We Have Always Wanted To  
Handle the BEST Manure  
Spreader---And We've Got It.

As all our friends know, we have been engaged in the farm implement business right here for a long time. We've made it a rule to handle only thoroughly reliable goods. No matter how tempting a maker's proposition is, we leave it alone, unless we are convinced that the article will be of real value to our customers.

Now please keep this rule of ours in mind and then come in and see the

NEW IDEA  
Registered U.S. Pat. Off.  
Manure Spreader

The fact that we have this machine set up, ready to demonstrate, shows that we believe there isn't a better spreader made. If there had been we would have found it. "New Idea" is the original wide-spreading spreader. Built to spread outside its own wheel track when other machines merely dumped manure behind. Low down and light draft, easy to load, easy on a team. Its chain conveyor brings every scrap of manure to the two cylinders where it is thoroughly pulverized and thrown out swiftly revolving steel paddles that distribute it in even width manure unnecessary.

The New Idea Spreader can't clog and spreads at will, 3, 6, 9, 12, 15 or 18 loads per acre. It has a chain drive—no gears to break or strip from cold or under sudden strain. Wide tires fit the "New Idea" for use on soft soil. The New Idea Spreader is thoroughly well built of exceptionally stiff and sturdy materials, and the makers cheerfully guarantee it for a year against breakage from any cause. With proper care it will last a lifetime.

Now here is a machine that will give you dollar for dollar on a moderate investment in one year's time; because if used regularly it will absolutely save the full fertility value of manure and put it on the soil in such condition that growing plants can get it all.

The New Idea Spreader will save you money. Come in and see it next time you're in town. You'll be interested.

DON'T FORGET TO ASK US FOR THIS FREE BOOK. We've a book here we would like you to read—"Helping Mother Nature." Tells more about the care and use of manure than you ever thought of. Written by an expert and full of right-up-to-the minute scientific data. Don't forget this—it's important.

Yours for better farming.
