The section of the inter-island cable, between Maui and Molokai has been now successfully laid and has been found to work admirably. On the first trial to lay this section the cable broke shortly after the paying out began; but the cable schooner returned to the starting point, and began again—leaving the paying out of the broken portion until it is convenient to grapple for it. The Tupper left Friday morning to lay the section between Oahu Head and Molokai.

From information obtained by our shipping reporter from the skipper of the small schooner, recently arrived from the South-sea, it was stated that an iron safe was found buried at Maroon Island. Later inquiries have, however, elicited the fact that the safe brought by the schooner belonged to the wrecked vessel Jennie Walker. It is not a matter of much importance; but it has the effect of throwing discredit upon the whole story concerning Maroon Island, as told by the South-sea skipper referred to. Indeed the whole yarn has a hypothetical look.

Who is Andrew Carnegie? This is a question often asked, and has often been renewed after this fashion: "Andrew Carnegie is a man who imagines that the object of his life is to tell lies in favor of American institutions and especially American democracy." Our answer is that he is a Scotchman who came to America poor and friendless, and by dint of his native characteristics has accumulated vast wealth; and now, out of gratitude to the "bridge that carried him" he spreads broadcast the truths that he has experienced. For Andrew Carnegie to speak otherwise than favorably of the United States, would be base ingratitude and contrary to his knowledge; but he has a soul, and that soul is bored to speak the truth at all times and in all places, whether believed or not. All honor then to Andrew Carnegie the American millionaire.—(American Paper.)

It was proved that the money was paid as alleged; but, as six years had elapsed between the time of the loan and the bringing of this action, the statute of limitations applies. NEW STEAM-LINE CONTRACTS.

Projected Trans-Pacific Mail Lines of Steamers—Great Speed and Frequent Trips.

The Associated Press telegrams from Ottawa and London make the important announcement that the contract for the New Atlantic Steam-line service undertaken by the Andersons of London, has just been signed. It calls for a fleet of steamers of 6,000 tons, with a twenty-knot speed and guaranteeing under heavy penalties to make the voyage between Quebec and Plymouth in 144 hours, or six days.

Halifax is to be the terminus in winter and Quebec in summer. Bids are also invited for a fortnightly steam service between Vancouver and Sydney by way of the Hawaiian and Fiji Islands, the service to be sixteen knots. A steamer is to be ready to leave each terminus of the line within nine months of the signing of the contract.

The announcement was made some time ago, and the fact is known that five new steamers of high speed and peculiar construction, suited to the Pacific trade, are being built on the Clyde for a greatly improved service between Vancouver, Yokohama and Hongkong. It is expected that the first of this fleet will be on the route in about six months from this date, until which time the service will continue to be performed by the old Condors as at present.

Regarding the trans-Pacific line to the Australian colonies, the New South Wales Government will help sufficiently to ensure the continuance of the present line until the adjournment of the next Congress; and unless the United States Government furnishes two-thirds of the subsidy, the Australian aid to the maintenance of the Oceanic contract will be withdrawn.

What has changed feeling in the Colonies may be when it is known that England and Canada are contracting for a speedy fortnightly service between Vancouver and Sydney cannot, of course, be known until later on. But, in any event, the fact appears clear that unless Congress acts, the San Francisco service loses the subsidy which the colonies have been paying for twenty years.

These may be taken to be the facts of the situation precisely as they are. They are of a nature to commend themselves to the serious attention of all persons interested in the commercial prosperity of San Francisco, which is now, obviously, menaced. The situation should be looked squarely in the face, as becomes a practical people, and taken hold of with a vim and energy worthy of our reputation and our commerce as a nation of 60,000,000 people, with an overflowing treasury ought not to stand idly by, whilst the trade of the Pacific is passing into foreign hands. We are face to face with a great occasion. If we are alive to the situation, we may make the Pacific for commercial purposes practically an American lake; but if we are asleep for a year longer, Great Britain will have clear road to become the supreme mistress.—S. F. News Letter.

Kona Notes.

Bishop Willis, and several Honolulu gentlemen are rusticing here at present.

There are rumors that new plantations will shortly be commenced in this district, and the work of clearing will prove quite a job. We have not yet ascertained what is to be planted on the new areas; but it is believed that much of the land is better adapted for coffee than for cane. However that may be, new cultivations of any kind will be welcome, as the wild vegetation has been having its own way for years back.

A native boy met with an accident last week. He fell while running and knocked out some of his front teeth against a rock. At present, running amuck has no charms for that boy, and his experience in that pastime will probably have a restraining influence upon him in the future.

Recently there have been several showers of rain, but these have been hardly felt on the lower levels near the coast.

News of more murders of Chinamen reach us from the Hilo district, and these horrors are now becoming so common that they have a depressing effect.

A fond father at Dayton, Ohio, wanted to sicken his boy of cigarettes, and he got a powder at the drug-store to sprinkle among the tobacco. It took two doctors three days to save the boy's life, and he won't be well this summer. It was a sort of all-hands sickness.

Henry George does not think the new scheme of the Parnellites will become popular. The Tenants' League, he says, provides for the tenant farmers, who are comparatively a small class, and ignores the thousands of laborers. It is a trades union of tenants, and will not fill the place of the National League. The plan of campaign has become powerless, and Mr. Parnell thought the Tenants' League the best thing to do now.
