# STOVE BUYER WARNINGS

**Caution**  
Be sure to see the above trade-mark always on famous Garland Stoves and Ranges. Never sold by Mail-Order or Catalog. Always buy by the most reliable dealer. Made for over 40 years. Highest quality. In over 4,000,000 homes.

## Risks of Mail-Order Stove Buying

- 1—Quality!**  
No picture, however attractive, no price, however low, can justify the purchase of a stove or range that lacks the vital element of quality. Experience, skill, science and plain, old-fashioned honesty in materials and workmanship must all be wrought into the stove or range before it has the quality that will stand the test of years. A "30-day test" of stoves or ranges, which many Mail-Order Stove Concerns offer, merely limits the responsibility of the seller to that brief period. We are responsible for the quality as long as the stove or range is in your possession. Note the tremendous advantages of buying from a local dealer, who stakes his reputation on Garland Quality.
- 2—Guarantee!**  
Your guarantee of quality, when you buy Garland Stoves or Ranges, is based on forty years of stove building and the satisfaction-giving of Garlands in over 4,000,000 homes. No mail-order stove concern in the world offers such insurance on your investment. Why risk the unknown Mail-Order brands?
- 3—Bargains!**  
Every stove or range sold by mail is (on paper) the "greatest bargain ever offered." There's magic in the word "bargain"—it is one of the biggest assets of the mail-order system of stove selling. Don't let the "bargain" idea run away with your business judgment. No mail-order stove concern can sell stoves for less than their market value without going bankrupt. The huge profits of mail-order selling come out of the buyer's pocket. Your own good judgment will tell you that a local merchant, who buys stoves and ranges in carloads, will give you a better deal and bigger value than you can ever secure from any mail-order stove concern.
- 4—Delays!**  
In buying a stove or range by mail, you run the risk of assembling delays. Instances are on record where the anxious buyer waited six months for delivery. Single shipments are subject to delays or damage, and frequently go astray, requiring weeks of "tracing" are sometimes lost in transit. Why not buy from us, your local Garland dealer, who can make immediate delivery?
- 5—"Knock-Down" Stoves!**  
No mail-order stove is shipped set up, ready for use. The buyer must unpack them, set them up and black them himself. In case of breakage he must make complaint by letter, wait a long time for new parts and suffer the inconvenience of delay. We deliver your stove or range set up, complete, bleeked and ready for immediate use. Which way is best?
- 6—"Money Back!"**  
We do not question the good faith of mail-order stove concerns who offer "money back" if their stove or range, after 30 days' free trial, fails to give satisfaction. But remember that when you get a stove or range on free trial, the mail-order concern has your money and got on the stove. It generally takes so much effort for the buyer to sell the stove back to the mail-order concern—and if successful, to re-erect and re-ship it—that not one dissatisfied mail-order buyer in a thousand actually does it.
- 7—The Best Way!**  
A good dealer, right in your home town—not some unknown concern 500 or 1000 miles away—is the one who is most sincerely interested in giving you full value and lifetime satisfaction. His judgment on stove and range values comes from long experience. Come and see us before you make your next purchase. Get the benefit of our experience. Have us explain how Garland Stoves and Ranges are made—all the details that go to make up quality and value and satisfactory service, for which they are famous throughout the entire world. That's the best way to be sure of getting your money's worth.

## Job Printing and Job Printing

THERE are two kinds of Job Printing—that which is neat and artistic and that which possesses neither of these qualities. The Princeton Union makes it a point to turn out none but the former kind, and the Union finds this easy because it has the type, machinery and skilled labor with which to accomplish it.

### Nothing Looks Worse Than Botched Job Printing.

It is a drawback to the business of a merchant or anyone else who uses it. Botched Job Printing suggests loose methods. Then why not use the kind printed by the Union?
