High Water and the Levees. The Mississippi river has now almost reached that interesting point—high water mark of 1874...

Opposite the French Market and just below the levee and the water is over the levees and is only prevented from running into the streets by the railroad tracks...

City Surveyor Bell yesterday visited the upper portions of our city, going to the limit and then making a close inspection all the way down...

Above at Camp Paraper, and in that neighborhood, the danger has been suggested of crevasses, but laborers have succeeded tolerably well in fighting the flood...

On the right bank people anticipate an overflow at several points, but at dark last evening nothing had been reported of a startling nature...

At Louisiana Street, Third District, war ran over the levee, but sufficient labor and earth were obtained to prevent a crevasse...

General Thompson has gone to Thibodaux, having been informed that two miles below that city there was a crevasse full fifty feet long and six feet deep...

Our country exchanges do not bring us good news. The Ochsler Telegraph of the third instant says:

The water in the overflow between here and Delta is said to be rising at the rate of two inches in twenty-four hours...

Whereas, The Chamber of Commerce is advised that Senator J. M. West has introduced the bill to amend the act...

Resolved, That in the opinion of this Chamber the arguments advanced before the committee of the Senate and Congress...

The Plaquemine Sentinel has the following in its issue of the fourth instant:

A break occurred in the St. Sophie levee at the river line in front of C. S. Claiborne's farm. The neighbors immediately rallied and closed it in a short time...

The Pointe Coupee Republican of the fourth instant says:

The levee in front of the Berard plantation and the Catholic church relinquished its foundation to the turbulent, wildly rushing waters of the Mississippi River...

The president then read a telegram from Messrs. Hebert and Forshey, to the effect that the detection of Senator West did not discourage the committee.

An interesting paper on quarantine regulations and the use of disinfectants was then read by Mr. Bayley, and the views therein expressed endorsed by the Chamber.

General Saylor, member of Congress from this district, was then introduced, and spoke at great length concerning the superiority of the No. 33 Philip canal project...

The Fifth District Court was occupied all day in trying a single rule. The week has been set apart for the hearing of motions and rules, but one each day is not progressing much.

The Board met pursuant to the call of the president. Members present—State Superintendent William G. Brown, president...

On motion of Superintendent Boothby the following were appointed as school directors for the city of New Orleans, were confirmed, viz:

On motion of Superintendent Boothby the following named appointments of school directors for the city of New Orleans, from the act in that behalf passed...

Superintendent Stoddard, for the superintendent of the first division, recommended the confirmation of George Ingram as school director for the parish of St. Tammany. Appointment approved.

Superintendent Stoddard gave notice that at the next meeting of the board he would move the amendment of rule four of the rules and regulations of the State Board of Education by striking from the standing committee the committee on text books.

On motion of Superintendent Boothby the board adjourned.

Just look at the list of prizes offered. Just look at the list of prizes offered. Just look at the list of prizes offered...

Chamber of Commerce. The regular monthly meeting of this body was held last evening.

The usual routine business was gone through with when a report from the committee on river obstructions was read.

Mr. Sandberg, the vice president of the Chamber, made a verbal report relative to a new bill under consideration...

The unexpected and utter probability of our water approaches to this city, it seems, were adverted to in marked terms by the Commodore, and from motives of prudence the subject was thereupon dropped...

It would appear that we have not enough water at the mouth of our river to admit a full-sized vessel to pass, therefore it would be useless to establish a narrow navigation here.

Mr. G. W. R. Bayley, the chairman of the committee on railroads, here read a report setting forth the present condition and non-progress of the project now on foot...
