The Mark Lane Express in its review of the British grain trade for the past two weeks, says: All out door work is again stopped by the frost. Threshing occupies the attention of the farmers and home grown wheat is consequently more liberally offered in some districts, notably Yorkshire. Fears are expressed that recently sown wheat has been frosted or from some other cause is deficient in vitality. Many of the early sown fields elsewhere, however, are looking well. Some improvement is noticeable in the condition of home grown wheat offered at country markets but all except the choicest lots have been neglected. Imports of foreign wheat into London have been moderate, and in the American especially a small business has been done and the week's demand was of the ordinary consumptive character, principally for descriptions of foreign wheat available as a substitute for English. According to a moderate compensation it is estimated that the requirements of Great Britain and France will reach 12 000,000 quarters between this and August exclusive of the quantity afloat. Notwithstanding this trade continues discouraging to holders as a consequence of the liberal stocks to select from, and bad demand for our millers have shown no desire to do more than meet the present requirements. Horace Thompson, President of the First National bank in St. Paul Minn left home for New York Jan. 15, accompanied by his wife and adopted daughter, and also by E. F. Drake and John L. Merriam. The party reached New York Jan. 19, and took rooms at the Fifth Avenue Hotel. Mr. Thompson and his associates visited New York on business connected with the extension of the St Paul & Sioux City railroad, On the afternoon of Tuesday, Jan. 27, the cashier of the First National bank received a telegram from New York, stating that Mr. Thompson was danger. ously ill with pneumonia. The news spread rapidly and produced great anxiety in St. Paul. Other telegrams followed. One dated 10:20 p. m. stated that he was sinking and all hope lost-another announcing his death at 10:30 a. m., Jan. 28. The news of his death produced a profound sensation in St. Paul, Mr. Thompson was born in Poultneo, Vermont in 1827, and was therefore in the 53rd year of his age. When quite young, he and his brother, James E., went to Georgia and opened a dry goods store. There he married a daugh ter of the late Judge Scarborough. In 1854 the brothers removed to St. Paul, and engaged in private banking. Afterwards they organized the State Bank of Minnesota and in 1863, with the State bank a sa basis the brothers organized the First National Bank of St. Paul, of which James E. was chosen president and Horace Cashier. On the death of James Horace was chosen Pres. which posi tion he oc cupied at the time of his death. He wasthe largest stockholder in the bauk owning one fifth the entire capital of a million dollars. Besides his wife and adopted daughter, Louisa Miller, he leaves two sons, Horase aged 26, and Charles about 15. A strong and honorable man has fallen in his prime, and the more his death is contemplated, the more it will be felt as a public calamity.

A New York telegram of Jan. 28th reports as follows: Mr Thompson was down town on business Saturday as well as usual except for an incipient carbuncle on his chin. [Philadelphia Times.] A case of hydrophobia, ending fatally yesterday, is remarkable for the presence of number of features and the absence of others which, the attendant physicians say, have seldom if ever before come under their

Mrs. Mary R. Lindermier, the victim, was widow who, since her husband's death, some years ago, carried on the business of the beer saloon, No. 614 North Fourth street, being assisted by her son, a young She had one remarkable hobby that all the neighbors talked about—a fondness for raising poodles, of which she had had five in the house for some time. She also a habit of picking up homeless or injured little dogs wherever found them, taking them home caring until were restored to health and plumpness, when she would seek some neighbor desirous of adopting a house dog. Between six and eight weeks ago—she could not remem ber the date, and all efforts to ascertain it exactly have been unsuccessful—she was attracted one evening to the sidewalk by the yelping of two poodles that she had let out to play. She saw a strange little dog trying, as she thought, to hurt one of the poodles. She saw a strange little dog trying, and upon her stooping to pick up and carry away her pets the wicked little stranger snapped at her and left the marks of his teeth on the back of her right hand, just above the foreinger. The wound bled slightly, but she regarded it as a mere scratch, requiring no attention more than the application of a lotion that she got at the drugstore just opposite her house. supposed that the dog belonged to a neighbor and never thought that it might have been mad. Whether the dog was mad or not, the doctors and friends have been unable to ascertain, and all efforts to identify the animal have been unsuccessful.

THE FATAL SCRATCH.

Attending to her duties, as usual, she seemed perfectly well until Tuesday of last week, when, after ironing a lot of clothes, she complained of unusual weariness, and particularly of a sharp, shooting pain in the right arm. Next day she felt as well as ever, but on Thursday the feeling of tiresomeness returned, accompanied by pains in both arms and something like intercostal neuralgia. Dr. James Collins, of 536 Marshall street, came at her call, and she told him she thought she had rheumatism. He prescribed some-thing that eased her, and, not suspecting hydrophobia, he supposed that she was all right again. Being called on Saturday he observed peculiar conditions. Crossing the street to Mr. Lawson's, the druggist, Dr Collins remarked that it seemed like a case of hydrophobia. The druggist recalled the dog bite and, if Dr. Collins had doubted be-fore, he was now convinced. He learned that on the previous evening she had come to Mr. Lawson for a drink of lemonade and he observed that she swallowed it with seeming aversion and difficulty. When the doctor returned to the house and brought water in sight of the woman she showed alarming symptoms—a great dread of something and extreme restlessness and irritability. These continuing, she was taken, by the doctor's advice, to the German Hospital, but there she showed such suspicion of everybody's motives and became so uncontrollable in her spasmodic actions that three hours afterward, she had to be brought home again. Dr. Collins now called upon Dr. Charles W. Milles for assistance, and the two, after talking over the matter with Dr. F. H. Gross, Dr. E. Santee and Dr. Charles Turnbull, decided upon a course of treatment to which they ascribe the subsequent abfence in this case of that violent convulsive action which in other victims of hydrophobia has necessitated holding by several strong men or tying fast to a bed.

FIGHTING THE DISEASE, The principal remedy used was a sulphate of the South American Indian war-arrow poison, called curar or woorars. Among othter palliative agents employed were

The doctors desired to paralyze to a certain extent the muscles that produce spasm. The sulphate, called curare or woorara, was administered bypodermically in a filtered solution, each injection containing a small fraction of a grain of the poison. On Sat urday night when she was quiet and perfectly conscious, reference being made to the dog, she said she did not believe that he wa mad. Then as she complained of thirst water was brought and placed in her hand, whereupon she exclaimed, shudderingly: "Oh I can't drink." Dropping the glass she continued spasmodically: "Oh, my heart would stop. It would kill me." She took a little ice in her mouth, however, which relieved her, but next day she could not look even at the frozen water. Her last drink was or Sunday morning, when with great exertion she swallowed some milk punch. The only time when she would touch food, after Fri day, was on Monday afternoon. Her condition seemed better then and she eagerly ate considerable meat, potatoes and cabbage After that she steadily grew worse, her mental distress and her evident suffering from thirst being hard to picture.

She wauld not believe that she had hydrophobia, or that the dog was mad. "The dog bite," she said to Dr. Collins, "was nothing, and if you understood the case, I'd get well.' She was suspicious of everybody, especially towards the last, when her breathing became very rapid and heavy, and the temperature of her body extremely high, while a frothy, viseid fluid came from her mouth in such quantities as to necessitate constant changing of clothing, towels and other articles. In one of the spasms on Sunday her terror was increased by imagining that a hair was growing on the tip of her tongue. She cried to those about her to pluck it out. Although suffering intense agony with the symptoms described, Dr. Collins says that the spasms were controlled to a great extent by the medical treatment. Although conscious until about three hours before her death, which came from exhaustion at half-past five o'clock yesterday morning, she would listen to no reasoning, and was extremely whimsical. As late as Monday evening she desired to know whether one doctor was not sufficient. Compared with other deaths from hydrophobia hers vas an easy one.

MAINE ELECTION TROUBLES.

AUGUSTA, Jan. 29 .- The Fusion legislature, after a prolonged secret session this morning, adjourned to meet the first Wednesday in August next. Many of the members will go home not to return here before that date. Others will go back to the people of their districts to abide by their decision as to joining or remaining out of the State House legislature. Others will take their seats among their Republican brethern. The counted in members will, some of them, go home, while others will contest the seats of their rivals for the sake of getting the pay usually allowed defeated contestants. Two Frsionists, to-day, appeared in the Republican house, and number of the seat of the appeared in the Republican house, and numerous others have expressed the intention to follow them. Fusionist Gov. Smith and Talbot, speaker of the Fusion house, will leave for their nomes to-morrow. The capitol guards their nomes to morrow. The capitol guards and Richardson's light infantry marched out of the State House this morning, Hill, of Corink, and Millikin, of Burnham, took their seats in the Republican house. The New Era, a Greenback organ, submits to the decision of the supreme court and appeals to the people. It also calls upon the press to publish its declaration of the principles to Brick Pomeroy leagues. The Republicans and quite a number of Eusionies say that the Eusion, legislaber of Fusionists say that the Fusion legisla-ture will never meet again, as will be shown to-morrow by members taking their seats in the regular legislature, that the course pursued was an indirect method of dissolving, and that if the members go home they will soon be returned by their constituents to look out for important interests coming before the declare all seats that will declare all seats that are not now filled vacant, and new elections will be ordered. The Fusionist secretary of state, Sawyer promises to return the valua-tion books to office of secretary of state, and it is thought he will not claim to be secretary any longer. State Treasurer White was any longer. State Treasurer White was unable to be here to day, but telegraphed the fluance committee that he would read the desire having been to secure himself and bondsmen against loss. The opinion prevails that he will freely give up the keys and property of the office as soon as his successor is qualified. Only one company of malitia is now at the State house, and that will soon be relieved from duty. It is the opinion on all sides that the contest has now ended and ex-

PRINCE DE MONACO.

Famous Divorce Case in Rome-The Duchess of Hamilton Secures a Papal Dissolution of Her Marriage. [Rome Cable to the Cincinnati Enquirer.]

The question still agitates the laity and the clergy here regarding the fair duchess of Hamilton seeking a Papal divorce from her husband, the Prince de Monaco. It is a big and broad question, brought to the very threshold of the church in its capital city. If what was refused the real Tudors in Henry VIII. can be granted to the questionable line of the Stuarts in the duchess of Hamilton, then indeed will a serious issue grow out of the hitherto hard and fast virtue in vinculum matrimonii, and the door of divorce may readily be opened by any besieger.

It is alleged that the duchess is influenced toward this appeal for divorce on the grounds that she was unduly influenced in the matrimonial tie by her mother, the dowager duchess, and by the said dowager's particular friend, the late Emperor Napoleon, But voila les autre chose! There lived in Vienna, and still lives there, a handsome Austrian duke, who has oft visited Paris and the principality of Monaco; and for him, like many bonnie laddies devoted to Annie Lowrie, the Duchess would "lay me doon and dee." Here is the real undue influence And lo, here too, the dowager's repeated power, for she loveth not the prince, but the duke! Thus speaketh the quidnuncs of gossiping Rome.

But a reigning prince, if even the loins and quarters of a Grimaldi buccaneer ancestory, intermarried with all the Bourbon blue-bloods of the day, will not tamely submit to be thus wooed, won and undone! Albeit his dominion is but a square mile of rocks and olive-trees, of lemon grounds and orange groves, and his standing army like "Falstaff's" guard, still it is the wealthiest square mile, the gaudiest guard, and the greatest principality in the world for roulette and rouge et noir! Where so much is hazarded in funds the prince has learned naught to risk in cardinal cards or Austrian tricks. He will not be unloosened, he says; but princes propose and popes dispose

To-day society in Rome is amazed at the reported pontificial action in this famous case. It is announced on apparently trustworthy authority that the cardinals decreed the dissolution of the marriage contract, and that the Pope has confirmed the decree. The matter has attracted almost universal attention here, and is the general topic of con-

versation in all social circles.
