Working Men, read and consider the facts set forth
in the following article. A distinguished Adminis-
tration Senator openly advocates the odious wages
Treasury scheme, because it will reduce your wages
for the labor of your hands? Will you support an
Administration, a part of whose foreign labor
to reduce you to the condition of those foreign labor-
ers, enumerated below. Are your wages too high,
in that you are willing to assist the administration in
reducing them? Look to this matter attentively—
reducing them? often repudiated by the people is
this measure so often upon them; and it aims a blow di-
rectly at your interest, already suffering greatly by
the universal hardness of the times. Read and re-
flect upon the following facts:

POLITICS OF WORKING MEN.
A few days since we referred to Mr. Buchanan's
argument, that the amount of money in the country
and the wages of labor must be reduced, before we
can enjoy permanent prosperity; and that these bless-
ings are to be brought about by the Sub-Treasury
scheme. We showed the following to be the rates of
wages in some of the countries to which Mr. Buchan-
an referred as patterns for the working men of
America, viz:

France.—Wages of common laborers, seven and a
half pence per day, and find the food for their
families.
Sweden.—Men on farms daily wages from four to
eight pence per day, and board themselves.
Bavaria.—Laborers paid 5 pence per day and board
themselves.
Belgium.—The best artisans and mechanics, one
shilling per day. Wages lower on the farms.
Germany.—Laborers from 2 to 7 pence per day,
without board.
Netherlands.—South Holland, laborers from three
to four pence per day without board.
Italy.—Frieste, laborers twelve pence with board.
Tuscany, six pence per day without either board or
lodging.
Saxony.—The wages for weavers and other man-
ufacturers, about 10 cents per day.
Mr. Buchanan says that the rates of wages will
render money so scarce that the manufacturers of the
United States will be able to compete in our markets
with the manufacturers of those countries in which
the laboring classes far as above stated in the way of
wages. We have entertained the opinion that it
would be better to pay a tariff on the productions of
foreigners sufficient to keep them from our ports, than
to reduce the wages of the poor, who have difficul-
ties enough to contend with in the best of times.

In order fully to show the working men into whose
hands this may fall, to what a miserable condition the
Van Buren administration wish to bring them to, as
well in regard to food as wages, and we have com-
piled the following facts from authentic works upon
the subject:
France.—In some of the districts, the food of the
poor consists in rye bread, a kind of soup made of
millet, cakes of Indian corn, now and then some salt
provisions, and vegetables, but rarely, if ever, butch-
er's meat. In other districts, wheat bread, soup
made with vegetables and a little grease or lard,
twice a day, potatoes, or other vegetables, but seldom
butcher's meat.
Sweden.—The agriculturalists in the Southern
provinces live on salt fish and potatoes, in the north-
ern, porridge and rye bread form their food.
Belgium.—The mechanics live exclusively on rye
bread, potatoes and milk.
The other laboring and operative classes are similar to
these. The laboring and operative classes are in a
miserable condition. While a laborer in the United
States can live on the fat of the land, and indeed
working side by side with his employer, and eating
at the same table, the laborer in those countries of
Europe which Mr. Buchanan thinks are so excel-
lent patterns, must subsist on but one kind of diet,
and that of the coarsest kinds. In every other respect
the working men of these countries are equally de-
graded, compared with the working men of the Uni-
ted States. With us a man may rise, by talent, in-
dustriousness, and prudence, from the lowest to the highest
station in society or the government; but in the Euro-
pean dependencies, he who happens to be born a peas-
ant will always remain so. There is no chance for
promotion there.

We feel every confidence that the working men of
the country will resent, as it deserves, the insulting
proposition of Mr. Buchanan; and if the sub-treasury
bill be passed, its repeal will be demanded and en-
forced by the people before a year. In a day or two
we will point out to our readers one or two of its ef-
fects, and also some of the reasons which may induce
Mr. Buchanan to support it strongly.—*Harrisburgh

A LEAF OF HISTORY.
A SUB-TREASURY BEFORE THE REVOLUTION.—It
is a fact not generally known that the sub-treasury
was once in full operation in New York, un-
der the Governors sent over by the Sovereigns of
England. From the "History of New York," by
Wm. Smith, A. M., with a continuation to the year
1840, we make the following extracts, which
go to prove that our Democratic President has
not been searching among monarchies for pre-
cedents without some success, though he very
wisely confined his investigations to the eastern
side of the Atlantic. Who will say that "revo-
lutions never move backwards?"

In the year 1691, under the administration of
Gov. Henry Slaughter, the General Assembly
established a revenue, of which the history speaks
thus: "Among the principal acts enacted at this ses-
sion, we may mention that for the establishment of
a revenue, which was drawn into precedent.
The sum raised by it was made payable into
the hands of the Receiver General, and issued
by the Governor's warrant. By this means the
Governor became, for a season, independent of
the People, and hence we find frequent instan-

ces of the Assembly's contending with him for
the payment of the debts to individuals, contracted
on the faith of the Government."—Page 126.
Gov. Slaughter was succeeded by Colonel Benja-
min Pletcher, a man of strong passion, very
active, and equally avaricious. In September,
1692, the revenue established for the year pre-
ceding was continued for five years longer. Gov.
Pletcher proved to be a sub-treasurer of the first
water, according to the history.
"At that day the Assembly had no treasure;
but the amount of taxes went of course into the
hands of the Receiver General, who was appointed
by the Crown. Out of this fund moneys were
issued only by the Governor's warrant,
from Mr. Blithwait, who drew annually five
per cent, out of the revenue as Auditor General
down to the meanest servant of the Public, be-
came dependant solely on the Governor; and
hence we find the House, at the close of every
session, humbly addressing his Excellency for
the trifling wages of their own clerk."—Page 142.

Gov. Pletcher was succeeded by Richard Earl
Bellmont, who, in his opening speech, gave
the Assembly his word of honor that he would
not steal the public money.
"I shall take care that there be no misapplica-
tion of the public money. I will pocket none of
it myself, nor shall there be any embezzlement
by others; but exact accounts shall be given you,
when, and as often as you will require."—Page
155.

Fortunately for the people: Lord Belmont was
a man of his word; but his successor, Lord
Cornbury, was so prone to practical sub-Treasury-
ism, that the Assembly refused to raise moneys
to be put in his hands, and address the Queen
of England.
"Complaining of the ill state of the revenue,
through the frauds which had formerly been
committed, the better to facilitate the important
design of having a treasurer dependant on the
Assembly."—Page 177.

Lord Cornbury was removed, and in June, 1721
the Assembly, according to permission from the
Queen, elected a treasurer.
In 1741, Lieut. Gov. Clark, in his speech to the
Assembly, complained of the encroachment of
the Legislature upon the prerogatives. His la-
mentation ran in this wise:
"Late Assemblies, having grown wanton by
prosperity, had abused the clemency of the
Crown, and had demanded the nomination of
their own treasurer; this demand having been
granted, they had further insisted on the particu-
lar appointment of the salaries of the officers of
Government, and absolutely refused to raise any
revenue unless this demand was likewise granted."
—Page 444.

The Assembly, in their address, in reply to the
Governor, said:
"That while the public moneys were at the
disposal of the Governor and Council, they were
misapplied; and that the Assembly, to correct
the evil, directed such moneys as were raised for
the forces intended for the security of the colony
to pass through the hands of a person appointed
by the Legislature; that Queen Anne had sanc-
tioned that procedure, and allowed the Legisla-
ture to appoint its own treasurer."—Page 447.

ASTONISHING CURE.—This is to certify that I
was for a long time afflicted with a bad Cough and Cold
which almost destroyed my voice, and brought on
many other dangerous and unpleasant symptoms.—
At the solicitation of a friend, I was induced to try
the "COMPOUND SYRUP OF GUM ARABIC,"
prepared by Dr. G. K. Tyler, when to my great satis-
faction, two doses produced a wonderful change,
and the third dose entirely relieved me; and I there-
fore feel no hesitation in my recommending it to my
friends and public generally.

LOSS OF TEETH SUPPLIED.—The best arti-
ficial teeth, manufactured in this city, are inserted at No. 7
Sharp street, on longer terms than at any other of-
fice, and on the most elegant and natural manner.—
The advertiser has for 18 years past been constant-
ly engaged in constructing for other dentists most
difficult cases of teeth, and trusting to his own ingenu-
ity and mechanical skill, he challenges any one in
the city to produce of their make, teeth equal to
his, either as single teeth, partial or complete sets, with
or without artificial gums, in point of beauty, work-
manship, and the immitable approach to natural teeth.
Complete sets fixed by atmospheric pressure at half
the charges made by other dentists, and warranted
no way inferior to any in the profession.

**CHANCERY SALE OF HIGHLY VALU-
ABLE BALTIMORE STREET PROPERTY.**—In virtue
of a decree of Baltimore County Court, the sub-
scribers will sell by auction at the Exchange, on the
30th April, at 1 o'clock, p. m., a part of the real es-
tate of the late Henry B. Griffin, deceased, being all
that valuable property described as follows:
All that piece or parcel of GROUND, situate and
lying in the city of Baltimore, which is contained
within the description following: that is to say, be-
ginning for the same on the south side of Baltimore
street, at the distance of ninety-two feet, westwardly
