WHAT IS THIS?

An Overdose of Morphine—And Why?

A lady was found dead upon her bed. Investigation showed that she had been a terrible sufferer from nervous weakness and prostration, probably aggravated by Spring Debilty which so weakens us all at this season of the year.

A peculiar after-effect of the Grip is that owing to its extreme weakening effects upon the nerves, it makes people feel blue, depressed and discouraged and without their former joyous feelings.

It is strange that those foolish acts as suicides can take place when at the present day it is well known that these weakening nervous diseases can be easily cured by using that great discovery for the nerves, Dr. Green's Nervura.

"I employed 2 doctors for my wife. Man pronounced her incurable, some advised placing her in an asylum, while others did her no good. She had poor blood, was weak, nervous, debilitated and half crazy. She had neuralgia, and her kidneys were very bad. Dr. Green's Nervura has completely cured her. She thanks God that I bought Dr. Green's Nervura."

N. B. King, Danvers, Mass. Dr. Green, the successful specialist, in curing all forms of nervous and chronic diseases, 35 W. 14th street, New York, can be consulted free, personally or by letter. Call or write him about the case, or send for symptom blank to fill out, and a letter fully explaining your disease, giving advice, etc., will be returned free.
