

THE CLARION.

HOUSE, FARM AND GARDEN Sundry Items.

Col. Bennett in N. O. Picayune.]

Last year an article went the rounds in the newspapers without comment, recommending the use of lemons as a remedy for consumption—a dozen lemons daily. We do not know what effect a dozen lemons a day would have on a strong man who can drink a bottle of whisky a day without a whimper, but it would be a horse-doctor's dose for a delicate stomach. We think it would be safer to start on one or two daily and increase the dose, inquiring of nature occasionally about how many glasses of lemonade would be best.

Fruits are healthy if used when ripe, and eaten in moderation and at proper times. The best time to eat fruit is at meals with food. Children that suffer from eating fruit, eat unripe fruit, or eat ripe fruit at all hours of the day, in large quantities and gorge their stomachs to an extent that would make a dumb animal sick. Ripe fruit eaten in moderation conduces to the health of children by helping digestion, and preventing bilious attacks. Vegetable acids are excellent for jaundice—they are nature's remedies and preventatives.

Oatmeal is genuine bone and muscle food, excellent for children as they are growing up, helping to make good strong bones and vigorous muscles. Lime water is very necessary for children. In limestone countries they get plenty of lime in the well and spring water; but in freestone countries and where cistern water is used, grown persons as well as children should take lime water. It is very important in forming sound teeth in children, and in keeping teeth sound in grown persons.

Fresh cream should not be added to a churning for twenty-four hours before the churning commences. In cold weather the jar containing the cream should be placed by the stove and well stirred and warmed. This will make the butter come quickly, while a neglect to attend to these things may cause perplexing delays.

Straw houses are a success in England. The straw is pressed into slabs, these are soaked in a solution of flint to make them fire-proof, and the two sides are coated with concrete. Perhaps the next freak of ingenuity will be to turn "air castles" to some account.

The oil from sunflower seeds has great heating qualities; the seeds make food of the first order for poultry.

A correspondent of the Farming World claims that the best time to prune trees is just before the sap begins to flow—from February to April, according to the latitude. The wounds will then heal over very rapidly without dead wood or scars. The next best time is from the middle to the last of June, when the sap flows afresh and the trees commence second growth; but heavy pruning should never be practiced in June. Much pruning may be saved by pinching and rubbing of superfluous sprouts during the growing season.

Household Hints.

A teaspoonful of borax put in the hot water in which clothes are rinsed will whiten them surprisingly. Pound the borax so that it will dissolve easily. This is specially good to remove the yellow that time gives to white garments that have been laid aside for two or three years.

Here is something for dessert which never fails to please the younger members of the family. Make a batter as if for waffles; to one pint of milk allow two eggs and enough flour to thicken; one teaspoonful of baking powder should be stirred into the flour. Fill a sufficient number of teacups with this and fruit in layers. Then set the cups in the steamer, and let the water boil underneath it for a full hour. Serve while hot with sugar and cream. Any jam is nice for this, or raw apples chopped fine.

Nice little tea cakes, to be baked in muffin rings, are made of one cup of sugar, two eggs, one cup and a half of milk, one heaping teaspoonful of baking-powder, a piece of butter the size of an egg, and flour enough to make a stiff batter. In this batter stir a pint bowl full of fruit—currants are nice; fresh berries in their season, and even canned ones; with the juice drained off. Serve while warm, and they are a dainty addition to the tea-table.

Oyster croquettes are delicious for supper, and it is not much trouble to make them. Chop the oysters and measure them in a bowl; then measure an equal quantity of potatoes that have been boiled and mashed very fine; add as much butter as you can afford to, or like; pepper and salt also to suit your taste; moisten with a little cream; then make this in rolls or in cakes; dip in egg and fine cracker crumbs, and fry in lard. It is necessary to have plenty of lard in the kettle, almost as much as for fried cakes; serve hot.

What is the Best Fertilizer.

What is the best fertilizer to use when there is an insufficient supply of stable manure? This question is often asked, and the only true way to answer it is to let the soil and crops answer for themselves, by careful experimenting with nitrogen, phosphoric acid and potash on small plots, and on different crops, keeping accurate account of the cost, and the profit and loss. This cannot be done without a sacrifice of some time, and great care must be taken to accurately weigh the materials and calculate the results. These three things, nitrogen phosphoric acid and potash are the most expensive elements of all fertilizers, and the ones most often wanting in the soil. There are few cases, however, where all three are equally needed. Sometimes only one of these essential ingredients is required to transform what before seemed a poverty-stricken field, to one of luxuriant productiveness. It is obvious, then, that it would be a waste of means to apply all three where only one was needed. Of course if one of these elements should be applied to a field for a number of years in succession, it might become exhausted of the other elements, and a change be necessary. If, however, a systematic course of rotation is followed, it will often be found that the fertilizer that is best suited to one crop is not the one most needed by the crop to follow it; and by an application of the elements to the various crops as they require them, the fertility of the soil may be maintained, or even increased in the most economical manner, and profitable crops raised without the use of stable manure. The latter, however, all good farmers will carefully preserve, use all they make, and make all they can. The question is, then, to find out what the soil needs to produce certain crops.

Sets of "experimental fertilizers" are put up by several dealers, containing nitrogen, phosphoric acid and potash in separate bags, also mixed two of a kind and all three together. Each bag is intended for one-tenth of an acre, and the set, with one plot to stable manure, and one left unmanured for comparison, is calculated for an acre. Full directions usually accompany these sets, and they are put up at the moderate price of \$7.00 or \$8.00 per set.

We are knowing to an instance wherein the use of one of these sets of experimental fertilizers, by an enterprising man but four years ago, has nearly revolutionized the culture of sweet potatoes, in that vicinity, and thousands of barrels are now raised with the aid of muriate of potash (mixed with bone or other fertilizer, or used singly) where before its introduction it was thought they could not be raised without stable manure, which could be had only in limited quantities. Moreover, poor, sandy soil, which has been treated to 200 pounds of muriate of potash with 400 or 500 pounds of ground raw bone, for three years in succession, has produced very profitable crops of sweet potatoes, and at the same time brought the soil up to a clover producing point, which it would not produce to any extent before the use of these fertilizers.

There are other less expensive elements which can sometimes be used very profitably. We refer to lime plaster, salt, muck, etc., and when these can be obtained near at hand and at slight cost, they should be carefully tested. One-tenth of an acre is sufficient for a trial of any fertilizer; it is also very convenient to ascertain the result per acre by multiplying the product of each plant by ten, and the cost is small, compared with the value of the knowledge gained.

To Cure Cold Feet.

To cure cold feet the Philadelphia Record says:

People who write or sew all day, or those who take but little exercise, may warm their cold feet without going to the fire. All that is necessary is to stand erect and very gradually lift one's self up upon the tips of the toes, so as to put all the tendons of the foot at full strain. This is not to hop up or jump up and down, but simply to rise—the slower the better—upon tip-toe, and to remain standing on the point of the toes as long as possible, then gradually coming to the natural position. Repeat this several times, and by the amount of work the tips of the toes are made to do in sustaining the body's weight a sufficient and lively circulation is set up. Even the half frozen ear-driver can carry this plan out. It is one of the "Swedish movement" system; and, as motion warmth is much better than fire-warming, persons who suffer with cold feet at night can try this plan just before retiring to rest.

Ladies suffering from Neuralgia, Indigestion or Nervousness find speedy relief in Parker's Ginger Tonic.

Never condemn a friend unheard, or without letting him know his accuser or his crime.

CLEANLINESS and purity make Parker's Hair Balsam the favorite for restoring the youthful color to gray hair.

Fish for the Farmer.

No man in the United States is so well fixed for having fresh fish to eat or sell as the farmer. They can, by buying a scraper, do all the work necessary for making one, two, or three ponds with their own labor and their own teams; and if they have not got a spring or running water, they can pump enough to supply their ponds with a ten-foot wind mill. The requisites for success are not many: (1) The pond must be at one side of the stream or run-way, so that a heavy rain or freshet cannot wash the fish over the dam. (2) The pond where the fish live through the summer must be shallow with a mud bottom, but muddy water running in it is not desirable. (3) The pond where the fish are wintered must be ten feet deep with mud bottom, and not disturbed in winter by cutting ice. (4) Fish grow faster by being fed. (5) The German carp are the only desirable kind. (6) No other fish or turtles of any kind should be in the ponds. (7) The ponds must be so arranged that every drop of water can be drawn off. The carp are not ready takers of bait, so they are not so liable to be stolen as other fish. The pipe for drawing the water off can be made of wood with a leather home-made valve at the inside end. Around this inside end a slatted box should be built to keep the fish from going out and the rubbish from clogging the pipe.

What the Birds Accomplish.

The swallow, swift and night hawk are the guardians of the atmosphere. They check the increase of insects that otherwise would overload it. Woodpeckers, creepers and chickadees are the guardians of the trunks of trees. Warblers and fly catchers protect the foliage. Blackbirds, crows, thrushes and larks protect the surface of the soil. Snipe and woodcock protect the soil under the surface. Each tribe has its respective duties to perform in the economy of nature; and it is an undoubted fact, that if the birds were all swept off the face of the earth, man could not live upon it; vegetation would wither and die; insects would become so numerous that no living thing could withstand their attacks. The wholesale destruction occasioned by grasshoppers, which have lately devastated the west, is undoubtedly caused by the thinning of the birds, such as grouse, prairie hens, etc., which feed upon them. The great and inestimable services done to the farmer, gardener and florist by the birds is only becoming known by sad experience. Spare the birds and save your fruit; the little corn and fruit taken by them is more than compensated by the quantities of noxious insects they destroy. The long persecuted crow has been found, by actual experience, to do more good by the vast quantities of grubs and insects he devours, than the harm he does in the few grains of corn he pulls up. He is one of the farmer's best friends.—Home Journal

Consumption Cured.

An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of Consumption, Bronchitis, Catarrh, Asthma and all throat and Lung Affections, also a positive and radical cure for Nervous Debility and Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellows. Actuated by this motive and a desire to relieve human suffering, I will send free of charge to all who desire it, this recipe, in German, French or English, with full directions for preparing and using. Sent by mail by addressing with stamp, naming this paper, W. A. NOYES, 149 Power's Block, Rochester, New York.

Be extremely small and lowly in your own eyes; soft and yielding as a dove, loving lowliness and cultivating it faithfully. Make good use of every opportunity for so doing. Do not be quick of speech, rather let your words be slow, humble, and gentle, and let your modest, thoughtful silence be eloquent. Bear with your neighbor, and be ever ready to make excuses for him. Do not philosophize over the contradictions which beset you; do not dwell upon them, but strive to see God in all things, without exception, and acquiesce in his will with absolute submission.—S. Francis de Sales.

God bless the children! they should not be permitted to suffer and die. We can cure them with Dr. MOFFETT'S TRICHINA (Teething Powders).

Do not temporize, for anodynes only soothe and lull to sleep and quiet. Dr. MOFFETT'S TRICHINA (Teething Powders) cures the child and regulates the bowels. For sale by Byron Lemly.

An experimental farm and hospital for the treatment of domestic animals is to be established near Washington by the bureau of agriculture. It is designed to investigate especially the most contagious diseases of cattle and horses.

No medicine ever introduced to the Profession and Public has given such universal satisfaction or preserved so many lives as Dr. MOFFETT'S TRICHINA (Teething Powders). Druggists tell us the rapid increase in its sale is marvellous. For sale by Byron Lemly.

LEGAL NOTICES.

PROCLAMATION.

\$200 00 REWARD.

W. HERRICK, Esq., appears by information received by me, that on or about the 31st day of April, 1883, Miss HERMANA KUBA, was brutally outraged by Jas. Pierce, who afterwards made his escape and is still at large. New Orleans, I. ROBERT LOWRY, Governor of Mississippi, do offer the above reward for the arrest and delivery of the said Jas. Pierce to the Sheriff of Adams County, Miss. Said reward is payable on conviction. And I do moreover, require all officers of this State to be diligent in their efforts to arrest said fugitive, Jas. Pierce. Given under my hand and the Great Seal of the State at Jackson, this 14th day of April, A. D. 1883. ROBERT LOWRY.

By the Governor: HENRY C. MYERS, Secretary of State.

DESCRIPTION: Jas. Pierce is between 23 and 27 years old; light complexioned; weighs about 140 or 150; about 5 feet 10 inches high; wears a light suit of pants and black hat; no beard, except mustache. Height, 5' 10".

TRUSTEES SALE.

BY VIRTUE OF THE PROVISIONS OF A certain Deed in Trust, executed by Mary Roberts and Annie E. Higgins, on the 15th day of February A. D. 1882, to S. B. DOWDY, Trustee, to secure to J. T. Hart a certain real-estate therein mentioned, which said deed is recorded in the Chancery Clerk's office of Adams County, Mississippi, on page 114, the undersigned, designated Trustee, do hereby sell, on WEDNESDAY, THE 23RD DAY OF APRIL, 1883, at 10 o'clock in the forenoon, at the Court House door in the town of Osceola, Adams County, Mississippi, to the highest bidder for cash, the land lying in said Adams County, and described as the west half of north-east quarter of section thirty-four of township two, range two, east, together with the improvements thereon belonging. I shall only convey said title as is shown in said Deed, though the title would in fact be subject to the lien of a mortgage in favor of the said J. T. Hart, in the sum of \$1000.00, with interest thereon at the rate of 10 per cent per annum, and secured by the west half of north-east quarter of section thirty-four of township two, range two, east, together with the improvements thereon belonging. I shall only convey said title as is shown in said Deed, though the title would in fact be subject to the lien of a mortgage in favor of the said J. T. Hart, in the sum of \$1000.00, with interest thereon at the rate of 10 per cent per annum, and secured by the west half of north-east quarter of section thirty-four of township two, range two, east, together with the improvements thereon belonging. S. B. DOWDY, Designated Trustee, Osceola, Miss., March 21, 1883—March 25, 1883.

CHANCERY SUITORS.

THE STATE OF MISSISSIPPI: I, J. W. HENNINGWAY, Chancery Clerk, do hereby command you to appear before the Chancery Court, First District, of the County of Adams, in said State, on the 27th day of May, 1883, to defend the contents of a certain Deed in Trust, in said Court of Chancery, in which you are a defendant. W. T. BATTLE, Clerk. Jackson, March 25, 1883—26.

NOTICE.

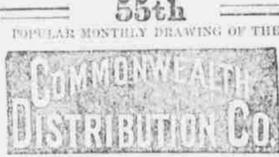

THE AMERICAN ASSURANCE COMPANY, of Toronto, Canada, will withdraw its deposit from the State Treasury, on the 27th day of August, 1883. W. M. L. HENNINGWAY, State Treasurer.

LOTTERIES.

\$30,000 FOR \$2.

55th.

POPULAR MONTHLY DRAWING OF THE

In the City of Louisville, on

Monday, April 30, 1883.

These drawings are on the last day of each month, and are conducted by the Commonwealth of Massachusetts, and are held in the City of Louisville, Ky. To this Company belongs the sole honor of having insured, since the year 1850, the lives of the most distinguished and noblest of the human race, and to have placed this Company beyond the reach of any and all competitors.

N. B.—The Company has now on hand a large amount of surplus funds, and is ready to issue policies for the same. For particulars, see the list of prices for the

April Drawing:

1st Prize, \$20,000. 1st of \$1000 each \$20,000. 2nd Prize, \$10,000. 2nd of \$1000 each \$20,000. 3rd Prize, \$5,000. 3rd of \$1000 each \$15,000. 4th Prize, \$2,500. 4th of \$1000 each \$10,000. 5th Prize, \$1,250. 5th of \$1000 each \$5,000. 6th Prize, \$625. 6th of \$1000 each \$2,500. 7th Prize, \$312.50. 7th of \$1000 each \$1,250. 8th Prize, \$156.25. 8th of \$1000 each \$625. 9th Prize, \$78.12. 9th of \$1000 each \$312.50. 10th Prize, \$39.06. 10th of \$1000 each \$156.25. 11th Prize, \$19.53. 11th of \$1000 each \$78.12. 12th Prize, \$9.76. 12th of \$1000 each \$39.06. 13th Prize, \$4.88. 13th of \$1000 each \$19.53. 14th Prize, \$2.44. 14th of \$1000 each \$9.76. 15th Prize, \$1.22. 15th of \$1000 each \$4.88. 16th Prize, \$0.61. 16th of \$1000 each \$2.44. 17th Prize, \$0.30. 17th of \$1000 each \$1.22. 18th Prize, \$0.15. 18th of \$1000 each \$0.61. 19th Prize, \$0.07. 19th of \$1000 each \$0.30. 20th Prize, \$0.04. 20th of \$1000 each \$0.15. 21st Prize, \$0.02. 21st of \$1000 each \$0.07. 22nd Prize, \$0.01. 22nd of \$1000 each \$0.04. 23rd Prize, \$0.00. 23rd of \$1000 each \$0.02. 24th Prize, \$0.00. 24th of \$1000 each \$0.01. 25th Prize, \$0.00. 25th of \$1000 each \$0.00. 26th Prize, \$0.00. 26th of \$1000 each \$0.00. 27th Prize, \$0.00. 27th of \$1000 each \$0.00. 28th Prize, \$0.00. 28th of \$1000 each \$0.00. 29th Prize, \$0.00. 29th of \$1000 each \$0.00. 30th Prize, \$0.00. 30th of \$1000 each \$0.00.

Whole Tickets, \$5. Half Tickets, \$2.50. 27 Tickets, \$50. 65 Tickets, \$160.
