

### 52 Years on 75 Cents Repairs

Would you like a separator that will do 52 years' work in a ten-cow dairy on 75 cents for repairs? The last-forever Sharples Tubular is just that kind. Here's the record of a Dairy Tubular that did work equal to 52 years' service in a ten-cow dairy with only 75 cents repairs and ten minutes adjustment.

Hours in use	2,600
Pounds separated	2,340,000
Turns of crank	6,837,480
Turns of bowl	2,496,000.000
Oil used	6 1/2 quarts
Time oiling	About 8 minutes
Time adjusting	10 minutes
Repairs	75 cents

Tubulars are different from all other separators. Dairy Tubulars have waist-low supply cans—a simple bowl suspended from a frictionless ball-bearing. Call and look at them—get all the facts.

Farmers are being warned by the country press to test their seed corn before planting. Most farmers, however, labor under the impression that they know as much about seed corn as all-wise country editors and callow college professors.

Almost every exchange that reaches the Union office contains from one to half a dozen notices of auction sales by farmers. Many farmers who dispose of good farms in Minnesota, thinking to better their condition elsewhere, will discover their mistake later on. Climatic conditions may be severe in Minnesota during the winter months, but wherever one goes he will find drawbacks.
