Secretary Lusk visited the President's camp yesterday and found the Executive and his party well and happy and enjoying rare sport in their hunt for Rocky Mountain grizzlies. But one bear has been killed, and that was brought down by the President himself.

Dispatches from West Palm Beach, Fla., say there is every indication that Joseph Jefferson, the veteran actor, will recover. The reports are said to be without foundation, his illness being due merely to over exertion when on a visit to Hobe Sound.

Nine miners were imprisoned in the Cabin Creek mine at Kayford, W. Va., last night by an explosion. Four of the number managed to reach the surface badly injured. The other five are thought to be dead. The catastrophe is said to have been caused by a powder explosion which set fire to the tipples.

**April 22**  
Mose Peitner was on the stand practically all day in the Hargis trial. He told of the conferences held with the Hargis and Callahan when alleged plots on the lives of Marcus and Cockrill were discussed, and said that his friend James Hargis was because Hargis had tried to have his (Peitner's) friend James Marcus assassinated.

A number of prominent Chicago bankers have been summoned before the Federal grand jury, which is investigating the beef packers' secret service officers, have been engaged in tracing checks so drawn and informed as to conceal accounting methods employed by the Acta Trading Company officials, and it is believed that important evidence may have been secured in this way.

The Gates bull clique corner in May wheat collapsed in Chicago yesterday with a wholesale sacrifice of profits to escape possible huge losses. The closing price for May wheat was \$1.01, against \$1.21 six weeks ago. The general opinion is that Gates and his friends emerged from the deal with little, if any, actual financial loss. It is estimated that fully 5,000,000 bushels of May delivery were unloaded in Chicago and Minneapolis during the day. There was a steady buying movement in July options and rumors spread about of another corner with Armour and other leading traders as chief manipulators.

M. DeLesse, the French Foreign Minister, has reconsidered his determination to resign and will remain in the cabinet. This decision was reached after he had received assurances that the other members of the portfolio approved his foreign policy. It is expected that as a result of the incident he will assume a firmer attitude toward Germany in regard to the Morocco question. His effort to resign has been very generally construed as a triumph for Germany, and the selling in Paris is more acute in consequence. The Cabinet's course in giving united support to M. DeLesse insures him strong and material backing in carrying out his Moroccan policy.

**April 21**

The low price paid by the Standard Oil Company for crude oil has led to renewed agitation regarding the establishment of independent refineries in Kentucky. Local capitalists with extensive interests in the upper and lower fields are establishing a refinery at Georgetown, and will make illuminating oil and asphalt.

The unrest of Russia grows and the authorities are exerting every influence to delay an outbreak. The emile is declared to be one vast area of intimidation at the hands of the police and military. Meetings of all kinds are broken up, houses are violated, and arrests by scores and hundreds are made in all parts of the empire. More troops are being poured into St. Petersburg, where, as elsewhere, demonstrations are planned for the Easter holiday and May Day.

### Bulky Foods.

A leading poultryman who met with success states that he made it a rule to feed his hens the same as he did his cows—that is, he fed grain, hay, ensilage, cooked roots, and added to the rations of the hens ground meat and bone, good, clean bone meal also being given to the cows. There is no reason why poultry should be fed almost exclusively with concentrated food. Such practice is not economical, is not the best mode, and is sometimes injurious. If horses and cows were kept on corn or ground grain to the exclusion of that which is bulky, they would soon fall to give satisfaction to their owners, and this is so well known to farmers that none of them attempt to keep stock without supplying grass in summer and hay in winter. The hen will eat grass, and they will also eat hay in winter, provided it is cropped for her, and especially if it is steeped in water and softened. They prefer coarse food to grain exclusively, and they lay better with such food, and keep in health. The hens on farms where food is given but three or four times a week, can derive all they wish by consuming the herbage of the fields. Some farmers sow rye in the fall and oats in the spring for the hens and find that it pays them to do so. The grain works in its grinding capacity to its best advantage when the hens are provided with a variety of food, and better digestion is thereby secured. It is cheaper to use bulky food, with grain than to confine the hens to concentrated materials, and they will produce more eggs by such treatment.

### BEST COUGH MEDICINE FOR CHILDREN.

When you buy a cough medicine for small children you want one in which you can place implicit confidence. You want one that not only cures but cures. You want one that is unquestionably harmless. ### Up in Old Kentucky.

It's up in old Kentucky Where they never have the blues; Where the Captain kills the Colonel, And the Colonel kills the "boone" Where the horses they are pretty, And the women they are too. Where they shoot men for pasture, Where there's nothing else to do. Where the blood it flows like water, And the bullets fly like hail; Where every pistol has a pocket And every coat has a tail. Where they always hang the jury, But they never hang the men, Where you call a man a liar, And then get home if you can. There you go out in the morning, Just to give your health a chance, And they bring you home at night-fall With buckshot in your pants; There the owl's afraid to holler, And the birds don't dare to sing. For it's a— in old Kentucky, Where they shoot 'em "on the wing." Old papers for sale at this office.

### HOISINGTON, KANSAS.

Being a Kentuckian I feel free to drop a brief article to the NEWS. We have only one paper printed in our town viz: "Hoisington Dispatch." It is a strong democratic paper in a republican town. Our city election is near at hand and to see our fair ladies surrounding the polls to vote, would be sufficient to ease an old Kentucky farmer. They are voters in municipal and school elections, and over in Colorado they vote on all questions that come before the people. Our town has a population of about 2,000 and is purely a railroad town yet everything is coming to the front. This is the division between the Central and Mountain time. We have the foundry, shops, repair-shops and the principal workshops between Sedalia, Mo., and Pueblo, Colorado. We have one of the nicest Railroad Y. M. C. A. buildings in the West. Also, four nice churches and a fine school building including the 10th grade and high school. We have two banks that do an enormous business and one private depository. We have two excellent drug stores, three barber-shops, three meat markets, two hardware stores, one shoe store, two general stores, one bakery, two harness shops, three blacksmith shops, three Elevators, one flouring mill, four restaurants, two hotels, two rooming houses, one telephone exchange, one light plant, one ice plant, one steam laundry, two boarding alleys, two billiards halls, one fine P. O., one nice opera house, four doctors, four preachers, one dentist, one lawyer, two food livery barns, one creaming, one stock yard, two Railroads, two R. F. D. Routes, one tailor eight daily meals and about five points with the finest farming country and the richest lands on the earth. Now this is only part of our industries and facilities, and you can see that we need a good five dentist and a lawyer to make up the quota of professional men. We have at least a dozen different orders from the Masonic body to the Eagles. We have a fine climate as I ever saw and the production of corn and wheat in this country is wonderful. Our county, (Barren) produced in 1904 over five million bushels of wheat and plenty of corn. Farmers sow from 200 to 300 acres of wheat land and some raise as much as 25,000. Real estate is increasing rapidly in value and our town property is high in price where there are plenty of valuable land in the western part of state that can be home steaded, but is all being taken up by people of eastern Kansas. Everything is high in price except livery hire and Wind. Hope this will find space. If so I will write again more explicitly. Respectfully, Dr. Burton.

Va., paid his very best respects to friends here Sunday. J. L. Hibbard, of Peach Orchard, is here this week on business. M. S. Burns and Not Garred, of Louisa, are also here on business. M. F.
