

Miscellaneous News.

Great Demand for Freight Cars.

PITTSBURG, Aug. 4.—The demand for freight cars has increased so rapidly within the past week that the railroads centering in this city are taxed beyond their capacity.

A Terrible Railroad Wreck.

PITTSBURG, August 4.—One of the most serious freight wrecks that have ever occurred on the Pittsburgh division of the Pennsylvania road occurred at Carpenter's tunnel near Wall's station.

HARD ON HIS ARMS.

A Gallant Police Officer of Newark, N. J., as a Life Saver.

Officer Thomas McDonald of the Newark police force had just purchased a new artificial arm. The said officer has within twelve months saved the lives of many persons.

As the train started out of the depot a well dressed woman attempted to board it and fell. McDonald saw her and managed to catch her, but the combined weight of her body and the speed of the train threw McDonald under the passenger coach.

THE ABSENT BOODLER.

It is Expected He Will be Prosecuted in Montreal.

CHICAGO, Aug. 4.—Sheriff Matsen and Inspector Bondfield received some pleasing intelligence by dispatches from Canada. They refuse to allow them to be seen, but their purport was that it was definitely settled that McGargle will be prosecuted at Montreal.

A local paper has a long special from St. Catharines, Ont., giving what purports to be an exclusive interview with McGargle. The correspondent describes the fugitive as looking very poorly.

McGargle gave an account of his movements since he left Sarnia. After driving to Wyoming and taking the train for London, he went to Hamilton, and from there to Niagara Falls.

McGargle is very anxious for the arrival of the Blake, as he has valuable baggage on that vessel. His pockets are filled with money. McGargle is in the care and keeping of Frederick St. John, brother of the doctor.

Engaging Paragraphs.

THE Chinese of San Francisco pay two thousand dollars a month for the privilege of running their lottery games.

ENGLAND has a "speakeasy mission" for the distribution of spectacles among the poor who are afflicted with ocular ailments.

THE death rate of the whole earth has been calculated to be 67 a minute, 87,790 a day, and 35,639,835 a year, and the birth rate at 70 a minute, 100,800 a day, and 36,792,000 a year.

A PHILADELPHIA society writer has made the important discovery in social ethics that if you wish to be extremely popular you must not speak to any one on the street when you are driving in a handsome cab.

THE nationality of four young ladies seated in a restaurant was easily distinguishable by their orders which were as follows: English, roast beef; German, sauer kraut; French, paté de foie gras, and American, pink ice cream.

MAHOGANY was first known to Europeans in 1595 through Sir Walter Raleigh who used the wood in repairing one of his vessels.

A DISTINGUISHED aeronaut of England is constructing what is thought will be the largest and most complete balloon in the world.

An interesting cure for insanity was recently developed in the cases of two men both inmates of the same cell in an asylum.

The death of Mr. Dill did not occur from heart disease, as the heart was carefully examined before the other was administered and no evidence of trouble found.

As the train started out of the depot a well dressed woman attempted to board it and fell. McDonald saw her and managed to catch her, but the combined weight of her body and the speed of the train threw McDonald under the passenger coach.

McGargle is very anxious for the arrival of the Blake, as he has valuable baggage on that vessel. His pockets are filled with money.

McGargle is in the care and keeping of Frederick St. John, brother of the doctor. One of the most marvelous features of the case is the risk which Dr. St. John has taken to aid McGargle to escape.

When asked what he thought of Dr. St. John's chances of going to the penitentiary McGargle broke down. He would not even speak.

Unless the detectives get too close to McGargle he will remain at St. Catharines for the present and rest, and if possible open negotiations with State Attorney Grieland for his return.

He says he does not want to bring his wife and children away from Chicago, but that he cannot live without them very long.

Evidence of Dr. St. John's connection with the escape of McGargle is given in the News which prints the substance of two conversations had with the doctor by Capt. Irwin, of the schooner Blake, over the telephone.

In these talks reference was made to the preparations for the speedy departure of the schooner, and the necessity of having the mysterious passenger "Williams" ready at a certain place and time.

TORONTO, Ont., Aug. 4.—The Globe this morning says: There ought to be no ceremony about surrendering a convicted cadet of the McGargle stripe.

True, Canada is not legally bound to surrender him, but what do we want of him? A New York paper points out that under similar circumstances Spain surrendered Tweed.

Why should not Canada give up McGargle? Heville Reese Dill Dies Suddenly Under a Surgical Operation.

PHILADELPHIA, Aug. 4.—Heville Reese Dill, brother of United States Marshal Dill, died yesterday afternoon during a surgical operation at the Bingham house.

Dr. Dill was 40 years of age, and for a very long time had been a great sufferer from hemorrhoids. Some time ago he came to this city from his home in Myrtle, Somerset county, and was successfully operated upon by Professor D. Hayes Agnew, but there was a gradual return of the trouble in an aggravated form, and he

appointed yesterday afternoon at the Bingham house for a second operation. Professor Agnew and Professor William White found Mr. Dill at that hour properly prepared for the operation giving no evidence of either heart or kidney trouble or any contra-indication to administration of an anesthetic.

Squibb's ether was used, and was administered on a towel folded in the shape of a cone, in the ordinary way. The patient took it very well, and in about ten or fifteen minutes was completely under its influence, whereupon the operation was begun.

After the first hemorrhoid had been tied, and while the second was being operated upon the patient suddenly stopped breathing. All efforts were immediately made by both physicians to resuscitate him.

No Samples of Stocks.

"Is this where they sell stocks?" she asked, stepping up to the counter with eager expectation.

"Yes'm. Do you wish to invest?" "Well, yes—no. The fact is, I don't know exactly. My Cousin Charley does nothing but buy stocks, and they say he makes lots of money. Now I thought I'd like—"

"Ah, yes, I understand. You thought you'd take a flyer."

"Yes, I guess that's what I wanted. What funny names you brokers have!" "And what stock do you desire?" "Oh, I want one of those that you buy to-day for \$10 and sell to-morrow for \$15."

"Just so. Keely Motor is what you want."

"Is it? Well, of course you know. You couldn't cut off a few samples, I suppose? I don't know, you know, whether they are wanted by the lady who asked me to inquire, you know."

"Very sorry, madam; but we never give patterns."

The lady looks straight into his face, tosses up her chin, and flounces out with the remark: "Well, I never!"

Philosophical Points.

THERE is a bright side to life and it is worth seeing, even though we have to wear away the dark side to get at it.

WHEN men become too busy to dwell on higher thoughts, their material as well as their moral welfare is becoming endangered.

How like to the heading up of a rivet of iron is the molding of the human will. The gentle, steady tap of the riveting hammer gradually brings to the desired form and position the head of the iron bolt which one blow from a sledge would have shattered.

In the case of the will: the persuasive influence of gentle words and the convincing power of reason will accomplish that which solemn fasts, sternly set forth, wholly fail to achieve.

Heat in Arizona.

A farmer at Ysleta went out to look at his pigs during one of the melting days last week and found nothing left except three buckets of leaf lard.

At Tombstone they had to splice two thermometers together to get any idea of the heat.

San Antonio is bragging about its delightful weather for this time of the year, and claims that people there get their ears frost-bitten in the evening.

A man at Florence, Ariz., has taken so much calomel that these hot days the mercury rises to his head and he gets so heavy that he has to walk with a crutch.

The streets at Albuquerque are so hot that small boys get vapor by merely following the street sprinkler.
