Get It Under Cover

It's a good deal cheaper to build good, weather-proof sheds than it is to buy new machinery. The elements will injure an expensive machine in one season more than the wear it gets from legitimate use. Of course you know that as well as we do. If you have a costly machine that's standing out in the field or the farm yard get it under cover. We are this week selling good common boards at prices that will make it very much to your advantage to settle the shed question at once. Let us name you a price on what material you need.
