

75% of all hauling can be done by a Maxwell truck

# MAXWELL TRUCK

There are now more than 6600 Maxwell trucks in use. They will do everything a 5-ton truck will do except haul 5 tons at one load.

Big trucks spend more gas hauling themselves than the Maxwell uses at peak load.

How well those Maxwells have done their work is shown by a service record of 99.6% perfect—the greatest record ever made by a motor-driven vehicle.

\$400 less than any other truck of similar capacity in the world.

\$1085, chassis only, f. o. b. Detroit. Electric lights. Electric generator. Worm drive. 10-foot loading space. 2500 pounds.

### DE LAVAL CREAM SEPARATOR

Lots of your neighbors are using De Laval. Have you ever asked any of them how they like their machines?

Their judgment and experience ought to interest you. Why not make a few inquiries?

You'll find that in every case the De Laval is giving more cream and better cream; that it is easiest to operate; very seldom gets out of order and never seems to wear out.

Your neighbors will back up what we have been telling you about the De Laval.

So will any of the 2,125,000 De Laval users.

Talk it over with your neighbor.

We will sell you a NEW De Laval on easy terms. Come in, examine the machine and talk it over.

### A Millionaire's Value at a Popular Price

No photograph of the Elgin Six can do it justice. You must see the actual car—and ride in it—to know how beautiful and comfortable it is, how steadily and easily it rides.

## Elgin Six

"The Car of the Hour"

Its beautiful yacht line design sets the Elgin Six aside from the monotonous designs of common cars and gives it distinction on country roads or city streets.

No other car selling for less than \$1250 has the "V"-type radiator and fashionable European center cowl.

Every detail, from the beautiful 35 H. P. six-cylinder valve-in-head motor to the least important part, will meet squarely and satisfactorily every demand you make upon it.
