Said James W. Ransom yesterday: "I have examined at various times the salary lists of many cities of about the size of Grand Rapids, and find that as a general rule none of them have a salary list less than that of this city, and very frequently it is higher. The salaries of our aldermen are about the same or perhaps a little higher than the average. I do not see how the city can economize in this particular and still pay any regard to efficiency. If we economize let it be in the way of luxuries, parks, street franchises and the like."

Knew How to Drive. A Hollander who was driving a horse on Leisler street yesterday attempted to give an exhibition of the proper kind of driving to be used on brick pavement. Of Course You Know

about the one day excursion to Chicago, to be given by the Chicago & West Michigan railway and Michigan Central railway, Tuesday, June 7th. It's common talk about town and seems to be "quite the right idea."

Why?

Well, because it gives, for instance, to many who cannot afford the time and expense of a more extended visit an opportunity for a half day's business or six hours' sight-seeing for a little money. It suits everybody. The business man who only wants a few hours to "see a man," perhaps, and is glad of the chance to make the trip and get back home the same night. Then it's popular with young people for the same reason; they need not be away from home over night. See the point?

Everybody wants to see Chicago with its many beautiful parks and magnificent buildings, and, of course, the great World's Fair buildings, some of which are now nearly completed. It's worth a day's journey to see them alone. Better arrange to go. Train will leave Union station at 6:30 a. m., and arrive in Chicago about 12:30 p. m. Returning, leave Chicago, Michigan Central station, at 6:30 p. m., giving six hours' in Chicago. ROUND TRIP FARE, \$3.70.

Get your tickets at No. 67 Monroe street, or at station. Better get 'em uptown, if it's convenient, as there will probably be a crush at the station.

A \$10.00 Atlas condensed and compiled in the most comprehensive and ready reference manner possible, and printed on one sheet of paper.

A large map of the world with a special Map of the United States, England and Wales, Germany and Norway and Sweden—comprehensive diagrams of mountains and rivers, an alphabetically arranged compilation describing every country in the world, and its location indexed.

On the front of this marvelous publication we have printed the LARGEST and BEST MAP of the UNITED STATES ever made on a single sheet of paper. Each state is shown in separate color, with a special transparent outline designating state and county boundaries.

It is carefully corrected to date, showing every line of railroad and all important cities and towns. It is large enough and complete enough to fully meet the demands of a student or business man. A child can, with this map, study the geography of the United States with intelligence. The reader can, with accuracy, locate the notable happenings of the day, and the merchant can lay out routes for his travelingmen, or ship goods with economy.

In fact, it is a COMPLETE and ACCURATE map of the United States, 66x46 inches in size. On the other side we have printed the library chart of the WORLD.

A panorama of the surface of the globe, on Mercator's Projection, with its lands and water, mountains, rivers, lakes, bays, seas, and islands, all properly located and beautifully tinted by our patent process of oil colors.

Around the margin of the map we have printed statistical and descriptive matter of more value than can be found in any volume that was ever published at Three Times the Cost. The different divisions of the world are arranged by continent to show their area, form of government, chief executive, capital, and population. A series of short articles arranged alphabetically give, in a remarkably concise and comprehensive form, a description of every country or government in the world, no matter how small, together with its chief products, exports and imports, and its exact location on the map shown by our ready reference index.

Edges bound with tape, sticks top and bottom, ready to hang on the wall.
