DEATH OF AN OLD MAN.—Christian Bame, an old and well-known citizen of Penn township, departed this life on Tuesday evening, about 9 o'clock, having come to the ripe age of 81 years. Mr. Bame was one of the first settlers of this valley. He was born on the old homestead about a mile south of Millheim, where he spent the whole of his life. He was one of those sturdy, hard-working farmers, of the old school, who truly earned their bread "by the sweat of their brow." Deceased leaves six children, three sons and three daughters, who are all married and with grown children, two of them residing in the West.
The funeral will take place on Friday forenoon.
ENTERTAINMENT.—Harriet Mary, an Indian girl, about 18 years of age, from the Indian territory, will give an entertainment on Friday evening, August 28th, in the town hall at Millheim consisting of Solos, Duets and Recitations. She sings very sweetly. She has been attending the Indian training school at Carlisle for the last four years.
Admission, 10 cents; Doors open at 7 o'clock.
The following paragraph taken from an account of an entertainment recently given in the Presbyterian chapel at Bellefonte may serve as a good recommendation of her performances:
Most interest centered about the performances of Miss Harriet Mary, the Indian girl. She rendered two solos and also sang in two duets, and her sweet voice and natural expression gave much satisfaction. She also read two pieces and here again her thorough naturalness enabled her to excel. Her selections were the "Poppy and Daisy" and "The Gray Swan."
IT SMELLED.—The power of imagination is thus illustrated by the Tyrone correspondent of the Altoona Times: On Saturday there was received from Harrisburg an empty coffin that was intended for Bellefonte, and no trains running on the Tyrone division on that day, the "box" had to remain here until yesterday morning. It was left standing on a wheelbarrow, covered

with canvas to protect it from the weather. Several parties, in passing lifted the canvas through curiosity to see what it was. When they saw it was a coffin they dropped the covering like a hot potato and imagined the corpse smelled badly. One of them actually walked off holding his nose and said that the stench terrible. Yesterday morning an express messenger got into the baggage car, where the empty casket had been placed for the purpose of forwarding it to its destination, and he immediately imagined that the corpse smelled so badly that it ought to be put on the front platform. When he was informed that the casket was empty, and was only being sent to Bellefonte to receive its precious freight, he would scarcely believe it, still imagining that he really smelled a "smoke."
No one, better than the mothers, knows the amount of perspiration, throat-irritation and fever, which is required to induce the children to take, when necessary, a dose of the nauseating, sickening worm syrups; and no one more highly appreciates the virtues of McDonald's Celebrated Worm Powders. So pleasant and easy to take, so effective as a worm destroyer, the dose so small that the children never know they are taking a medicine. There is nothing in the shape of a vermifuge that can compare with them. Don't be deceived. Take no other. Money refunded to dissatisfied purchasers.

TESTIMONIALS many times are out from the whole cloth, and for every one voluntarily given in praise of a meritorious article an unscrupulous and dishonest manufacturer can write up a dozen for his worthless products; but the following card from the traveler of Sower, Potts & Co., a publishing house known in almost every state in the Union, is so emphatic and to the point that we cannot refrain from giving it in evidence:

TAKE—SIMMONS LIVER REGULATOR
For all Diseases of the Liver, Kidneys, Stomach and Spleen.
This purely vegetable preparation, now so celebrated as a Family Medicine, originated in the South in 1828. It acts gently on the Bowels and Kidneys and corrects the action of the Liver, and, therefore, the best preparatory medicine, whatever the sickness may prove to be. In all common diseases it will, unassisted by any other medicine, effect a speedy cure.
The Regulator is safe to administer in any condition of the system, and under no circumstances can it do harm. It will invigorate a glass of wine, but is so innocuous that it leads to intemperance; will promote digestion, dissipate headache, and generally tone up the system. The dose is small, not unpleasant, and its virtues undoubted.
No loss of time, no interruption or stoppage of business, while the Regulator.
Children complaining of Colic, Headache, or Sick Stomach, a teaspoonful or more will give relief.
If taken occasionally by patients exposed to MALARIA, it will expel the poison and protect them from attack.
A PHYSICIAN'S OPINION.
I have been practicing medicine for twenty years, and have never been able to put up a vegetable compound that would, like Simmons Liver Regulator, so gently and effectively move the Liver to action, and at the same time aid (instead of weakening) the digestive and assimilative powers of the system.

An Efficient Remedy
In all cases of Bronchial and Pulmonary Affections is AYER'S CHERRY PECTORAL. As such it is recognized and prescribed by the medical profession, and in many thousands of families, for over the past forty years, it has been regarded as an invaluable household remedy. It is a preparation that only requires to be taken in very small quantities, and a few doses of it administered in the early stages of a cold or cough will effect a speedy cure, and may, very possibly, save life. There is no doubt whatever that
Ayer's Cherry Pectoral
Has preserved the lives of great numbers of persons, by arresting the development of Laryngitis, Bronchitis, Pneumonia, and Pulmonary Consumption, and by the cure of those dangerous maladies. It should be kept ready for use in every family where there are children, as it is a medicine far superior to all others in the treatment of Croup, the alleviation of Whooping Cough, and the cure of Colds and Influenza, ailments peculiarly incidental to childhood and youth. Promptitude in dealing with all diseases of this class is of the utmost importance. The loss of a single day may in many cases entail fatal consequences. Do not waste precious time in experimenting with medicines of doubtful efficacy, while the malady is constantly gaining a deeper hold, but take at once the speediest and most certain to cure,
