Another would plead with father: "Father, don't whip me any more. Oh, don't whip me any more. I got up and got up and went to bed about ten o'clock. He said he did not know why father whipped him so. He never told stories, only when he was in the yard, and he would say if he didn't do so and so he would whip him, and to avoid it, brother would own to things he never did. Wednesday I got up and got up and ready. Father rose, the breakfast was ready, and brother got up, but he so badly he went back to bed. Father made him get up, and go out and feed the stock, and when he came back, father whipped him on the back, and he went to the field. He went for him and brought him back, and made him take off his clothes, and then whipped him, and tucked him up and laid him on the stove. The stove was hot enough to heat him. I was baking biscuit. Father put him on the stove twice, brother pleading all the while. "Father don't hurt me," he screamed very loud; his skin came off his back and his feet, and stuck to the stove; it swelled so I opened the door, and father immediately secured, while he was in the yard, and said he would hurt him until he worked; I have seen father strike mother with his fist many times; he knocked brother down several times with the butt end of a long pipe, and never saw brother after he went into mother's room.

Friends and Brethren--In accordance with time-honored custom, the Tammany Society have assembled here to-day for the purpose of listening to the patriotic fire which caused the organization of the institution. We are gratified to find that the interest the Tammany Society have striven to protect, the interest they have striven to advance and striven to organize, meets the approbation and approval of so many of our fellow-citizens. In these great and perilous times, a standard must be taken. The Tammany Society must be governed by those rules which have made all countries powerful which have followed them. Let the issue of the interest, one shall be the interests of all. We propose to carry on a strict government. We propose to recognize the rights of those who elect power to themselves, and to call them to personal account for the manner in which they have conducted themselves and performed their duties.
