**Employees and Railroad Company Blamed.**  
Gross criminal negligence, in which eight employees were at fault, is held responsible by the state railroad and warehouse commission for the wreck of the "Columbian" train at Odessa on December 18, in which 10 people were killed and 18 injured. The findings of the commission, based on the investigation of D. F. Jurgenson, its engineer, were made public on Saturday. The commission recommends the indictment of the offending employees for gross criminal negligence and also finds that the Milwaukee railroad company is guilty of culpable negligence for failure to see that its rules were observed. The report, which is lengthy, scores both the employees and the railroad company.
