To all whom it may concern: HAVING disposed of our entire stock of merchandise with a view of closing our business, this notice is given so as to give all disposed to arrange debts due the following concerns, a chance to settle the same without attaching the additional expense of the law: The old concern of W. A. Clum & Co.; that of W. O. Cook & Co. and that of Cook & Walton. We hope no debtor after this notice will be backward in arranging his debts with us, as we are driven to this course as the last alternative. Office Mississippi Union Bank, JACKSON, MISSISSIPPI, May 12, 1838. DEAR SIR:—Enclosed I transmit the directions of the Bank Attorney, which you will please scrupulously observe in making your examination in the chain of titles to property proposed to be mortgaged to the Bank. When persons have not their chain of titles perfect, it will be imperative that they shall render them so before they are sent for the inspection of the Directory of the principal bank for final decision. The success of the institution, the prosperity of the people of Mississippi generally, and especially of those who may be the immediate stockholders, require that our action shall be marked with due precaution. It is the sense of the Directory, that persons shall not be required to pay over the (2-1-2) two and a half per cent. on their stock until the Books of subscription, title papers, &c., are sent here, and finally passed on, and the stock graduated according to the charter, when the papers will be returned accompanied with a mortgage, to be executed by the subscribers, and money paid in; when, and not until then, will the stock be declared on, and certificates issued. My reason for being thus particular is, that numerous inquiries are made in relation to this matter. If you have progressed and find that you have been governed by a different rule of action, be pleased to change, so as to conform strictly to the present instructions. It will be an easy matter for you to correct any error into which you may have fallen; and be assured that in a business of such immense magnitude, it is of essential importance that uniformity and system shall govern us. I have the honor to be, Very respectfully, Your obedient serv't. H. G. RANNELS, Pres't.

U. S. Magazine and Democratic Review. IT has long been apparent to many of the reflecting members of the Democratic Party of the United States, that a periodical for the advocacy and diffusion of their political principles, similar to those in such active and influential operation in England, is a desideratum which it is very important to supply—a periodical which should unite with the attractions of a sound and vigorous literature, a political character, capable of giving sufficient support to the doctrines and measures of that party, now maintained by a large majority of the people. Discussing the great question of policy before the country, expounding and advocating the Democratic doctrine through the most able pens that party can furnish, in articles of great length, more condensed force, more elaborate research, and more elevated tones, than is possible for the newspaper press, a Magazine of this character becomes an instrument of inestimable value for the enlightenment and formation of public opinion, and for the support of the principles which it advocates. By these means, by thus explaining and defending the measures of the great Democratic Party, and by always furnishing to the public a clear and powerful commentary upon those complex questions of policy and party which so frequently distract the country, and upon which, imperfectly understood as they often are by friends, and misrepresented and distorted as they never failed to be by the public, it is of the utmost importance, that the public should be fully and rightly informed, and that the public mind should be brought to bear upon the great questions of the day. Other considerations, which cannot be too highly appreciated, will render the establishment and success of the proposed Magazine of very great importance. In the mighty struggle of antagonist principles which is now going on in society, the democratic party of the United States stands committed to the world as the depository and exemplar of those cardinal doctrines of political faith with which the cause of the People in every age and country is identified. Charly from the want of a convenient means of concentrating the intellectual energies of its devoted members, the party has hitherto been almost wholly unrepresented in the republic of letters, while the views and policy of its opposing creeds, are daily advocated by the ablest and most commanding efforts of genius and learning. In the United States Magazine the attempt will be made to remove this reproach. The present is the time peculiarly appropriate for the commencement of such an undertaking. The democratic body of the Union, after a conflict which tested to the uttermost its stability and its principles, have succeeded in retaining possession of the executive administration of the country. In the consequent comparative repose from political strife, the period is auspicious for organizing and calling to life a new and powerful aid of this character, interfusing with, and co-operating with all. Coordinate with this main design of the United States Magazine, no care nor cost will be spared to render it, in a literary point of view, honorable to the country; and fit to cope in vigor of rivalry with its European competitors. Viewing the English language as the noble heritage and common birthright of all who speak the tongue of Milton and Shakspeare, it will be the uniform object of its conductors to present only the finest productions in the various branches of literature, that can be procured; and to diffuse the benefit of correct models of taste and worthy execution. In this department the exclusiveness of party, which is inseparable from the political department of such a work, will have no place. Here we all stand on a neutral ground of community and reciprocity, where these universal principles of taste to which we are all alike subjected, will alone be recognized as the common law. Our political principles cannot be compromised, but our common literature it will be our common pride to cherish and extend, with a liberality of feeling unbiassed by partial or minor views. As the United States Magazine is founded on the broadest basis which the means and influence of the democratic party in the United States can present, it is intended to render it in every respect a thorough National Work, not merely designed for ephemeral interest and attraction, but to continue of permanent historical value. With this view a considerable portion of each number will be appropriated to the following subjects, in addition to the general features referred to above. A general summary of political and domestic intelligence, in the order of the States, comprising all the authentic important facts of the preceding month. General literary intelligence, domestic and foreign. General scientific intelligence, including agricultural improvements, a notice of all new patents, &c. A condensed account of all new works of improvement throughout the Union. Military and naval news, promotions, changes, movements, &c. Biographical obituary notices of distinguished persons. After the close of each session of Congress, an extra or an enlarged number will be published, containing a general review and history of its proceedings, a condensed abstract of important official documents, and the acts of the session. To promote the popular objects in view, and relying upon the united support of the democratic party, as well as from others, the price of subscription is fixed at the low rate of Five Dollars per annum; while in mechanical arrangements, and in size, quality of matter, &c. the United States Magazine will be placed on a par at least with the leading monthlies of England. The whole will form three large octavo volumes each year. The subscription will be in all cases payable in advance, of (for the first year only) six dollars on the delivery of the third number. The absolute necessity of this rule in such an establishment will be obvious to all. In return for a remittance of \$50, eleven copies will be sent; for \$100, twenty-five copies. The certificate of a post-master of the remittance of a sum of money will be a sufficient receipt, all dangers of the mail being at the risk of the publishers. All communications will be addressed, post paid, to the undersigned, the publishers. LANGTREE & OSULLIVAN, Washington, March, 1837. Subscriptions will be received at this Office. Also by E. W.
