POLITICAL GLEANINGS.

We have no authentic statement of the contents of the dispatches from Washington on the subject of harmonizing the Republican party...

'What will the Last-Ditchers' now do?' is the question agitating the popular mind. Repudiated and rebuked by the highest Democratic authority in the land...

The Citizens' Guard published a recent Baton Rouge correspondence, detailing an alleged split in the Liberal Republican ranks...

Prominently displayed at Haley's, on Commercial place, is an excellent engraved portrait of Horace Greeley...

Colonel Eugene Waggoner made a last ditch speech at Keller market last night. He told those who had patience to hear him through all he knew about Warmoth and a good deal more...

A gentleman of many initials, at a meeting Wednesday night, let out the fact that the Last Ditchers tried to play it very fine for the Liberal campaign fund...

The national irregularities, for which the present national administration and its inefficient officers are mainly responsible, will explain the failure of Mr. Lasere to receive the communication from Mr. Schell...

Mr. Lasere, president of the Democratic Central Committee, disowns any knowledge of the letter furnished you in the Schell-Allen correspondence...

Mr. Lasere, president of the Democratic Central Committee, disowns any knowledge of the letter furnished you in the Schell-Allen correspondence...

Death of President Juarez.

Our latest dispatches from the Rio Grande bring us the news of the sudden death of Benito Juarez, President of Mexico.

The death of this great man is a calamity alike to our nation as his own, for his people will hardly find a man of the nerve, determination, sound judgment and liberal views to succeed to the control of that most uncontrollable nation...

Benito Juarez was a full-blooded Indian, from the mountains of Oaxaca, and was probably about sixty-five years of age.

As Chief Justice of Mexico, when Comonfort was assassinated, he became President, even as Lerdo de Tejada succeeds him now.

It was during his first term of office that the allied European powers invaded Mexico, crowded him to the frontier town of El Paso, and left Maximilian Emperor of the nation.

The details of the struggle, which ended in the shooting of Maximilian, Mejia and Miramon at Queretaro in 1869, and the re-establishment of Juarez in the national palace at Mexico, are still fresh in the mind of our readers...

He ruled his people with an iron hand, but they could be ruled no other way.

The abolition of the Cesar of all the Russias was not more arbitrary than the republicanism of Juarez.

And now that he is dead, we predict continued and continual internal wars until poor impoverished Mexico, to save herself, will lose herself in us.

The R. E. Lees returned to St. Louis from Chicago, where they could not get a game, and last Monday played their second match game with the Empire nine...

The score was 7 for the R. E. Lees to 14 for the Empire.

It is stated by private dispatches that the announced return match at Chicago for Wednesday of the Lone Stars and Riverides of Evansville, Indiana, was not played...

Death of an Old Steamboatman. Captain T. C. Holmes died in the twilight instant at his residence in Middleborough, Massachusetts.

For New York by Sea. At this season of the year a trip to New York by sea is exceedingly pleasant...

The Onachita parish Liberals have selected the following delegates to the State convention...

MEETING AT KELLER MARKET.

A Proposed Discussion—A Disposed Mass Meeting. It being proposed to hold a discussion on the issue of the day between the Liberal on the one hand and straightout Democratic party on the other...

The Stampede from Grant to Greeley.

This is a special to the St. Louis Republic. New York, July 25.—Wallace Tappan, of Syracuse, of the Republican State Committee, is the third member of that committee to formally resign and go over to Greeley...

The following is a part of Mr. Tappan's letter: No one who knows Horace Greeley can do him any political injustice, his sincere motives, his great efforts in behalf of reform, his unflinching advocacy of that which he claims to be right...

International Prison Congress. This is a special to the St. Louis Republic. New York, July 25.—At last English advice the International Prison Congress was held in the early stages of the year...

Navy Yards Used to Make Grant Voters. This is a special to the St. Louis Republic. New York, July 25.—Activity prevails at the Brooklyn navy yard, but for no essential reason...

Horace Greeley and Jefferson Davis' Ball Bond. The following mainly true was written by Mr. Greeley to a citizen of Washington at the time he went on the ball bond of Jefferson Davis...

Dear Sir—I beg you not to feel concerned about me. I shall stand straight up to the rack and, though I expect to lose a good many subscribers, I mean to be vindicated in the end by the good sense and right feeling of the people North and South...

Railroad to be Changed to Narrow Gauge. Among the improvements contemplated by the Erie Railroad Company is a change from the broad gauge of six feet to the narrow gauge of four feet...

This is from the Clarion Advocate. The route that Colonel Scott favors of railroad connection between New Orleans and the completion of the gap from Strevensport to Monroe, thence to Vicksburg, thence to the Mississippi to Baton Rouge, thence to Pontchartraine, a point on the Jackson road...

Little doubt is entertained by Rev. C. K. Marshall, who went to New Orleans yesterday to consult Colonel Scott, that the first of August matters will be arranged to connect Shreveport and Monroe.

From General Young we learn that Colonel Scott has already made an arrangement for buying the road with its present holders, represented by Messrs. J. A. Ludlow & Co., and has obtained the consent of the fire department (Messrs. Grant), who were on their way to Georgia in the hope of effecting a similar arrangement with the remaining bondholders...

A New Yorker just returned from Mississippi says that the secret of Southern enthusiasm for Greeley is the confident belief of the people that they will get paid for their unrepaid slaves if he is elected.

The Shreveport Republicans say: There is, of course, much talk about Governor Warmoth, but one fact all agree upon—Henry Clay Warmoth is the pioneer of the reform movement in this State, and his reform messages to the Legislature have done more to bring about reform and reform at all times.

The Woodville Republican says: We understand that the army corps is on the plantation of Mr. William Crisp near Mount Pleasant, without a doubt, and he is also fighting them. Let every planter and land holder be warned to exterminate these creatures of Satan in the opinion of Dr. D. L. Phares, and the worms will not be able to do any serious damage.

Contracts for Naval Supplies—Death of a Negro Minster Flayer.

WASHINGTON, July 25.—The contracts for naval supplies will be awarded next week, as noticed. The list of articles to be furnished is very large, embracing all kinds of stores and materials necessary for the construction of vessels and for the navy yards, the entire cost of which will be nearly \$100,000 from the present time until the end of the fiscal year.

John Keegan, the negro minister flayer, who was recently accidentally shot during a performance, died to-day.

NEW YORK.

Sale of a Million of Government Gold—Burning of the Catholic Protectory—Loss \$150,000—Specie by the Westphalia—Erie Railroad Shops Burned—The Last Ditchers' National Democratic Committee's Headquarters.

New York, July 25.—The government sold to-day \$1,000,000 gold at prices ranging from 114 3/4 to 114 5/8-100.

The loss by the burning of the Catholic Protectory at Westchester, this morning, amounts to about \$150,000. It was an educational home for vagrant and criminal Catholic children, presided over by the Sisters of the Sacred Heart. The building was 500 children homeless. All the children were rescued without accident.

The Westphalia took to-day \$75,000 in specie.

The Tribune publishes a notice that the Times has a reporter who conceals his calling in order to make notes of private conversations of A. S. Greeley's Saturday visitors at Chappaqua. Greeley will not entertain after this week.

The French ball will not return until August 16.

Great excitement last night a fire broke out in the carpenter shops of the Erie Railroad Company, near the end of Long dock in Jersey City, which shops formed the eastern end of the parallelogram of shops, covering an area of 300 by 250 feet, the western end fronting on Prevost street.

The fire started in the boiler shop, and spread to the repair shops and machine shops, the blacksmith, carpenter and paint shops and the general storerooms of the company. Before the shops were destroyed, the flames extended along the roof of the machine shop, and bursting out of every window for 300 feet.

In less than an hour the whole block of shops was in ruins. Within the repair shops there were thirty-three locomotives, about half a dozen of which were almost new. Most of them were freight engines, but several were passenger engines. The machinery was of the best quality, and the repair shop, where five hundred men were employed, was full of costly machinery, boilers, trigs, hammers, furnaces, etc. One of the trigs, valued at \$30,000, was within a month. The buildings also contained copper, tin and wooden patterns and a full supply of the best tools for railroad purposes.

The shops were of brick, two stories high, with slate roofs, and were only completed eight months ago, at a cost of about \$80,000. Some workmen state that the fire was occasioned by a spark from a locomotive in the smith shop when the men left at six o'clock. Another account says a barrel of oil exploded; cause unknown. Still another account local to the community in the carpenter shop, where five hundred men were employed, was full of costly machinery, boilers, trigs, hammers, furnaces, etc. One of the trigs, valued at \$30,000, was within a month. The buildings also contained copper, tin and wooden patterns and a full supply of the best tools for railroad purposes.
