MINNESOTA'S LEADER FOR CHURCH SURVEY

A. Z. MANN

CHURCH SURVEY AIDS ALL CREEDS

Religious Data Sought From Jew, Gentile, Catholic and Protestant.

RAPID PROGRESS REPORTED.

Well Under Way in Most Counties and Completed in Nearly a Third of Minnesota.

Are you Jew or Gentile, Catholic or Protestant?

Whatever the answer, you are to be recorded in the church survey now being made in Minnesota. You need not hesitate in giving the information for it will not be made public.

This work is incidental to the Interchurch World Movement now under way. The work of obtaining this religious information in Minnesota is in charge of A. Z. Mann, survey leader, with headquarters at 211 Lumber Exchange, Minneapolis.

"The object of obtaining these facts is to assist us in learning the definite needs and desires along religious lines," said Mr. Mann. "In obtaining this information we have adopted a program of thorough preparation and accuracy rather than speed."

County chairmen for carrying on this work have been selected in 82 of the 86 Minnesota counties. County councils have been organized in 56 counties. There are 317 volunteer surveyors at work.

Reports to Mr. Mann show the following progress by percentages:

- County leaderships elected, 95 per cent.
- Organization completed, 66 per cent.
- Individual counties in progress, 87 per cent.
- Survey work reported complete, 29 per cent.
- Range of survey progress in counties as indicated by county leaders' reports:
 - Complete or being tabulated, 5.
 - Counties over 75 per cent complete, 6.
 - Counties 50 per cent to 75 per cent complete, 7.
 - Counties 25 per cent to 50 per cent complete, 13.
 - Counties under 25 per cent complete, 55.

All denominations and creeds of whatever belief benefit by the survey, as information of value is given to the interested organization whether or not it is associated with the Interchurch World Movement.

CENTRAL SOUTH AMERICA IS MOST NEGLECTED SPOT

The greatest stretch of unevangelized territory in the world lies in the center of South America, including the interior of Brazil, Venezuela, Columbia, Ecuador, Peru, Bolivia, and Paraguay. An irregular territory some two thousand miles long and from five hundred to fifteen hundred miles in width, would only include two or three missionaries. In northern Brazil there are seven states, with populations ranging from that of Maine to that of New Jersey, with no foreign missionary.

In spite of the awful needs, as great in the interior of South America as in China or Africa, American mission boards do not support one hospital in all that continent.

There are about 200 missionaries, including wives, and 1,860 native workers, conscientiously but inadequately covering the field. The general average has been one evangelistic missionary for every 50,000 people.

The island world of Malaysia equals in total expanse the area of the United States. It is the largest and the most fertile undeveloped Asiatic territory, containing 873,000 square miles, with a population of 50,497,042. There are about 45,000,000 Moslems. To win these multitudes to Christ is the stupendous task which confronts the Christian Church in Malaysia.

The problem for Christianity in the Japanese Empire is to enlist the vision and energy of 78,723,500 progressive Asiatics in the cause of Christian democracy.

Working with your coat off

Naturally brings your shirt prominently into public notice. The question is, "will it stand the spotlight of publicity?" Will it give you that efficient, "well-kept" look? Will it have that fit and general appearance that make it look as if it was made just for you? It will, if it is a

Summit Shirt

Long ago, we realized that there is as much difference in shirts as there is in men. We found that a shirt must have "character"—that intangible something that makes you feel, without knowing just why, that here is a shirt that is right. Summit Shirts have that necessary combination of style, fit and careful workmanship that gives them character. The man who works with his coat off should ask his dealer for Summit Shirts.

The fine steels in a
MAXWELL
stir your enthusiasm

Ride in a Maxwell and your enthusiasm is stirred for this commendable car.

You attempt to search for the cause and you find it in the steels used in the Maxwell. Those fine steels that give rare strength.

Such steels take the burden of dragging around useless weight from the engine, providing brilliant performance.

Pound for pound the steels in a Maxwell equal those in any car built.

The Maxwell construction, employing these fine steels, results in a light-weight car, that gives not only brilliant performance, but the rare combination of durability, economy and comfort.

Today nearly 400,000 Maxwells may be seen on the world's highways. 100,000 more are in process of construction.

Still this will supply but 60% of those who have set their minds on a Maxwell for 1920.
