LINES TO MY DAUGHTER.

BY GENERAL MIRABRAU H. LAMAN O, do not ask me now for rhyme For I am louely hearted, And gone are all the dear delights The muses once imparted. I sigh ne more for Hybla's dews, Nor Helicon's bright water, I only crave the sable wave

But would'st thou share thy father's woe, Then go with me to you valley's shade, Where beauty's wreck lies sleeping. For in that dark and lonely spot, Death's solemn, silent quarter, Is laid the pride of all her sex-The mother of my daughter.

Of Lethe's stream, my daughter.

She was all bright and beautiful, Whose lustre was my shining light, Forever skining o'er me ; So angel like in all her ways, Some scraph sent us from the skies. To cheer this earth, my daughter

It was from her alone I drew My minstrel inspiration : And when she died and left me here, My soul in desolation. I broke the harp she loved so well, And burnt the songs I wrought her Nor can my heart again rejoice In cheerful strains, my daughter.

Then ask some other boon, my child, Thou know at I can't deny thee ; Whilst thou art smiling by me; For should I dare restring my harp By Chattahoochee's water, The bitter tears of other years Would flow afresh, my daughter,

THE NEWSPAPER PRESS. AN ESSAY BY J. A. SIGNALGO.

I cannot but consider it unfortunate for the press association that I should have been designated as Essayist for this interesting occasion. And, I should be more diffident and distrustful of myself, were I not aware that there is no one among you who has not experienced the pressure and claims upon his thoughts, his ingenuity and his fortitude, upon whom devolved the "all work " of his establishment. With this brief explanation, I throw myself on your indulgence for any shortcoming, and proceed as well as I may, to examine a subject in which, however hackneyed it may be, we are all more or less interested.

The newspaper press is the great lever of society. Its leaves are strewn as thick as those in "Vallambrosa's shade." Its influence permeates the great arteries of trade and commerce, and returns to invigorate and refresh community through the smaller channels of industry and art. Genius has not so dear a friend, and without its aid would be shorn of more than half its power of flight, and would be restricted to a comparatively limited orbit. The mind, in its outpourings, may reach a multitude of readers, through the instrumentali ty of the newspaper, which otherwise would be confined to a single audience, or, at best, be transmitted through the medium of a "still small voice." Deprive the pen of the convenience of the press, and it might as well have remained "a grey goose shaft," or left the wing of that amiable biped to whose gobble was once attributed the salvation of "the queen cities- the metropolis of the world. Nor could the great Cardinal have so

truly described it as mightier than Perhaps in no department of art or science, or literature, and they all are intimately associated with, and measurably upon it, have there been greater strides toward perfection, filling a space that else would be a barren waste, if not a useless, monotonous | vacuum, than the newspaper even within our own day. It has become a daily record of transpiring events in every quarter of the globe, on sea or land. It reflects the sa gacity of the Minister, the determination of Parliaments, Chambers, Diets, Cortes and Legislatures, as soon as expressed; and no occurrence can transpire, of the slightest general interest or importance but it is transmitted on the wings of the the uses of the newspaper. Ephemeral it, to a certain extent, must be, because events tread on each other's heels with such rapidity, it must be fast to keep pace with the age, and its columns require an amount of ability and tact unknown to former times, when lumbering heb domadals won fame and renown through the instrumentality of a "Spectator," a "Rambler," a "Tattler," or the many other vehicles of thought which brought to light the brilliant essays of ADDISON and his cotemporaries. The division of time

and labor among a half-score of edi tors distinguished for literary, scien tific and political attainments, with the aid of a score of reporters, many of them not a whit behind their so called superiors in requisite qualifi-cations, is now deemed necessary to complete and finish off the freight. age of the well alled columns, so that all is as clear as a domonstration of EUCLID, and "one who runs may

True, this elaborateness is not visi ble throughout the whole newspaper press. It is, for the most part, restricted to first-class cities where re muneration for enormous expendi tures may be confidently anticipated It would be the hight of folly and the extreme of madness to attempt an enterprise on so grand a scale, This is the way, he tells us, how he outside of a populous city, or where came to write the "ballad" of his the wants and requirements of the community are less universal. But such is the tendency of the age, and there is not a newspaper in a country village, heedless of the universal spirit, that is not speedily known, and voted on all hands, as "a slow

The newspaper press is a power in as well as tear down. One of the first principles acknowledged in the great magna charta of American freedou, was the independence of the press, and its protection by guards placed around its unquestionable prerogatives, while a libellous and scurrillous press was to be deprecat ed, the fathers wisely determined that the truth could be no libel, and that the press should be free and un constrained. Oh dear, I'll be carded, and and have considered the newspaper prepared for this occasion on the and caprice, without weighing the potency with which it may be wielded for good or for evil.

A first class newspaper has in great degree, concentrated in itself that broad and comprehensive range of reflection which was once confined to books, pamphlets and elaborate essays. It is the great teacher, ga-thering and illustrating the experiences of the past and prospecting for the future. It is like a map of events where every occurrence may be traced to its origin, and matters otherwise mysterious, made perfectly plain. To do this successfully requires the employment of numerous minds, suited to the several departments in which they labor, filled with the lore of the past, and skilled in the happy art of ready composition and comp lation. Attractiveness is not always bern of novelty, but may be wrought by placing facts in a new light, and presenting them in a clear, distinct form. It is well " To eatch the living manners as they rise,"

and to lose no day in the full and thorough history thereof. A dull, plodding clod may not perceive a single salient point, where a thousand suggestions will occur to the practical journalist. An orator is said to be made by practice and study, and the poet to be naturally endowed, but it is very clear that neither can attain great eminence with out the exercise of his faculties, and undergoing the experience suitable to educe those qualities for which he is to be distinguished. It is even so with the journalist, who, besides natural gifts and high literary and profound legal attainments, must undergo a trying noviciate before he can properly comprehend the multi the land. It has power to build up farious duties he is called upon to discharge, and the rapidity with which the apparently most elaborate articles on difficult and different subjects must be prepared. Since it must be conceded that the

press is a most potent engine, it becomes a matter of great consequence that it should be in competent, intelligent and honorable hands. It is the Press Association of Mississippi was formed. Rhett and Conrad.

A correspondent of the Mobile Register, writing from Montgomery, relates the following incident which took place in the first Confederate Congress, and which he says has

never heretofore been published: It was the custom to open the session of Congress each day with prayer, the clergy of the city officiating by turns. One day no minister was present, and Mr. President Cobb told one of the Secretaries to look around and try to find one, as it was time to open the session. The Secretary soon found the Rev. H. W. Hilliard, ex-Minister to Belgium, who, it was said, was not unwilling to represent the Confederate States at any foreign court. Mr. Cobb requested Mr. Hilliard to open with prayer, which Mr.H., being taken by surprise, with

his usual urbane smile, declined to R. Barnweit Shett and Charles M every question before and whenever one spoke on any sure, the other would certainly take the opport e side. Bear these facts in mind, and you
