

"Ever Heard of Cozy Corsets?"

A corset can be as cozy as a shoe or a glove.

We have lots of cozy corsets---they are in the J. C. C. make.

Every possible line and curve of your figure has been provided for in a J. C. C. Model. It fits so well that there's no room for argument.

They are the smartest corsets we know.

There's one style in particular we would like to show you. It has that long tapering waist, with high bust that suits so admirably the---Empire style.

Speaking of J. C. C. Corsets---do they wear? Well, yes! They really wear until you are tired of them. The material doesn't tear away from the clasps, nor do the eyelets pull out, or are the bones breaking over the hips or the steel punching through. They are too well made for any of that.

If you are having Corset Troubles of that kind, try a J. C. C. and you will find that your troubles will disappear.

E. B. ANDERSON.

The Farm Fireside.

Gleanings by Our Country Correspondents. . . .

GREENBUSH.

Wild strawberries are plentiful this year.

S. E. Tilley has purchased the Sawyer farm.

Our cattle buyer, M. Kenile, is busy shipping stock this week.

Chas. Grow and family of Milo spent Sunday at Alex Belair's.

Mrs. Chas. Solberg entertained her mother and friends last Sunday.

Small grain and potatoes are growing fine and there are prospects of a fair crop.

The Misses Grow have returned from Colorado and will spend the summer here.

Mr. and Mrs. Moorhead, Mr. Chas. Wenberg and children of Brickton visited at Wm. Deshaw's on the 4th of July.

The rain on the Fourth was disappointing to a good many who had made their plans how and where to spend the day.

The American Society of Equity will meet at the school house in district 5 on Saturday evening, July 13, with Mr. Carr as speaker.

Louis Rocheford and P. Brochman, with their families, spent the Fourth with Mr. and Mrs. Greenwood. The day was very pleasantly passed.

Mr. and Mrs. Danel, Mr. and Mrs. Stieg, and Christ Battermann and family visited at the P. Brochman home on July 7, where a pleasant day was spent.

A Memorable Day.

One of the days we remember with pleasure, as well as with profit to our health, is the one on which we became acquainted with Dr. King's New Life Pills, the painless purifiers that cure headache and biliousness, and keep the bowels right. 25c. at Jack's drug store.

SPENCER BROOK.

Mrs. Sam McKenney will visit relatives in Minneapolis this week.

Ray McKenney, who is at work in a furniture establishment at Minneapolis, came up to spend the Fourth.

The clover crop is being harvested and is more than an average yield---about two tons per acre.

Geo. Smith of Princeton, accom-

panied by Miss Larkin and a lady friend, were callers at the Brook last Sunday.

The strawberry crop is the largest ever raised in this neighborhood, and it is reported that blueberries will be plentiful.

A few of our boys went to Walbo on Sunday to witness a game between that nine and Cambridge. The result was 8 to 15 in favor of the visitors.

Henry Whiting and Miss Hess, the young lady who taught school here last summer, have been visiting at the Brook for a week. It is surmised by some that it is a honeymoon.

A delegation from Zimmerman was over last Sunday and held religious services. Quite a large congregation was present and the preaching was as good as could be expected from beginners. The singing was excellent and a solo rendered by Miss Stendahl was fine.

The program for the Fourth at the Brook passed off smoothly. It rained in the morning, but after dinner the people commenced to gather and it proved to be an occasion of enjoyment. In the evening the dancers poured in from every direction and a more gentlemanly and ladylike crowd would be hard to find. Not until 4 o'clock in the morning did the party, numbering sixty-five couples, take its departure.

ZIMMERMAN.

Mrs. E. V. Healy has been quite sick during the past week.

Harry Pratt umpired the ball game at Monticello on Thursday.

Mrs. W. R. Hurtt left on Tuesday morning for a visit with relatives in Illinois.

Mrs. Harry Pratt and Maud Bowles drove to Princeton on Friday afternoon.

Mrs. Barrett and daughter Edna spent the Fourth with relatives and friends in town.

John Beard, Henry Swanson and Harry Pratt spent Saturday and Sunday in the cities.

Mr. and Mrs. L. D. Carter left Monday morning for a month's visit with relatives in New York.

Mr. and Mrs. Mickelson arrived home on Saturday evening after a two weeks' visit with friends and relatives in Rock county.

A number of our people drove to Spencer Brook on Sunday and participated in religious services, at that place. They report a very pleasant

time and hope to take the trip again in the future.

Miss Mabel Lovell entertained the M. E. Aid society at her home last Tuesday and all report it a splendid place to spend an afternoon these hot days.

COVE.

James Corwin drove to Lawrence on Monday.

Mrs. Baur's niece of St. Paul is visiting at her home.

Mrs. Mallette was a down river passenger last Tuesday.

Mrs. Manning is visiting her daughter, Mrs. Olsen.

Hazel Bourquin of Milaca was visiting in Cove last week.

Oscar Anderson is working in the Potts' hotel at Wabkon.

Mr. Besser and C. E. Erickson of Milaca were in Cove Sunday.

The Indians are holding their annual dance on Mozonie point this week.

Mr. and Mrs. Anther of Minneapolis were visitors at Bay View a couple of weeks.

Mr. and Mrs. Bauer of Superior are the guests of their brother, Ed Bauer, and family.

Mr. and Mrs. Eynon and Mr. and Mrs. Freer drove to Onamia the evening of the Fourth.

A crowd of Coveites spent the Fourth at Midland and had the misfortune to tip over a rowboat in landing. Several were thrown into the water, and as the waves were rolling high, they came near being drowned. The remaining crowd at Cove had a picnic dinner in the park and Mrs. Mallette entertained with her phonograph in the hall in the afternoon.

BOGUS BROOK.

Paul Emme was in Minneapolis last week.

Miss Bertha Kührke is visiting her parents this week.

Everybody is invited to the basket social at Carl Siebert's next Saturday.

The picnic at Carl Siebert's on July 4 was well attended and a good time was reported.

The Bogus Brook local union will give a basket social next Saturday night, July 13. Everybody invited.

St. Paul Men Honored by German Emperor.

Dr. Justus Ohage, Ferdinand Willius and Otto Bremer of St. Paul have been honored by the German emperor with decorations representing the highest distinction that can be conferred upon a German of any rank. Dr. Ohage has received the order of the Red Eagle and Mr. Bremer and Mr. Willius the order of the Crown.

The orders were conferred by the German consul, Hans von Gruenow, by order of Emperor William, and it is understood that they are given in recognition of services of special merit performed in their adopted country.

The order of the Red Eagle is second only to the order of the Black Eagle in distinction, and is one of the most exclusive orders in Germany. It has a membership of only thirty persons outside of royalty, but it may be conferred for either military or civil service.

The order of the Crown, which is also a high honor, was founded by William I at the time of his coronation.

To My Farmer Friends.

I have accepted the agency for the Acme Harvesting Machine Company. This Company is NOT in the TRUST. The Acme machines have several superior points which no other machines have and they are fully as durable as any machine made and very easy running. No side draft.

If you contemplate buying a rake, mower, binder or stacker be sure to see these excellent machines before you buy. They are fully guaranteed to give perfect satisfaction or no sale. I will pay your mileage to my place at Long Siding to examine the machine if they are not as I represent them. I can save you quite a little money. Cash or will sell on time. Repairs always on hand. Call and see me. Yours very truly, J. A. Wetter, Farmers' Telephone 162. 27-4t

Notice.

The Mille Lacs county union, A. S. of E., will meet at the Schmidt school house on Monday, July 15, at 7:30 p. m. C. H. Berry, Sec.

Strayed.

From Charles King's feed barn a white boar pig about eight weeks old. Return to Joe Townsend and receive reward.

Wanted.

Ladies and gentlemen to solicit and collect. Good salaries, permanent positions for reliable men and women. Call at my residence on Monday and Tuesday between 1 and 5 p. m., July 15 and 16. Harley Whitney, Agen.

Dredge for Sale.

A fully equipped dredge just finishing eighteen mile ditch, a few days' more work, will be sold at public auction to the highest bidder, at the dredge, July 16, at 2 p. m. For particulars write or see De Booy, Elk River, Minn.

Keeping Down the Dust.

Owing to the increase of motor vehicles many of our roads are now subjected to a wear for which they are unsuited. Owing to the dirt raising power of the automobile the dust problem has reached an acute stage in many places. The matter has resolved itself into a local study, since it has been closely demonstrated that preventives which work on one soil are either useless or harmful on another. This phase of the problem was recently discussed by a road expert, Mr. J. W. Howard, before the American Road Makers' association. Said this authority:

Each locality is a separate problem as to what available materials to use for constructing roads and what methods to adopt for reducing dust. My experience testing pavement and road materials in many places, convinces me that not cheap first cost, but economic maintenance, is true economy. This applies also to suppressing dust. Water alone, or mixed with salts or with alkali and oil, has a very limited application. Certain adhesive asphaltic oils for soft road materials and specially prepared coal tar products for hard macadam and similar roads seem to be the present solutions of dust problems for thousands of miles of highways.

The condition of many of the main roads in the country after a few days of fine weather is such as to justify almost every expression that may be used to designate it. The surface consists either of a thick layer of dust or of a variable mixture of sand and loose, sharp stones, according to the locality. Every fast vehicle that passes, and often merely a puff of wind, raises the dust in clouds, blinding and choking the users of the road, penetrating wayside houses and chastening the people like one of the plagues of Egypt. The more frequented highways are often shrouded throughout the day in a dense white pall of dust stirred up by the wind and the traffic and never having time to settle. It is not surprising that the public grumbles and demands relief in one direction or another.

The English public is confronted with the same problem, and there the question of the hour is the choice of methods in the use of tar. An article in the London Engineering says that tar or some tar compound is the most satisfactory and adds:

Tarring has its defects and its limitations, but on the whole it appears at present the most promising solution. How it can be best applied is the next consideration. It seems obvious that the proper time is during the reconstruction of the road, when the surface material can be mixed with tar before being laid, so that every individual stone is covered. An alternative method advocated by some is to coat the road thoroughly before the surface material is laid and then roll the latter until the tar is forced up into the interstices. If it be true that tar always finds its way upward to the top of the road, there is something to be said for this method of using it. Usually, however, tar has to be applied to an existing surface, and then the treatment is necessarily less thorough. The ordinary procedure is to sweep the road clear of dust and then to apply the tar, brushing the latter into the interstices by hand labor. Sand is then laid to prevent the tar being picked up by the wheels of vehicles. A second coating is given after six weeks, but a single dressing only is required in subsequent years.

The tarred surface eliminates the expense of the water cart and adds to the life of the road. By the use of a tarring machine the annual cost of maintaining the tarred surface after it has been laid is cut in two.

Celebrating the Hudson River.

The plans for the so called Hudson-Fulton celebration two years hence have been submitted, and it is evident that the Hudson river, not its discoverer nor the first exploiter of steamships, is to be the center of the celebration. Festivities which are imposing and adequate for the purpose are to extend over eight days, from Sept. 13 to Sept. 23, 1909. This period includes the date of Hudson's halt on the up trip and his return downstream, Sept. 19 and 23 respectively.

Fulton's celebrated trip up the Hudson in the pioneer steamboat Clermont took place Aug. 11, 1807, and this event is brought into the celebration of 1909 for convenience. In the great water parade, which will close the ceremonies, models of Hudson's ship, the Half Moon, and of the Clermont will be escorted up the river. Thus the names and the deeds of these two will be linked with the river which the destiny of civilization would have made historic had neither Hudson nor Fulton ever sailed upon its waters. However, their names are inseparably associated with the river, and it is fitting that they be linked in the manner proposed in the programme of the celebration.

Just about this time, when thousands of his countrymen are sighing to join him in the arctic, Walter Wellman is probably racking his brains for another good excuse for turning around and starting for home.

There is not much use of publishing the annual admonitions, "Don't rock the boat" and "Don't swim far beyond the breakers." As a rule people who do that sort of thing don't read newspapers.

That member of parliament who compares the British house of peers to the American senate, somewhat to the advantage of the former, has a peerless imagination, to say the least.

Of course Mark Twain won't forget to mention King Edward's hospitality in that wonderful autobiography of his.
