GOVERNMENT AFFAIRS AND CURIOUS CUSTOMS.

A Bluefields Funeral With No Chief Mourners and Curious Religious Rites-A Dutch Privateer Used to Prowl Around the Coasts-A cenary Monarch.

Bluefields, Nicaragua, .- Special Correspondence.-Although the late King Robert Monarch of Masquitia, in his own estimation in Central Africa, which certainly seem more declared the religion of this coast to be that of the established church of England, it must be confessed to this day religion of any sort is at the lowest ebb. The established church oes not appear to have made any special effort toward bringing the natives into its aristocratic fold-probably because too busy with things temporal, in the line of securing the rubber and mahogany of this fertile strip, to have time for spiritual concerns. From time to time in the past dissenting ministers have attempted to disseminate their doctrines in Mosquitia; but as they never found favor with the British efficers and agents who ruled the coast they were soon "frozen out" in spite of the climate. It is related that not many years ago a good Methodist brother from the United States succeeded in establishing a sort of church in Bluefields; at any rate he hired a room and secured the attendance of two resident American families—not so much for the sake of their orthodox souls as to pluck the natives as brands from the burning. But not a native came near enough to be plucked; until finally the minister induced a few of the leading Sambos to attend divine worship by giving to each a stiff glass of grow hafershand and promising another of two resident American families-not so of grog beforehand and promising another after the benediction. So successful was this arrangement that they came with cheer ing regularity Sunday after Sunday, and the minister's hopes were high. At length one Sabbath afternoon a considerable number of natives flocked in—at the instigation, as after-ward developed, of some jocular Englishman. ward developed, of some jocular Englishman, who assured them that spiritual consolation (out of a bottie) would be administered before and after. But it happened, unfortunately, that the worthy missionary's demijohn was exhausted, and no miracle was wrought like unto that of the widow's cruse of oil. He fought to compensate for the deficiency by an unusual flow of eloquence, and for a time flattered himself that he was producing a lasting impression. His discourse, however, was suddenly interrupted by one of the chiefs who arose and indignantly exclaimed. "All was suddenly interrupted by one of the enters who arose and indignantly exclaimed. "All talk! No grog—no good!" and stalked away, followed by the entire native gudience, with responsive grunts, "No grog—no good."

Since that day the increased American elesince that day the increased American element has made some little improvement in means of grace for the community; but as a class the Sambos are yet strongly attached to incir old-time heathenish rites—half African half Indian—in which Jamaisa rum figures

He was the guest of the Englishman who at that time was the "power behind the throne," the real ruler of Mosquitia, with a black King for a figureof Mosquitta, with a black King for a figure-head to the ship of state. They rowed up the river, which was covered with pitpans filled with men and women bound for the funeral, all dressed in their brightest, laughing, shout-ing, and exerting themselves to the utmost in the race to arrive first at the scene of woe. The village was a little group of huts set close to shore, shaded by palm and bread-fruit trees. A crowd of Sambos were collected on the bank, and the monotonous beating of the "tum-tum," or rude native drum, filled the air, relieved by an occasional deep which is: "Be sure you're right, then go blast on an enormous hollow pipe which sounded like the distant bel lowing of an ox. At regular intervals this one question; does your congregation alleged music ceased for a moment, and the brief pause was filled by distant wailings and indescribably mournful-probably like those which "murdered sleep" for us throughout our first night in Bluefields-to be quickly drowned by the monotonous drum and Pushing their way to the center of the on shore, they saw a small pitpan, cut in half, in one part of which lay a corpse wrapped in cotton cloth. With the exception of these women and the men who beat the drum and blew the pipe, nobody appeared to take the slightest interest in the corpse, the rest gayly chattering with one another. or playing their usual gambling game, which is something like our quoits, while a few were actually asleep under the trees. Suddenly four men, entirely naked except for a loin cloth and daubed all over with variously colored clays, rushed for one of the huts, hastily tied a bit of rope to the piece of pitpan containing the cadaver, and dashed away reading Capt. Adolph Thirli; Stick pertoward the woods dragging it after them like a sledge, bumping and bounding over roots and other obstructions and occasionally piano J. But on they rushed, pell mell, as if the demons of darkness were in hot pursuit, closely followed by the Gorgon-headed women and the men with the drum headed women and the men with the drum and foghorn, each keeping time as best he and foghorn, each keeping time as best he could, while the spectators hurried after, one of them carrying the empty half of the nitpan on his head, like a helmet. Into the thickthe jungle they penetrated till a comparatively clear place was reached, covered with low, dark underbrush. Here a shallow trench was waiting, into which the half boat containing the corpse was placed and the other half inverted over it. While this was going on other men were collecting sticks and palm branches, with ful (invisable) wreath? Mr Adolph which a little hut was quickly built over the new-made grave. In the hut was placed an earthen vessel full of water; the dead man's turtle spear was stuck deep into the ground near his head, and a fantastic fellow with an old musket discharged three or four rounds over the spot to scare away any evil spirits that might be prowling near.

Curious Religious Rite. Then the crowd surged back to the village as hastily as they came, where the painted credit can not be given the Wandering on top. Referee Billy Madden pulled habitants, and its zervices date back to pailbearers seized some heavy machetes and, without an instant's loss of time, cut down all the palm trees that surrounded the conducted their entertainment hut their dead comrade had occupied. This was done as sliently and quickly as possible, and when finished the men ran down to the river and plunged out of sight in the water, | tainment from the State: Miss Davis and kind of lustration, or purifying process deemed of the utmost importance after such service had been rendered. Why the palm trees are cut down is one of the mys-teries of "religion." The natives do not know why it must be done, except that it was practiced by their ancestors in Africa, who also planted a cocoanut tree upon the birth of every child, but the rest of the ceremony is easily explained. The Sambos believe that one of Injantry composed of Afro-Ameri death results from the influence of a demon called Wulasha, who, ogreike, feeds upon corpses. bay and river-derived from the noted Duton bay and river—cerived from the noted Dutch privateer. Bleeveldt, who had his rendezvous here a couple of centuries ago. The Spanish discoverers, finding no precious metal hereabouts, departed for richer fields, leaving the Moscos in peace among their lagoons and mahogany forests. A hundred and fifty years later, near the middle of the seventeenth century, the buccaneers appeared upon the scene—those "sad sea dogs" from all nations, but mostly from England, who were on intimate terms with the successive Governors of Janaica and shared with them the spoils of the Spanish main. When the war with Spain was Spanish main. When the war with Spain was brought to a close, so that it was no longer cossible to connive at freebooting, these enterprising sons of Britain determined to obtain possession of Mosquitia, and, incidentally, everything else they could selze, in behalf of the crown. The methods by which these English "agents"—many of them ex-bucca-neers, but acting under orders—pressed their pretended rights to this region are too well remembered to need recapitulation.

Under the British protectorate one negro-after another was crowned "King," and up-held in his office until the farce ended by the death of "his majesty"—hastened by over-indulgence of the cup that cheers and like-wise inebriates—good cld Jamaica rum. Sir Huns Sloan relates how one of these dusky Hons Sloan relates how one of these dusky monarchs was taken to Jamaica to be edu-cated, but regularly escaped his lessons by shinning up a tree, in whose topmost branches he perched all day among his brother mon-keys. A fair sample of these half-savage monarchs (but never for a moment rulers) selected by the Englishmen as suitable tools-either cause of the degree of their influence or ignorance-was that miserable creature, Robert Charles Frederick I., who was invested simulareously with the title of King and his first pair of trousers.

#### A Mercenary Monarch.

Soon after donning the "purple" (or, rather, blue jeans) he proceeded to make over the whole coast of Nicaragua, Belize, and Honduras to a company of New York capitalists—re-ceiving in pay for this princely grant six barrels of rum and a bundle of cotton pantaloons! Fortunately such a wealth of "spirits" proved too much for the delicate constitution ot his majesty, and he quickly gave up the ghost; to be succeeded by his son, George William Clarence, who was duly proclaimed "King" by the British, while the distressed people of Nicaragua and Honduras were mak-ing franctic but fruitless appeals to the world at large for redress. The grants made by the drunken Robert Charles Frederick I. to the Yankee speculators were taken to Europe and made the basis of several attempts at colonization; all of which terminated with the death of the deluded emigrants, from fever and other diseases of the "tierra callente." Finally the grants found their way to New York. York, and into the hands of Mr. H. L. Ken-ney, who purchased them conditionally and set on foot that short-lived enterprise known as the "Kenney expedition." In the autumn of 1855 this gentleman, accompanied by a ing craps with a crowd of other men at number of eager adventurers, availed them-Thirty-fourth a d avenue, and after selves of the grants and privileges thus purthey commenced the execution of their plans. But they met with unforeseen difficulties and discouragements, principally owing to the feud then existing between the Nicaraguans have fired into the crowd. Fortunately although their leader was made Governor, the "Kenney colony" one by one deserted—most of them to join the forces of General Walker, the filibuster, who by that time was making great pretentions in Central America. And at last Governor Kenney himself departed in haste, "between two days," with his name indorsed on another man's passport.

Ruled by a Sambo Chief. After a nominal protectorate of 195 years, Great Britain, by the Clayton-Bulwer treaty of 1850, resigned all claims to the Me coast, and ten years later, under the treaty of Managua, graciously ceded it to Nicaragua— to which country it had always rightfully be-longed. The "King" of that day (his illustricus name has escaped my memory), consented to the arrangement, on condition of retaining his administrative functions and receiving a subvention, equivalent to \$5,000 per year, for a period of ten years. But he died in a tew months, and Nicaragua has never recognized his successor. Neverthe less, the "reserva Mosquita' continues to be ruled by a Sambo chief, elected by his fellows, and assisted by a sable court, or council

which assembles at Bluefields. Land cannot now be bought within the reservation, but can be leased, at the rate of: cents per acre, for a term not exceeding fifty fertility, and there is a considerable exportreaty of 1880 provided seven schools in the territory, which instruct the Indians in their own language and in English—yet a more ig-norant, lazy, superstitious, and altogether hopeless lot could hardly be found. GRAPES AND THE APPENDIX. A Mistake That Has Long Been Popular.

Things have been said about the baneful and delicious juice of the grape ever since the olden time when Noah found out about it and came thereby to grief; but even before that men ate grapes, and only within the last decade have they been talked to about that, says the Washington Times. It is only since surgeons began to make money hunting for grape seeds in the vermiform appendix that people have been afraid to eat grapes, to eat them straight. It now appears that in all the thousands of cases famous, in which this new-fashioned surgical operation has been performed there is not one case in which a grape seed or any other little bullet-shaped thing has been found in the vermiform appendix. The whole interior of the appendix is only big enough to admit a medium-sized darning needle. Nobody knows what are two Regiments of Cavalary in the rol jumped into the ring and threw up and between ten and eleven thousand it is there for, but it must have been useful at some time. It is a case of the survival of the unfit, like the wisdom teeth, which are of so little use to most people, and the tonsils, which cause so much trouble now and then. The tonsils and the appendix are both unused parts of the body, and peculiarly liable to disease because they are not
