TO OWNERS AND MASTERS OF VESSELS. In order to facilitate and improve the mode of Communication at Sea, by Ships of War with each other, and with vessels of the Revenue, Marine and Merchant service, the Signals patented by the undersigned have been adopted by the Government as the standard code of the United States: The following are the advantages to be derived from their use, viz: Vessels meeting at sea in any part of the world, if provided with no Flags and Signal Books, may, as long as they are in sight of each other, without altering their course, communicate any intelligence, either their names, from what port they sailed, what passage they have had, what vessels they left in port, that preceded them; particulars relative to vessels they have fallen in with, if in want of stores, provisions, assistance, or information; their latitude and longitude; casualties or any observations they may have made during their voyage. It is highly important to owners that their vessels be provided with these Signals in the event of their being under convoy of Government, or in company of other vessels. Testimonials from officers of the Navy, Revenue, Marine, &c., in favor of the system, can be had free of charge at our office, where we are prepared to furnish Signals and give any information in regard to the business.
