

Civilian & Telegraph

CUMBERLAND, MD. W.M. BEALL, Editor and Proprietor. Thursday Morning, March 15, 1860. FOR PRESIDENT, EDWARD BATES, Of Missouri.

The Union—"It must and shall be preserved" Its friends are our friends—its foes our foes

MARYLAND PRESS FOR BATES. Civilian & Telegraph. Baltimore Patriot, Cambridge Intelligencer, Cecil Whig.

MARYLAND OPPOSITION CONVENTION.—The American members of the Legislature have recommended the calling of a State Opposition Convention, to be held at Baltimore on the 19th day of April next.

The American members of the Legislature have recommended the calling of a State Opposition Convention, to be held at Baltimore on the 19th day of April next.

They have also declared it expedient that "all the citizens of this State opposed to the present Democratic party, should take measures, at once, to make their opposition effective, by organization and the union of all the elements of such opposition."

The Charleston Convention. A precious time they are having, away down yonder, in great big Richmond.

It seems there are couple of democratic month pieces in that city, and they will all the time be talking, which is a very good thing, if they only talked alike, seeing they are of the same quiet family, they are respectively called the Enquirer and the Examiner, but this they won't do, the Enquirer talks one way, and the Examiner the other, and they are not very careful about what they say.

The following article, which we find in the Baltimore Patriot, we copy, because it gives such a graphic picture of the designs of the recent Legislature.

"The late lamented General Assembly of this State, which expired on Saturday night, went out in scenes appropriate to its illustrious and illustrious career.

Perhaps it would not be too much to say that no such Assembly ever been seen in Maryland before, and we would at least have seen the appearance of an increase of talk on the canal. How true it is that Democracy holds the promise to the ear, but breaks it to the heart.

It becomes the people of Allegheny to hold a strict accountability those who have so shamefully neglected their interests.

Maryland Legislature.

This very venerable body of Legislators adjourned sine die on last Saturday night. We are not aware of transcending the truth, when we say, that such a body never assembled in the capitol of this State before, and it is more than probable, that such a reckless assemblage will never convene in Annapolis again.

From its organization, until its final and busy close, it was preoccupied of both time and money. It is more than probable, that the sense of the State had been proposed and seriously considered; chartered rights and vested privileges have been disregarded, and constitutional law trampled under foot.

Bent on, it would seem, the accomplishment of one, and to the majority the great and overshadowing interest, namely the ousting of certain individuals from office and place—the interests of the State—the interests of Baltimore—and to what is of vital importance, the interests of Allegheny county are all made to succumb to party maneuvering—to sink to the bottom, that democratic office seekers may float into place and power.

In the last campaign, who were they that discoursed so eloquently upon the canal?—In such confident tones of the signal advantage that would accrue to the country, if the democracy should succeed and the canal by them turned over to the bond holders or other than politicians for management? Do you ask why? Why the Democratic candidates. And what have they done? With a large and overwhelming majority they have suffered the bill which was to give reality to their promises, to sink so low, that it could not be reached. And why? That they might have opportunity to oust the Baltimore delegation, and vote into the position of Campbell, a man whom the people had repudiated? Had the same interest been felt for the canal, that which was manifested in the contested election cases, that bill in all probability would have been passed, and we would at least have seen the appearance of an increase of talk on the canal.

How true it is that Democracy holds the promise to the ear, but breaks it to the heart. It becomes the people of Allegheny to hold a strict accountability those who have so shamefully neglected their interests.

For the Civilian & Telegraph.

The Necessity of Industrious Habits in the Young. Man was never created for a life of inactivity. When God constructed the wonderful machinery of the human frame, he designed it, not only to be a beautiful ornament in its rest, but to be a useful and active power. The idle man is, therefore, in God's universe, like a dumb thing placed in a family room—a mere show without utility.

Activity and industry being the destiny of man, it follows as a natural consequence that the earlier such habits are formed in youth the better will be the prospects of a useful life.

Habits of industry or idleness formed in youth, as years increase become a second nature, so that the idle boy, in all probability, will be an idle man, and the industrious boy or young man, become an active and useful citizen.

Let us illustrate this view: Here is a boy who is always busy, whatever be his occupation. If he has manual labor to perform, he does not shrink from labor, or procrastinate until the last moment.

He feels a pride in the accomplishment of his work—feels that he is something, an active, busy, useful something in the world and not a nothing.

He is an active boy at study, and one of the strong boys at manly play. There is not a drop of slothful blood in him.

Mark that boy—look out for him in some high station in manhood. He will not, perhaps, be President, or become a master of armies—a master fighter, but he will be a master workman, in whatever part of our world he may act. He will be a master worker in wood, stone, iron, or on the minds and destinies of his companions.

See another of the same age: He is idle of all employment. He shuns every useful occupation as if he were infected with some contagious disease. He will go an errand of half a mile in half a day, and never need be cautioned against over exertion at the hardest work.

He is always tardy at school, and never excites the envy of his school fellows by extraordinary advancements. He is good at no play, except marbles, and at that he is most always beaten, as he counts every motion of his hands and feet at an exorbitant price.

Look out for him. He will in all probability become a man, because it requires no exertion to grow, if he did, he would likely always remain a boy. He will never do anything wonderful except it be some miserable act to avoid the consequences of idleness. He will be a more eating and drinking machine in the world—a movable clothing pest—one of the drones in the world's hive.

There is a young man who is always employed at something beneficial to himself or others. He never lounges during work hours on store boxes or loafs at the corners of streets. His hands are perpetually hardened by labor, and his face darkened by exposure to the weather.

Don't turn away from him—he is a man, one of God's noblemen, obeying the commands of nature and circumstances. His home will be well supplied with the comforts of life, and his wife and children will never have to blush for his shame.

In the background of our picture stands another specimen of humanity. Hands in pockets, laziness with cheap jewelry, and with a dingy air he stands the personification of idleness.

He is wonderfully afraid of the contamination of labor. If he had lived with Homer he would have begged a place on Olympus, to enjoy the *otium cum dignitate* of the Neotarian banquet.

He is busy, it is true, from morning till night, but with him it is always, "Much ado about nothing." The world owes him a living, and he is determined to have it—that is, if he can get it without trouble. He is a gentle man, especially in all attempts at an honorable living. He touches nothing very roughly.

Such a man may live because he is in existence, but the world would not be any worse off without him. He will always be a drone in public and private.

Whom none can love, whom none can thank, Creation's blot—creation's blank. Duty, industry, and honor call upon all to form industrious habits in the spring time of life, that the summer may be beautiful, the autumn plentiful, and the winter of life peaceful and happy. A. J. W.

Important Fact. HAVING made arrangements for the exclusive sale of J. G. COCKRELL'S MILL-VILLE BRAND OF FLOUR, manufacturing in Jefferson county Virginia, we shall hereafter receive regular supplies of the different grades—all of which we can recommend as inferior to none in the city. The FAMILY FLOUR especially cannot be surpassed by any, and we shall also receive full supplies of Canada Best Superior Flour, which has heretofore given such entire satisfaction.
