interest of good government if the island of Kauai were given a thorough investigation in its management of the lawless element that lives off the earnings of the laboring men.

The contest in Massachusetts between President Taft and Col. Roosevelt is a real fight. And the Nation awaits with great interest to know whether the State of the Plymouth Rock aristocracy is conservatively progressive or wild-eyed in its support of the man on horseback.

Judged from the outside, a request for making promptly available loan funds appropriated by the last Legislature, ought to meet with favor. Goodness knows that up to the present time we have had enough loan fund money tied up and not working except drawing interest which the taxpayers must eventually pay, pay, pay.

Hawaii's Republican National Committee is by all odds the most important figure in National political councils at the present time, and there is every reason why he should be on the job at headquarters, to render all the assistance that may be possible in the preliminary organization of the National convention. The National committee passed upon the temporary roll of the convention, and by deciding contests determines the temporary organization. Conventions and committees ruled by proxies is not the approved system of national politics, consequently Hawaii Republicans should consider themselves mighty fortunate in having a National Committee man willing to take the time to attend the committee meetings. As conditions are shaping at the present time, it may be found that Hawaii's best work for President Taft will be done in the National Committee. Appearances indicate that there's going to be some fighting between now and the day the convention assembles in Chicago.

FILIPINO HAS ENDED PROBE

(Continued from Page 1) as they are unaccustomed to the ten-hour day, the day being eight hours in the Philippines, but those who have been here more than six months don't mind it much.

"The climate here is very much better than in the Philippines. I have been in places where it is cold and places where it is hot, and I have been pleased to see that there is not very much humidity here. This is the great inconvenience of labor in the Philippines. When it is warm it is too hot and when it is cold too humid, but this is not true of all parts of our islands. In some parts the climate is much like your own."

"The Philippines here do not get sick much. The principal sickness, I find, is beriberi, which they probably bring from the Philippines. Probably some of it originates here from lack of care in selecting and preparing foods. Other sicknesses are found to a slight extent, such as tuberculosis.

"I have met some Filipinos whom I knew in the Philippines and now they speak a little English and are more

educated along agricultural lines. My opinion is that immigration will continue for two reasons: first, because it teaches the Filipinos about modern methods of cultivating and manufacturing sugar, and second, because the demand for labor here increases wages in the Philippines. They get low wages there at present. As I am one of those who have been working for the betterment of the laborers for the last ten years, I think that these reasons should assure the continuation and increase of immigration here."

Ill-Treatment Slight. He was asked if any cases of ill-treatment had been brought to his attention, and replied that on three plantations there had been some complaints that the lunas had used harsh language to the Filipinos and had called them foul names. "It must be remembered," said Senator Balmori in this connection, "that the Filipino is very sensitive, and harsh words disgust and hurt him."

Asked if any cases of bodily ill-treatment had been complained of to him, he said that only one instance of the kind had occurred, a complaint being made that a luna had struck a Filipino with his fists.

Lunas Not Americans. "The lunas of whom these complaints were made," commented Senator Balmori, "were not Americans. They were foreigners."

He said emphatically that he will make a favorable report to the Philippine Assembly. "The general conditions here are satisfactory," he observed.

He was questioned as to the probable best sources of labor in the Philippines that can be secured for Hawaiian plantations, and replied that the Visayas, Pampanga, Ilocos and Southern Luzon will furnish the best and most available labor.

"After making my report, I have no doubt that immigration to Hawaii from the Philippines will largely increase," he said. "Now many are held back because of the scare stories sent from here. The first Filipino laborers to come over were very largely students and young fellows who escaped from their parents, and they didn't get along very well in the fields. So the bad news was sent back. But even some of these are now holding good positions in Honolulu. The wages here are double those in the Philippines."

TWO REGIMENTS TO A TRANSPORT

A copy of the official order hurrying the return of regiments from the Philippines, which are being withdrawn in accordance with the plan to form a permanent colonial corps with a reduced number of regiments re-equipped up to full war strength, has just been received here. According to the original plan of the War Department, the Second Cavalry and Sixth, Ninth and Twenty-ninth Infantry, were to return on the transports leaving Manila the middle of July. August, September and October. Those regiments have been so depleted by transfer, however, that it will be possible to bring two on a single transport. The Second Cavalry and Nineteenth Infantry are therefore to embark May 15, while the Sixth and Ninth will cross together on the June transport.

Major Alonso Gray, cavalry, has just reported for duty as inspector general of the Western Division. It is possible that he will come to Hawaii in person to inspect the troops here, but since the announcement that Major Frier's trip had been postponed, department headquarters has heard nothing relative to the inspection of local troops.

MORE EXERCISE FOR ARMY MEN

(Continued from Page 1) nearly carrying out the spirit of the order that the one who does a compulsory hike of an hour around the barracks.

The new Schofield order reads that "Systematic physical exercise will be required of all officers on duty status, such exercise to consist of horseback riding, walking, polo, polo practice, golf, tennis, baseball, etc.

"One hour of vigorous exercise in the open air shall be taken each day throughout the week, Saturdays and Sundays excepted, and for the most part this exercise shall be in addition to and shall vary from the usual daily work. In any case the exercise shall be equivalent to a walk of one hour at the minimum rate of three miles or a horseback ride at a minimum rate of six miles."

At Fort Shafter the order prescribing physical exercise for officers is less explicit. It merely states that "Any exercise out of doors or gymnasium work consuming at least five hours per week, exclusive of regular duty, will be satisfactory."

At Fort Ruger the requirements are a trifle more strenuous, and every officer must submit a written statement every Sunday certifying that he has complied with the order, and setting forth in detail what form of exercise he took.

Six hours per week are required of the Coast Artillery officers at Ruger, the order stating that "Not more than two hours of the six to be performed in any one day, except that officers out on trips exploring the mountains and valleys, following trails, etc., may count all time devoted to such trips toward the six hours required in any one week."

News edition of American-Hawaii, People and Industries, sells for fifteen cents a copy. Wrapped and mailed for twenty-five cents when addresses are supplied to the Bulletin.

Section 4. That this Act shall take effect three months after its enactment.

MISS TOGSON MAY GIVE ART EXHIBITION

Mrs. Annie Togson of Hollywood, Cal., and an artist of high standing, was an arrival by the Sierra and is the guest of her sister, Mrs. James Girvin. Mrs. Togson will be remembered locally as a daughter of Captain Wilfong. She has made a reputation as a painter of fruits and flowers, and contemplates giving an art exhibition during her stay in the city.

JOHN WALKER'S VACATION

John Walker, the contractor, leaves on the Sierra for the first vacation he has taken in thirty years. After leisurely traveling across the continent, he will sail for Liverpool, where he plans to connect with an automobile and tour the "right little tight little Isle." He will then motor through Ireland, and finally "follow the man from Cook's" on an excursion to Rome and other principal centers of interest on the continent. "I haven't had a vacation in thirty years," remarked Mr. Walker to a friend, "so I'm going to take a day off. I expect to be back on the job next September."

EVENING SMILES

She—And you swear that you are not taking me on account of my money?

He—On the contrary, darling, I'm taking the money on account of you.

Jonah entered the whale. "This is the original water wagon!" he exclaimed. Herewith none wondered that he remained aboard only three days.

"Fifth grade this year, Tommy?"

"Yes, sir."

"You're in decimals or fractions now, no doubt?"

"No, sir. I'm in crochet work and clay modeling now."

Young Lady—Won't one of the gentlemen in the car offer me his seat?

Conductor—I think not, miss, you're too pretty. They've all got their wives with them.

Pure Milk

The Territorial Veterinarian in his official reports recognizes the efforts we are making to supply our customers with a pure, rich milk from healthy, well-fed cows.

That these efforts are successful is proved by endorsements experts have given our milk.
