## PENSION BUDGET.

A Big Dip Into the Government's Wallet

BAUM PREPARING HIS REPORT. Nearly \$200,000,000 Required For Nex

Year-When a Decrease May Bo Ex-

pected - Explanation of the

Deficiency. WASHINGTON, Nov. 33. - There appears to be more than usual interest attached to the forthcoming annual report of the alssioner of pensions for the reason government. It has been pretty well understood for some time past that the estimates for the next fiscal year would show a large increase over any previous year. This expectation was based on the fact of the large issue of pension during the year consequent upon recent pension legislation, which admitted to a pensionable status a very

however, sufficiently advanced to show that this estimate is in excess of the actual requirements. Since the passage of the disability bill, there has been a rapid increase in the amount needed to pay the pensions. For the year 1889-91 the total appropriation on account of pensions was about \$129,000,-Last year there was an increase

to \$144,000,000. But, us Gen. Raum will state in his annual report, this amount fell short of the actual demands by about \$18,000,000, so that there is a defleiency of that amount. Congress will be asked to make an appropriation of about \$180,000,000 for the coming fiscal year, about \$18,000,000 of which is an anticipation of an increase of that amount over the actual expenditures of the last year. It is the judgment of Gen. Raum that while this amount is likely to be increased in the next year or two, yet be feels confident that the maximum limits are nearly reached.

It is argued that the great bulk of pension appropriation at present is used in making first payments carrying arrears, and therefore, as soon as the great rush of applications under the disability act is over, a rapid decline in first payments will occur. It is understood that the first payments last year ered the back pay in the 311,000 cases

AMERICAN AGRICULTURE. curth Report of Agricultural Commis-

Preumoois and Texas Fever-Foreign tarkets Opened. Washington, Nov. 21.—Secretary Rusic has sought to make his fourth and hast ranual report as head of the de-partment of agriculture a valuable coment and has grouped together many interesting facts to show what a great agricultural people we are and what a proper thing it was to make the

prime commissioner of agriculture a cabinet officer. He says we sent abroad last year \$200,000,000 of products more than we had to import from foreign actions, and 80 per cent of these products were agricultural. He claims some credit commissioner of pensions for the reason that the pension appropriation figures for that because he shows an increase consplenously in the annual budget of 40,000,000 pounds weight of pork sent to countries which formerly excluded American pork and \$40,000,000 value increase in our exports of live cattle. All this comes from the increased precau-

The regulations inforced for the prevention of Texas fever have alone saved cattle growers more than three times the cost of running the whole department, and as to the suppression of pleuro-pneumonia, the secretary grows emphatic and eloquent. Notwithstanding the assertions to the contrary of wicked and prejudiced London newspapers he declares that pleuro-pneumonia does not exist in the United States. This result, he claims, has been obtained at a cost less by \$100,000 than was paid out by Great Britain during seven years as indemnity for slaughtered cattle alone. He also points out that the total loss to the cattle growers of Great Britain by this disease in deaths alone amounted to not less than half a billion dollars, and that this is the only country where the disease, having once gained a foothold, has been entirely eradicated.

He explains why our wheat did not realize the big lopes caised by the short crops in various European countries in 1891 by saying that those anticipations of enhanced prices failed to take into account the changed conditions now surrounding the production and marheting of the world's wheat crop.
He has undertaken experiments with imported seed to secure the production

of a home grown cotton which will meet all the requirements for which Egyptian and other cottons are now imported. He also wants the United

introduction of a new food, generally regarded in Europe as not suitable for numan consumption. A mixed corn and rye bread was found necessary to secure keeping qualities in a country-where all bread is made and sold by the balteries, and corn grinding machinery and eager inquiry on every lip, "Who's only, their wages not being reduced, purchased in America is now in use in in the mine?" THE END. The Hemestead Strike Declared Off-Some of the Strikers Left to Rad Shape. HOMESTRAD, Pa., Nov. 21.—The great strike at Carnegle's Homestead steel works has been declared off. After a ave months' struggle, which for bitterness has probably never been equaled in this country, the army of strikers finally decided to give up the fight This action was taken at a meeting of the lodges of the Amalgamated association at Homestead yesterday afternoon, the vote standing 101 in favor of declar-

ful powder explosion occurred shortly ing off the strike and 91 against it. after noon yesterday at the Blanch coal Among those present at the meeting were Vice President Carney, Secretary Kilgallon, Tresaurer Mudden and David Lynch, of the advisory board. The officials addressed the members and in plain words told them the strike was probably die. The names of those who ost and advised them to take steps to better their condition. The remarks met with conditerale opposition, but when the vote was taken it showed a

majority of ten in favor of declaring the strike off. Those who were in favor of calling the strike off were jubliant while those who were against it were badly put out. Edward Cook, colored, horribly Most of the latter were men who were urned about head and back, will die, obstinate and many of them either had applied for positions in the mill and had been turned down or felt sure that their names were on the company's

black list and they could not get posi-A member of the advisory board said yesterday that he had been trying to get the strike declared off for some weeks, as he knew it was lost, and it would have been better for the men as

a great many more of them could have gotten their places back. Those who cannot get back are in a John Ramsey, burned about head and bad fix as the relief funds will be stopped and many hundreds of them

have nothing to live on. The people in Homestead, especially the business men, are highly elated over the deciaration to call the strike off, for if it had continued much longer it would have ruined the town. Many business houses have fallen into the hands of the sheriff since the strike has been on. Business is expected to re-

sume its normal condition soon. The Homestead strike has proved one had just begun to come in to where the powder was stored and in a few minutes the country. It originated from a remore most of them would have been duction in wages in the departments there. A stunning explosion in the where members of the Amalgamated mine, a great blast of flame and association of iron and steel workimported. He also wants the United States to raise its own raw slik instead of sending \$25,000,000 a year abroad for the raw material, and he thinks we might also save \$67,000,000 a year which we now spend on imported fibers.

Inne, a great hast of hame and or smooth, and the mine's mouth, and then a roar was fung on what is known as the sliding scale, and to the country round that told only to well that there was death and disaster at the mine. The scene that follows a ster at the mine. The scene that follows a ster at the mine and the mouth, and the mine's mouth, and the same and the mine's mouth, and then a roar was fung on what is known as the sliding scale. It is a scale which regulates the men's wages by the market price of steel billies. Nearly every mill in this vicinity Many difficulties have attended the women who had husbands, brothers, ford of the firm to sign the same to sons or sweethearts in the smoking pit fusal of the firm to sign the scale for were simply frantic. Crowds came the Homestead mill, a lockout occurred swarming to the mine's mouth, just as by the Amalgamated association and they dropped their work or left their they were joined by the mechanics' tables, their faces white with death laborers, who struck out of sympathy

chances on the bad air and went in. ning almost as well as before the strike, strikers have steadfastly refused to tion was received with dismay by the strikers in the two Lawrenceville mills of Carnegie's. These men were sympathy strikers and went out when the men at Beaver Falls and Duquesne struck. The Duquesne men gave up Beaver Falls strikers decided to go back yesterday. The Lawrenceville no intention of giving in. They are now in the position of striking for no cause. They are very angry at the Homestead men and will probably de-

clare the strike off to-morrow. The strike at one time involved nearly 10,000 men and the loss in wages will reach it is said, in the neighborhood of \$2,000,000. Then there is the immense loss to the firm, which cannot be estimated, but which conservative people put at least double the amount lost by the men in wages. To this can be added nearly \$500,000 paid to the state troops and to the cost to the county of Allegheny for the riot, treason and other cases, growing out of the strike. The attempted assassination of Chairman Frick of the Carnegie company is

also indirectly credited to the strike.

senator Sherman Believez It Will Pars. Congress. WASHINGTON, Nov. 21. - Senator Sherman stated that, in his judgment, the anti-option bill, now pending in the senate, would be passed. As may be after some days' discussion in the senate, went over by agreement to be the

nt the coming session. The senator thought there was no but it would meet with an opposition very strong coming from the option dealers. Senator Vest is credited with

Steamer Burned MEMPHIS, Tenn., Nov. 21 .- The steam er Rosa Lee was burned at the wharf. The boat had come in from Ashport and the officers were leaving her when the watch awalconed the passengers and all above the deck got out in safety. Chief Engineer Bailey attempted a similar duty below the decks and thirty passengers came ushore.

A number of laboring men got on the

boat at Ashport and they were soon in a beastly state of intoxication. It is thought that four of these men were The revival of the old-time singing burned to death as the engineer was not school in New York is an example that able to rouse them.
