

Imperiled Lungs

Authorities don't agree as to the cause of colds. Some now claim that microbes are responsible. Doesn't matter much, you can't dodge the cause: it is the results that must be worried about. We know that colds cause destruction of tissue: that waste products accumulate in the system and that they are largely expelled through the lungs. When the process is retarded we have a cough, which is the warning of lung danger.

Jack's White Pine Expectorant

is the best remedy because it hastens the expulsion of waste matter. Some cough cures dry up a cough, this loosens it. It cures thoroughly because it goes to the source of the trouble.

SPEAK FOR THEMSELVES.

County Commissioners Reply to Untutored Printer and Publisher.

Whereas, The Princeton News has published in its columns a drastic article, criticizing this Board of County Commissioners for rejecting his offer to do the county printing, and for awarding the same to the Princeton Union, and suggesting that the tax-payers of the county will want to know how we, as such commissioners, excuse our action,

Now Therefore, This statement is for the purpose of advising such tax-payers of our reasons for such action:

Under the law it is our duty, in designating a paper to do the county printing, to take into consideration the character and value of such paper as a medium for getting the matter to be published before the tax-payers of the county. The law further expressly provides that we shall not be bound by any offer, but may reject any or all offers filed or presented, if in our judgment the public interest so requires, and that we may thereupon designate a paper without regard to any rejected offer or offers.

In making our decision we were governed by two main considerations: First: the circulation of the papers offering to do the work; and second, the equipment and ability of such papers to do the work properly, and with exact accuracy, and in strict compliance with the law.

On the first proposition the Princeton Union offered to publish the county printing in its own columns and also in the columns of the Milaca Times, giving a combined circulation of more than three thousand, and further offered to furnish a duplicate of such printing, in supplement form to be used by the Mille Lacs Pioneer, if it so desired, thus, still further increasing such circulation. On the other hand the circulation offered by the Princeton News only ranged from three hundred to three hundred and fifty. On the second point, past experience has demonstrated beyond a doubt that the Princeton Union could and would publish the matter with strict accuracy, and in strict compliance with the law.

In considering the Princeton News we could feel no such assurance, indeed the very article criticizing our action would seem to offer ample justification for our decision, for the last paragraph alone of such article contains five typographical errors, either of omitting a letter or inserting a wrong letter, which if they had occurred in five descriptions of the tax list would have invalidated the tax judgment, as to such descriptions.

We did not feel justified, on either of the grounds named, in considering the offer of the Princeton News. For it is of far greater importance to the tax-payers of the county that the work be done with exact accuracy, and that the matter reach the greatest possible number of tax-payers, than that the printing of such matter should be done cheaply.

Upon these reasons and considerations we based our action.

Pierson Boys Fined.

The Pierson boys, Swan and Enoch, who were arrested last week charged with the injury to the little Riebe boy in Bogus Brook, were given a hearing before justice Chadbourne last Thursday. Many witnesses were present, and while the boys admitted shooting their rifles, at the time the Riebe and other boys were on the river, they disclaimed any intention of shooting at the boys or towards them, knowingly. They said they were twenty-five yards away from the boys when the rifles were fired, and that the ball from the rifle held by Swan probably struck the ice and glanced, striking the Riebe boy.

About all that could be made out of the case was a common misdemeanor, and the justice fined Swan Pierson \$20 and Enoch \$10.

There was some anxiety about paying the Riebe boy's hospital and doctor's expenses on the part of the boys, and they desired to know if the fines could not apply on such expenses, but as this would require a special act of the legislature, the fines could not be thus appropriated.

Notice to Subscribers.

The subscription price of the Union is \$1.00 per year in advance. When subscriptions are not paid in advance, during the first three months after becoming due, twenty-five per cent will be added to the subscription price. Commence the New Year right by paying your subscription for the year 1905 now. The Union is certainly well worth \$1.00 per year. The Union stands on its own merits and will not club with any other newspaper. The Union has to-day double the circulation of all the other newspapers published in Mille Lacs county.
