

Late Foreign News.

EUROPEAN.

VERSAILLES, May 15.—Thirty thousand men are in the Bois de Boulogne sheltered by the trenches of the boulevard.

Yesterday the insurgents attempted a sortie from the Porte Dauphine. The head of the column was allowed to advance a little, when suddenly twenty-eight shells burst among them and the column was blown to atoms.

The troops in the trenches are only one hundred metres from the fort, which has not fired a shot in twenty-four hours.

Shells are fired from Meudon every minute, and the Viaduc at Auteuil has been smashed to pieces.

The troops are in excellent spirits and anxious for fight. The cavalry has been detached.

Thirty nine-inch howitzers are in readiness for street fighting on the entry of the army.

PARIS, May 14.—The Central Committee has ordered a general search for arms, and also for persons inimical to the government of the Commune.

Cermet, Federal Minister of Foreign Affairs, has issued a protest against a declaration of Thiers, that the Commune has disregarded the provisions of the Convention of Geneva in regard to explosive bullets, and retorts that the Versailles are themselves guilty of the same infraction.

The Commune announces that the attempt of the Versailles forces to throw a bridge over the Seine has been repulsed.

The Versailles continue to gain ground in the direction of the Maillet gate.

Vauvres is still in possession of the Federals.

VERSAILLES, May 14.—There is nothing new within the line of military operations. All was quiet last night.

Brushing batteries are now ready to open fire on the Esplanade of Paris.

A circular from Thiers states that the troops have undertaken to open trenches in the Bois de Boulogne.

Communication between the Bois Montrouge and Vauvres is cut off.

The Legion of the Prince Imperial in the village of Vauvres is occupied, and operations are advancing at all points for the deliverance of Paris.

The Versailles forces have occupied Fort Vauvres. The Federal garrison escaped by a subterranean passage to the Montrouge. Fifty guns, eight monitors and a few prisoners were captured.

PARIS, May 15.—A special despatch from Paris says that M. Puyat openly declares that the fall of the Commune is imminent. The National Guards decline to march, and talk of opening the gates to the Versailles.

Gen. Dombrowski's orders are not obeyed. The women of Paris have interviewed the Commune and demanded arms to fight the Versailles.

A special despatch says that the Versailles have been driven back to Longchamps from the advanced positions they had taken in the Bois de Boulogne. It is reported that two Versailles battalions were decimated on Friday night.

PARIS, May 15.—M. Beslay, who has been called the Father of the Commune, retires from the membership of that body because the residence of M. Thiers has been demolished.

All persons having sulphur or phosphorus in their possession are required to report to the Commune.

M. Schuler has been released from custody. Gen. La Crella is now in command at Petite Vauvres. Corps commanders will henceforth command arrondissements and be responsible for their defence.

Yesterday, Dombrowski issued orders that all officers refusing to obey the commands of superiors should be shot. He reviewed 5,000 men this morning at Neuilly and was received with great enthusiasm. After breakfast he rode to the front of Porte Maillet, and while sitting on his horse the Versailles opened fire and he was killed.

Yesterday a grand procession of women marched through the streets of the city, headed by buglers, drummers and flags, to the Hotel de Ville, where they demanded arms. A proclamation was issued for the organization of battalions of women immediately, for the purpose of stimulating the courage of the men. Orders have been given that men who show signs of cowardice shall be conducted to prison by women. The women battalions are to march against the Versailles.

The bombardment is exceedingly violent. Shells are falling within the city in large numbers, and a heavy attack from the Versailles is expected. It is stated that seven men and a number of women bearing ambulances with the red cross, were refused quarter by the sixth regiment of the line, who shot five of their number.

The Committee on War has been replaced in consequence of its difference with the Central Committee.

The batteries at Montreuil are firing heavily on Paris.

Gen. Rossel is reported to be in Belgium. Six government gunboats have arrived at Sevres. The troops in the Bois de Boulogne are advancing, and an entry into the city is imminent.

VERSAILLES, May 15.—Thirty cannon were found in Fort Vauvres on its occupation by the Versailles.

The battery at Montreuil continues to cannonade the insurgents' works, and is both demolishing the Escadrons of Paris and protecting the approaches of the government troops. Otherwise, there is no news of interest.

PARIS, May 15.—The Versailles forces are under the walls of Paris, exchanging shots with the insurgents, who fire the ammunition of Passy to Porte d'Issy.

After this accident, Abodie declared that he needed two hours, or less, to repair the cable. At 10 o'clock it was given out that the cable would not fall before seven o'clock, and a general expression of disappointment went through the crowd. Abodie was accused of complicity with the Versailles Government, and threatened with the guillotine. At twenty minutes past five, the cable was again stretched for the work of demolition, when suddenly, to the surprise of the spectators, the vast column moved and swayed, and then fell down, bursting into fragments as it struck the earth. It fell lengthwise in the Rue de la Paix, exactly on the manure cushion prepared for it, splintering with a dull, heavy, lumbering sound, while a thick cloud of dust and crushed and powdered masonry rose in the air.

The crowd, as soon as the column fell, gave tremendous shouts of the la Commune! and the bands played the Marseilles hymn. When the dust cleared away, there lay the glorious column splintered to pieces, its bronze work and masonry in two masses together in the middle, and the statue of the Emperor, several feet from the end of the column, with its head knocked off. The crowd rushed forward to collect fragments as relics, and the guards were unable to resist the rush.

Next, orators commenced their speeches, and indulged in all sorts of extravagant language. The statue was treated as if it were the Emperor himself, the National Guards shot into its face, and struck it with their rifles. After the ceremonies were concluded the crowd dispersed, and the soldiers moved off, waving their red flags and giving expression to their joy by shouting Abodie!

LONDON, May 16.—Later dispatches from Paris state that the Federals occupying the village of Malakoff have been cut off from communication with the main forces, and are in danger of capture. The insurgent troops have retired from Petit Vauvres and Montrouge to the city. Leaders to be used in scaling the ramparts of Paris have reached the outposts of the Government troops in the Bois de Boulogne.

PARIS, May 17.—This afternoon, the Auteuil and Versailles gates were destroyed by the bombardment, and the neighboring bastions are silent under terrific fire.

Is now in the hands of the Versailles troops, who are bombarding Petit Vauvres, Grenelle and Pont du Jour. The latter position is untenable. It is believed that the Versailles are undermining the walls near the Mairie gate.

Discussions continue among the committees of the Commune.

VERSAILLES, May 17.—A terrific explosion occurred this evening in the eastern portion of Paris, in the direction of the Avenue de Trudaine. Its effects were plainly noted here, and it is believed that the powder magazine near the inner fortifications, was reached by a shell from the Versailles' batteries at Neuilly.

NEW YORK, May 19.—A special correspondent telegraphed from Paris last evening, that the loss of life by the explosion of the cartridge factory on the Avenue Rasp, Champs de Mars, was mainly among women and children. The explosion was felt throughout the city and caused the greatest consternation; thousands rushed in the direction of the columns of smoke, and the entire populace appeared to be on the streets, all filled with astonishment, terror and curiosity, and the most incredible scene of confusion, excitement and terror ensued. At half-past six in the evening, a detachment of cavalry was ordered to drive the crowd away, and as there were several other magazines in the vicinity, it was feared the fire department would be unable to arrest the flames, and that they would explode. All traffic on the bridges had been stopped, and a panic among the troops is feared. Requisitions have been made on all street cars.

A letter despatched this morning from the same source says that the Committee of Safety has officially declared that the explosion was the work of agents of the Versailles Government. A strange story is circulated to the effect that Capt. de Baln found in the pockets of the wife of a gendarme the plan of the cartridge factory and a plan of Paris prepared by Trochu. Several persons have been arrested on suspicion.

Deserters from the army of Versailles have been removed to the interior of the city from Ecole Militaire, where they have been confined.

The mangled remains of the victims of the explosion were exhibited yesterday at the Church St. Pierre, outside the railings. An immense crowd was assembled inside the sacred edifice, including a large band of National Guards. Men smoked, conversed, laughed and drank as if they were at the Jardin Mobile. The number of persons killed by the explosion is less than was expected. The workmen employed in the factory had left the building about fifteen minutes before the catastrophe took place. An attack of the American legation was blown into the air by the explosion but no serious injury.

PARIS, May 18.—The Versailles attacked Montreuil, but reinforcements arrived and the attack was repulsed; several cannon were captured. An attack on the village of Vauvres was also repulsed. The Versailles have been beaten at the Bois de Boulogne, before the Maillet Gate, and the latter has been destroyed. The Versailles flag floats from Fort Vauvres.

May 19.—A serious attack upon the ramparts of Paris is said to be imminent. There are now 40,000 Versailles troops in the Bois de Boulogne, and they are pushing forward their parallels with great vigor. There was heavy firing from Fort Bièvre this morning. It was caused by the appearance of a reconnoitering party of cavalry belonging to the Versailles, who were driven off by the guns of the fort.

M. Gambon, member of the Committee of Public Safety, has joined the France-Paris, who are menacing and disintegrated. Should they go so far as to openly declare against the Commune they will give considerable trouble as they are well armed and organized.

The inhabitants of the Panbourg St. Antoine, who were among the most enthusiastic supporters of the Commune, are out of work, and as they cannot obtain it because of the insurrection, they also are discontented, and the quarter in which they live is assuming a disquieting aspect.

It is reported that the Versailles occupy Clignancourt, and also that they attempted to storm the Clignancourt Gate and were repulsed. There was a sharp engagement at Amiens.

There is a plant in New Grenada, which, if the ink-makers could only grow it in sufficient quantities, would be a fortune to them. It is commonly known as the ink plant, and the juice is used with water for writing. Its properties are, according to a tradition in the country, to have been discovered by the Spaniards during the administration. A number of written documents destined for the mother country, were embarked in a vessel and transmitted round the Cape. The voyage was unusually tempestuous, and the documents got wetted with salt water; those written with common writing ink became nearly illegible, whereas those written with "chancery" (the name of the juice), remained unaltered. A decree was therefore issued that all Government communications should in future be written on the vegetable juice. The ink is of a reddish color when freshly written, becoming perfectly black after a few hours, and it has no recollection of not corroding a steel pen so readily as ordinary ink.

We met with an unanswerable and witty retort while conversing with a car driver: "You are a Catholic, Jimmy?" "Yes, yer honor."

"And you pray to the Virgin Mary?" "I do, yer honor."

"Well, there's no doubt she was a good woman. The Bible says so.—But she may have been no better than your mother or mine."

"That's true, yer honor. But then you'll allow there's a mighty difference in their children."

A man who fell a distance of 125 feet down the shaft of the Onida Mine in Amador County, luckily caught on the timbers and escaped without injury.—He does not propose however to repeat this acrobatic feat.

Punch says: "What in woman is called curiosity, in a man is grandiloquently magnified into the spirit of inquiry."

The Equitable LIFE ASSURANCE Society

OF THE UNITED STATES, NO. 120, Broadway, N. Y.

President—W. D. ALEXANDER. Vice-Presidents—HENRY B. HYDE JAMES W. ALEXANDER. Secretary—SAMUEL BORROW. Actuary—GEORGE W. PHILLIPS.
