Are You 40?
THEN, YOU ARE STILL YOUNG. Insurance companies would say you will live 30 to 35 years, if in good health.
If you had started at 20 to save \$10 a week and had invested your savings here in a 4 per cent compound interest account, at 40 your money would be bringing you more than \$50 a month interest, and without any worry or effort on your part. During this time, your savings earned \$5,500 in interest.
ARE YOU 40? If you are, you expect to live beyond the age of 60. Ten dollars a week saved until you are 60 will bring you a small fortune.
