

Farmers' Department.
RAISING MILK COWS.—A correspondent of the Germantown Telegraph writes very sensibly as follows in regard to raising calves:

"When fresh cows sell for from forty to sixty dollars each, it is not time to consider whether it will not be good policy to raise some calves, especially if we have good stock to raise from. Last season I raised two, and this spring I have already started three more. I consider early spring the best time to start them, as grass comes, when they will require but little care until fall.

"I will start a calf that I am going to raise I never let suck the cow. It is much easier to learn it to drink alone, without the aid of the finger, before they are twelve hours old; and after the second day have but little trouble with them, as they drink freely if they are in good health; besides the great advantage is when they are returned with the cows, they never trouble them, neither have I to put straps around the nose with long nails in, to prevent their sucking, as they know nothing about it.

"What I Feed Them.—The first two weeks I give them milk drawn from the mother of the calf after the milk comes from me. I give them a little oatmeal, bran and salt, mixed with water, about milk warm. It is better to seald the meal and let it soak twelve hours before feeding. If any is left, feed it to something else and make fresh for the calves every time, as it will sour. About this time they will eat a little hay, clover if best; as soon as there is grass enough for them to get a little from, I let them out, and I soon slack of their feed.

"A small enclosure, with water and shade, is the most suitable where horses or cows are not permitted to run.

TREATMENT OF PEACH TREES.—R. Stevens, of Cecil, Maryland, thus describes his treatment of peach trees, which he cultivates on a large scale:

"They should be carefully examined every year, and all the worms and eggs destroyed. A shovelful of wood ashes thrown around the roots every spring is beneficial. When six years old, all the soil should be cautiously removed for about two feet around the trunk so as to examine the root. A strong wash of lime and some salt should then be applied to the top of the root at the trunk and about eight inches below it, above it, to which application the rough bark should be scraped off. The removed soil is left open for one week, then placed in its former position. A yearly examination for worms, a rich soil, and careful cultivation are all necessary for the prosperity of the peach tree.

MANURE FOR STRAWBERRIES.—The following is a communication to the "Friends' Review," which may be very useful to many of our readers:

"The writer had a very productive bed, 33 by 40 feet. I applied, say, about once per week, for three times, commencing when the green leaves first began to start, and made the last application just before the plants were in full bloom, the following preparation: Nitrates of potash, (saltpetre), glauber salt and sal soda, (carbonate of soda), each one pound, nitrate of ammonia, one quart, of a pound—dissolving them in 30 gallons of river or rain water. One third of this was applied at one time, and when the weather was dry I applied clear soft water between the times of using the preparation, as the growth of the young leaves is so rapid, that unless supplied with water, the sun will scorch them.

"I used a common watering pail, making the application in the morning, and worked in this way, and the weeds kept out, there is never any necessity of digging over the bed, or setting out new. Beds of ten years are not only as good, but better than those two or three years old.

THE GRAPE VINE.—Mr. Prevost, of Williamsburg, gave his views upon vine pruning, (in a different manner) from the ordinary mode. He turns down the branches and lets them take root. He said: "I do not prune at all in the Fall, and only cut away dead wood in the Spring, or where the vines are too thick. I have grown 28 bunches upon a single branch. I spread salt hay over the ground to kill the weeds. I train vines upon trellises eight feet high, and carry down layers of manure, and use manure vines. I prefer wooden stakes instead of wires. Upon vines clothed on wires, so as to bleed, I have applied hot pitch with success. The rows of trellis are eight feet apart, but I have vines between the rows supported upon stakes. I have made 1,500 gallons of wine from an acre in one year. I never dig up the ground in my vineyard with any thing but a hoe, and the attention to the soil, and sand, which I find very beneficial.

A HINT TO TAKE NOW.—White walls, and long lines of white fences gleaming amid luxuriant and embowering foliage, give to a farm establishment an appearance of neatness and rural elegance and comfort, indescribably attractive to the man of taste, and can in no way be so effectually and economically secured, as by giving them the treatment of whitewash. The whitewashing of cattle and horse stalls, as well as inside of hog coops and henries, not only renders them more healthy but prevents the animals and fowls from being infested with troublesome and filthy vermin.—Germantown Telegraph.

A FACT WORTHY OF NOTE.—By taking up shrubs or plants at this time, with some of their own soil about the roots, and placing them upright in a cellar until October, then transplanting them into pots, and watering them with a solution of half an ounce sal ammoniac to a pint of rain water, you will have summer flowers in winter.

A gentleman of Hamilton, New York writes: "The soil in this vicinity is altogether unsuited for growing radishes. I, however, raised them excellent the past year by sowing the seed in coal ashes. The radish grows vigorously, without injury from the worm."

Plough for Sale.
A FIRST-RATE new and efficient Plough is offered for sale, and the attention of the farming community, or others who may desire such an article, is invited to an examination of it.—Baltimore, April 7, 1859.—G. THIS OFFICE.

Knit Skirts.
JUST received a stock of these SUPERIOR EXTENSION SKIRT CUTS at the Cheap Store, No. 11, HEBB, Cal. and N. E. Corner, March 18, 1859.

Regularly of children's teeth removed by the most approved methods. All work guaranteed. Office, No. 11, Broadway, New York, Cumberland, Md., October 19, 1858.

VANDERHOOF & CO.,
Insurance and General Agents,
60 Wall Street, New York.

With a view to the most reliable and complete insurance, we have secured the services of the most experienced and reliable agents, and we are prepared to issue policies on all kinds of property, and to pay the amount of loss, as soon as it is ascertained.

Applications by letter should state the kind and amount of property, and the nature of the business, and how the same is conducted. As we act on commission from the Insurance Companies, we make no charge for our services.

THE GREAT MEDICAL REVOLUTION TO ALL MANKIND.
INVIGORATOR.
Prepared by DR. SANFORD.

Compounded entirely from Gums, ESSENCE OF THE BEST PULVERIZED AND LITHIATED MEXICAN SOAP, and other ingredients, which act as a Cathartic, purgative, and are more effectual than any other medicine known. It is not only a Cathartic, but it is a powerful stimulant to the Liver to eject its morbid matter, then on the stomach and bowels to effect that which the stomach and bowels are unable to do, and which is taken in moderate doses, will strengthen and build up with unparal- leled efficacy.

It is one of the principal regulators of the human body, and when it performs its functions well, the powers of the system are fully developed. The stomach is a most entirely dependent on the healthy action of the Liver for the proper performance of its functions, and when it is diseased, the Liver is diseased, and the whole system suffers in consequence of one organ being diseased. It is one of the principal regulators of the human body, and when it performs its functions well, the powers of the system are fully developed.

For the diseases of that organ, one of the proprietors has made it his study, in a practice of more than twenty years, to find out the cause of the disease, and to apply the most judicious means to its cure, and to prevent its return. It is one of the principal regulators of the human body, and when it performs its functions well, the powers of the system are fully developed.

To prove that this remedy is a true one, in any of its forms, has but to find a Lotion, and conviction is certain.

These three remedies will cure all morbid matter from the system, supplying in their place a healthy flow of bile, invigorating the Liver, and thus restoring the system to its normal state, and thus restoring the system to its normal state, and thus restoring the system to its normal state.

It is one of the principal regulators of the human body, and when it performs its functions well, the powers of the system are fully developed. It is one of the principal regulators of the human body, and when it performs its functions well, the powers of the system are fully developed.

MEDICAL HOUSE,
11 South Frederick street,
Baltimore, Maryland.

Established in order to afford Sound and Scientific Medical Aid, and for the representation of the People.

DOCTOR SMITH
HAS for many years attended to the whole art of medicine, and has a large and extensive practice in all its various and complicated branches. His great success in those long standing and incurable diseases, which have formerly been considered incurable, is sufficient to commend him to the public as worthy of the attention of the patronage which he has received. Within the last eight years, Dr. S. has treated more than 25,000 cases of Private Complaints in his different forms, and a great number of cases which no doubt exceed that of all the other physicians now advertising in Baltimore, and no single case is known, where a patient has been cured, without having taken a course of his medicine, without effecting a radical and permanent cure; therefore, persons afflicted with any of the above mentioned diseases, should be advised to consult with him in mind that Dr. S. is a regular and experienced physician, and that he is a regular and experienced physician, and that he is a regular and experienced physician.

He cheerfully recommends your Liniment as being an article which I believe to be unrivalled. THE REMEDY AGAIN TRIUMPHANT.

Consulting Physician, Feb. 13, 1858. Messrs. Healy & Shriver, Baltimore, Md. Gentlemen:—I have made use of your Liniment on several occasions, and with the most successful results. It is a most valuable medicine, and I believe it to be the best of its kind. I have used it on several occasions, and with the most successful results. It is a most valuable medicine, and I believe it to be the best of its kind.
