

Keep Your Blood Rich in Winter

Colds would have fewer victims if everybody would keep their blood rich in iron during the winter months. Those who most easily take cold are the ones who lack vitality. When the cold comes vitality is still more reduced and the condition becomes serious. Avoid winter illness by taking

Rexall Beef, Iron and Wine

This pleasant preparation will give you iron in just the right form to slip right into the blood. Unlike most preparations of iron it will not impair digestion in the slightest degree. There is no remedy that will so quickly restore color to the cheeks of pale, weak women and children and build up their general health. Try it. If it should fail to give perfect satisfaction money will be refunded.

About a hundred persons attended a valentine party given by Misses King, Lundsten and Waters to the two eighth grade classes of the public schools at Odd Fellows hall on Friday evening. Albert Johnson of Milo possesses the most beautiful fur carriage robe we have ever seen. It was brought from Africa last summer by Mr. Johnson's brother, Henry, and is made from the back portions of 20 golden jackal skins. This species of jackal derives its name from the golden stripes which adorn its coat and which are conspicuous among the dark shades of the body. The skins from which this robe was made cost \$200—the native hunters of Africa were paid this sum for them—and to this, of course, must be added the cost of making and the import duty.

Credit Tax Law Upheld. Minnesota's law assessing moneys and credits is held constitutional by the state supreme court in a decision handed down last Friday in the case of the Winona Motor company against the state tax commission. The company appealed to the court from the order of the tax commission denying its application to have the company's debts and other liabilities deducted from the assessment for moneys and credits, and contended that the law is unconstitutional as it imposes double taxation.

In holding the law constitutional the court sustains the tax commission in refusing to permit debts to be figured as an offset in determining the assessed value of credits.

Good Comes Out of Evil. The husband of a young woman in a rural community recently received one of those whiskey circulars. The wife answered it, politely saying that she required none of their goods but that her church was building a new meeting house and she would welcome a small donation. Did she get it? Well, you make a bad guess that time. She did. A small check came promptly with the compliments of the whiskey peddler. Did she return the check, with the statement that the money was "tainted?" Not on your life. That check was cashed and the money is being used as a portion of the building fund.—Sherburn Advance.
