Cham Stew.

A well-made clam stew is such a delicious dish and so cheap that it is strange it is not often seen on our tables. Take fifty small clams of any good variety and steam them in their shells for about five minutes. When the shells begin to open, remove them from the fire and open them, saving all the juice. Heat three cups of milk over the fire. Mix two tablespoonfuls of butter with two even ones of flour, and stir in the milk. When it boils, add the clam juice. When it boils thoroughly again, add the clams. Season with a little pepper and let it boil again for two minutes. Then remove it at once from the fire and serve in soup plates over well-browned slices of white bread. If it boils any longer after the clams are put in, they will be toughened. It is as fertile to attempt to boil clams tender by extra cooking as to boil eggs soft by the same method.—N. Y. Tribune.

Lashes and Eye-Brows.

Never cut or trim the eye-brows. Their beauty includes delicacy—delicacy in curve, width and texture. Trimming destroys this by causing them to grow coarse, stiff and "wild." To get the well-defined, narrow arch many beauties pinch the eye-brows after anointing them with oil, to make the hair glossy. A stray hair or gray hair may be removed with a tweezers, but should never be cut. On the other hand eye-lashes are cultivated by clipping them once a year. Hairdressers call it "topping" them and the term is pertinent. Only the irregular tip ends should be cut, and this can only be done by another. Cutting the lashes weakens the eyes, remember that.—N. Y. World.
